## SAP Certified Associate - Organizational Change Management Sample Questions (Q48-Q53):

### NEW QUESTION # 48

What are typical topics for a change assessment at the beginning of an SAP cloud implementation? Note: There are 3 correct answers to this question.

- **A. The assessment of the key stakeholders' attitude towards the project**
- B. The cloud project's vision and expected benefits
- **C. The change culture of the company**
- D. The scope for change management
- **E. The company's change management capabilities**

**Answer: A,C,E**

Explanation:

A change assessment at the start of an SAP cloud project (typically in the Prepare phase) evaluates the organization's readiness for change. Option A is correct because understanding the company's change culture (e.g., openness to innovation) sets the tone for the approach. Option D is correct as it assesses the organization's existing change management capabilities (e.g., skills, tools), identifying gaps to address.

Option E is correct because gauging stakeholders' attitudes (e.g., support or resistance) is critical for planning engagement strategies. Option B is incorrect-defining the scope of change management is an outcome of the assessment, not a topic itself. Option C is also incorrect; the project vision and benefits are defined by project leadership, not assessed as part of the change assessment.

Extract from SAP OCM Concepts: The change assessment in SAP Activate's Prepare phase focuses on readiness factors like culture, capabilities, and stakeholder perspectives (SAP OCM Framework).

### NEW QUESTION # 49

At the beginning of a large-scale cloud implementation project, the project lead asks the change manager to develop a detailed change plan for all upcoming implementation waves. How should the change manager react? Note: There are 2 correct answers to this question.

- A. Point out that the change plan will only be provided at a very generic level and all refinements will be documented in an open activity list

- B. Refer to the advantages of an agile approach for continuously updating and refining the change plan
- C. Ask the project lead to provide a detailed project plan for all implementation waves as a basis for elaborating the change plan
- D. Explain that early granular planning is often a waste of time and resources, as many factors can still have an impact on the change plan

**Answer: B,D**

Explanation:

At a project's start (Prepare phase), a detailed change plan for all waves is premature due to evolving variables in a large-scale SAP cloud implementation. Option A is correct because an agile approach-where the plan starts high-level and is iteratively refined (e.g., after each wave's lessons learned)-aligns with SAP Activate's flexibility. For example, initial resistance might shift priorities, requiring adjustments; agility accommodates this. Option D is correct as early granular planning wastes effort-e.g., scheduling training for Wave 3 before Wave 1's scope is clear is risky when requirements, timelines, or resources might change. This reflects SAP's pragmatic stance on planning amidst uncertainty.

Option B is incorrect-offering only a generic plan with an "open activity list" dismisses the project lead's request without constructive dialogue, undermining collaboration. Option C is incorrect; demanding a detailed project plan shifts responsibility unrealistically-OCM aligns with the project, not vice versa, and early details are often unavailable. The change manager should educate and adapt, not deflect or overpromise. SAP OCM balances responsiveness with realism.

"Respond to early detailed plan requests by advocating an agile, iterative approach and noting that granular planning is inefficient due to early-stage uncertainties" (SAP Activate, Change Plan Development Guidelines).

#### NEW QUESTION # 50

Why is it important to continuously manage user adoption after the go-live of a new cloud solution?Note:

There are 2 correct answers to this question.

- A. Because users need to accept and consume new functions and features provided with each release cycle.
- B. Because the insights help to identify hurdles or issues hindering sustained user adoption.
- C. Because users frequently change their attitude towards the cloud solution which requires continuous management attention.
- D. Because the user's interaction with the cloud solution drives the sizing of the IT infrastructure and the calculation of subscription fees.

**Answer: A,B**

Explanation:

Post-go-live adoption management is critical in SAP cloud projects due to ongoing updates. Option C is correct because cloud solutions (e.g., S/4HANA Cloud) release new features regularly, requiring users to adapt continually. Option D is correct as monitoring adoption identifies barriers (e.g., resistance, skill gaps) for resolution. Option A is incorrect-attitude shifts may occur but aren't the primary focus. Option B is incorrect; infrastructure sizing is a technical concern, not an adoption driver.

Extract from SAP OCM Concepts: SAP Activate's Run phase emphasizes sustaining adoption through feature updates and issue resolution (SAP OCM Framework).

#### NEW QUESTION # 51

Which general recommendations help to deliver change management successfully? Note: There are 2 correct answers to this question.

- A. Only use standardized tools and templates
- B. Be user-centric and empathetic
- C. Calculate the return on investment (ROI) for change management activities
- D. Establish trustful cooperation with project management

**Answer: B,D**

Explanation:

Successful change management in SAP OCM hinges on people and collaboration. Option C is correct-being user-centric and empathetic (e.g., addressing a user's fear of change with tailored support) ensures adoption by meeting emotional and practical needs, not just pushing info. Option D is correct as trustful cooperation with project management-e.g., aligning OCM with milestones-integrates efforts, like syncing training with testing, avoiding silos.

Option A is incorrect-standard tools help, but flexibility (e.g., custom workshops) is key; rigidity limits impact. Option B is incorrect-

ROI calculation is impractical for OCM's qualitative benefits (e.g., morale); focus is on outcomes, not finance. SAP OCM thrives on empathy and partnership.

"Deliver change management successfully by being user-centric and empathetic, and fostering trustful cooperation with project management" (SAP OCM Framework, Success Recommendations).

### NEW QUESTION # 52

The stakeholder analysis in a cloud project reveals that two important business leaders belong to the "opponents" category. What are your favorite strategies? Note: There are 2 correct answers to this question.

- A. Working on changing their attitude towards the project
- B. Ignoring the opponents and focusing on the skeptics
- C. Preventing opponents from forming an alliance against the project
- D. Trying to reduce their influence on the project success

Answer: C,D
