Latest EC-COUNCIL 312-38 Dumps Sheet & Exam 312-38 Discount

With the arrival of the flood of the information age of the 21st century, people are constantly improve their knowledge to adapt to the times. But this is still not enough. In the IT industry, EC-COUNCIL's 312-38 exam certification is the essential certification of the IT industry. Because this exam is difficult, through it, you may be subject to international recognition and acceptance, and you will have a bright future and holding high pay attention. PrepAwayPDF has the world's most reliable IT certification training materials, and with it you can achieve your wonderful plans. We guarantee you 100% certified. Candidates who participate in the EC-COUNCIL 312-38 Certification Exam, what are you still hesitant? Just do it quickly!

EC-COUNCIL EC-Council Certified Network Defender CND Sample Questions (Q634-Q639):

NEW QUESTION # 634

According to standard IoT security practice, IoT Gateway should be connected to a _____ .

- A. Router that is connected to internal servers
- B. Secure router
- C. Border router
- D. Router that is connected to other subnets

Answer: C

Explanation:

According to standard IoT security practices, an IoT Gateway should be connected to a border router. This setup is recommended because a border router acts as a gateway between different networks, managing the traffic between these networks and the internet. It provides an additional layer of security, ensuring that the IoT devices and the internal network are protected from external threats. The border router can implement security measures such as firewalls, intrusion detection systems, and data encryption to safeguard the IoT ecosystem.

NEW QUESTION # 635

Which command is used to change the permissions of a file or directory?

- A. systemctl
- B. kill
- C. chmod
- D. rmdir

Answer: C

Explanation:

The command used to change the permissions of a file or directory in Linux is chmod (change mode).

The chmod command allows users to set or modify the access permissions for file system objects (files and directories). These permissions determine the actions that can be performed by different classes of users: the file owner, members of the file's group, and others. The command syntax typically includes the permissions to be set, which can be expressed in either symbolic or numeric format, and the name of the target file or directory.

References: The use of the chmod command is a fundamental concept covered in the EC-Council's Certified Network Defender (CND) program, as it pertains to securing data by correctly setting file and directory permissions as part of system hardening practices¹²³.

NEW QUESTION # 636

The IR team and the network administrator have successfully handled a malware incident on the network. The team is now preparing

countermeasure guideline to avoid a future occurrence of the malware incident.

Which of the following countermeasure(s) should be added to deal with future malware incidents? (Select all that apply)

- A. Implementing a strong password policy
- B. Complying with the company's security policies
- C. Implementing strong authentication schemes
- D. Install antivirus software

Answer: A,B,C,D

Explanation:

The countermeasures to deal with future malware incidents involve a multi-layered approach that includes:

* Complying with the company's security policies: Ensuring that all security policies are followed can prevent malware incidents by maintaining a secure network environment.

* Implementing strong authentication schemes: Strong authentication can prevent unauthorized access, reducing the risk of malware being introduced by attackers.

* Implementing a strong password policy: Robust password policies can deter attackers by making it more difficult to gain access through brute force or other password-related attacks.

* Install antivirus software: Antivirus software is essential for detecting, preventing, and removing malware from the network.

These measures align with the Certified Network Defender (CND) program's emphasis on a defense-in-depth strategy, which includes protecting endpoints, data, and networks, as well as continuous threat monitoring and response¹²³.

* EC-Council's official Certified Network Defender (CND) resources¹²³.

NEW QUESTION # 637

Which of the following can be used to suppress fire from Class K sources?

- A. Carbon dioxide
- B. Water
- C. Foam
- D. Dry Chemical

Answer: C

Explanation:

Class K fires involve cooking oils and fats, which are highly combustible and can ignite quickly at high temperatures. To suppress a Class K fire, a specific type of extinguishing agent is required that can separate and absorb the heat elements of the fire - the fuel, oxygen, and heat necessary to start a fire. Foam extinguishers are most suitable for Class K fires because they use a substance that turns oils into foam, effectively smothering the fire and preventing re-ignition. Water should not be used on Class K fires as it can cause the oil to splatter and spread the fire. Carbon dioxide and dry chemical extinguishers are also not recommended for Class K fires as they do not adequately remove the heat from the fire.

References: The information provided is based on standard fire safety guidelines and classifications for fire types, particularly for Class K fires involving cooking media such as oils and fats¹².

NEW QUESTION # 638

Who is responsible for conveying company details after an incident?

- A. IR officer
- B. IR custodians
- C. IR manager
- D. PR specialist

Answer: D

NEW QUESTION # 639

.....

The selection of proper training material is a promising method to pass EC-COUNCIL 312-38 exam. No quality, no success. PrepAwayPDF EC-COUNCIL 312-38 questions and answers consist of perfect exam simulations, real test questions and accurate test answers. Our PrepAwayPDF EC-COUNCIL 312-38 test provides high-quality products and improves after-sales service. If you spend a lot of time catching up, the way you choose is wrong. What is more serious is that you may fail. Please trust our PrepAwayPDF EC-COUNCIL 312-38 braindump. By selecting it, 100% guarantee to pass the exam
