Latest H19-619_V1.0 Dumps Sheet & H19-619_V1.0 Dump Torrent

The H19-619_V1.0 PDF questions file is the third format of HCSP-Presales-Government Public Services V1.0 (H19-619_V1.0) exam practice questions. This format contains the real, valid, and updated Huawei H19-619_V1.0 exam questions. You can

Huawei HCSP-Presales-Government Public Services V1.0 Sample Questions (Q92-Q97):

NEW QUESTION # 92

When high-quality data is lacking, small-model pretraining can solve problems such as "poor model generalization" and "difficulty in local adaptation."

- A. False
- B. True

Answer: A

Explanation:
The performance of pretrained models heavily depends on the quantity and quality of available data. Small models have fewer parameters and limited representational capacity, so with insufficient data, they struggle to learn generalized features. This often leads to underfitting or overfitting. As noted in technical documentation (e.g., Hugging Face), local adaptation typically requires large, diverse datasets-something small models handle poorly.

NEW QUESTION # 93

In the "Cooking-Fume Disturbance" scenario, after clarifying the rights-and-responsibilities list, the "non- small-catering" over-scope operation falls under which department?

- A. Environmental Protection Bureau
- B. Urban-Management Bureau
- C. Market Supervision Bureau
- D. Administration for Industry and Commerce

Answer: D

Explanation:
Over-scope business operations are enterprise-registration issues supervised by the Administration for Industry and Commerce, not market supervision or urban management.

NEW QUESTION # 94

The Three-Year Action Plan for New IoT Infrastructure Construction sets a target that by the end of 2023, major domestic cities will have built IoT infrastructure supporting social governance modernization, industrial digital transformation, and livelihood upgrades, while achieving breakthroughs in key technologies and models.

- A. False
- B. True

Answer: B

Explanation:
The Plan clearly defines goals for 2023, including technological breakthroughs, model innovation, enterprise cultivation, replicable application models, and a complete IoT standard and security system, exactly as stated in the question.

NEW QUESTION # 95

Which of the following belong to the solution value of an intelligent-connected intersection scenario?

- A. Improved law-enforcement efficiency
- B. Improved communication efficiency
- C. Reduced accident rate

- D. Reduced fine frequency

Answer: B,C

Explanation:
Intelligent-connected intersections mainly aim to improve traffic safety and traffic-flow efficiency. Accident reduction (C) comes from risk prediction and early warning (e.g., collision warning, blind-spot monitoring).
Communication efficiency (D) comes from low-latency, reliable V2X communications (5G/C-V2X). Law- enforcement and fine frequency are secondary effects, not core value goals.

NEW QUESTION # 96
Which components are included in the Government Service Business Middle Platform?

- A. Case & Collaborative-Dispatch Center
- B. Form Center
- C. Certificate & License Center
- D. Process Center
- E. Item (Service) Center

Answer: A,B,C,D,E

Explanation:
The business middle platform for government services is designed around full-process standardization and integration. According to national government-service platform standards, the Item Center manages the catalog of service items; the Form Center unifies form templates; the Certificate Center supports generation and sharing of e-certificates; the Process Center defines cross-department approval flows; and the Case & Dispatch Center coordinates task assignment and progress monitoring. Together these modules form the core capabilities of the business middle platform.

NEW QUESTION # 97
......

Huawei H19-619_V1.0 certified examinations questions are collected and edited by latest exam teaching program and real test questions materials. We are engaged in updating our training materials constantly.
