And we also have the Software version of our Terraform-Associate-003 Learning Materials that can simulate the real exam which can help you better adapt to the real exam

HashiCorp Certified: Terraform Associate (003) (HCTA0-003) Sample Questions (Q225-Q230):

NEW QUESTION # 225

When do changes invoked by terraform apply take effect?

- A. Once the resource provider has fulfilled the request
- B. Immediately
- C. None of the above are correct
- D. After Terraform has updated the state file

Answer: A

NEW QUESTION # 226

Which of the following locations can Terraform use as a private source for modules? (Pick 2 correct responses)

- A. Public repository on GitHub.
- B. Public Terraform Registry.
- C. Internally hosted VCS (Version Control System) platform.
- D. Private repository on GitHub.

Answer: C,D

Explanation:

Comprehensive and Detailed in-Depth Explanation:

* Terraform allows using private module sources hosted in:

* C (Internally hosted VCS platforms, e.g., GitLab, Bitbucket, GitHub Enterprise) #

* D (Private GitHub repositories) #

* A (Public GitHub repository) # - GitHub is supported, but a public repo is not "private".

* B (Public Terraform Registry) # - The public registry is not a private source.

Official Terraform Documentation Reference: Terraform Module Sources

NEW QUESTION # 227

What does Terraform use the .terraform.lock.hcl file for?

- A. Tracking specific provider dependencies
- B. There is no such file
- C. Storing references to workspaces which are locked
- D. Preventing Terraform runs from occurring

Answer: A

Explanation:

Explanation

The .terraform.lock.hcl file is a new feature in Terraform 0.14 that records the exact versions of each provider used in your configuration. This helps ensure consistent and reproducible behavior across different machines and runs.

NEW QUESTION # 228

Which of the following is not a way to trigger terraform destroy?

- A. Passing --destroy at the end of a plan request.
- B. Running terraform destroy from the correct directory and then typing yes when prompted in the CLI.
- C. Using the destroy command with auto-approve.

Answer: A

Explanation:

Destroy Command Options: The terraform destroy command is the correct method to destroy resources, and it requires either manual approval or the -auto-approve flag.

Unsupported Triggering Method: The --destroy flag is not a recognized option for plan or apply commands, making B the correct answer as it is not a valid way to initiate resource destruction.

For more on destroying resources, refer to the terraform destroy command documentation in the Terraform CLI reference.

NEW QUESTION # 229

Running terraform fmt without any flags in a directory with Terraform configuration files check the formatting of those files without changing their contents.

- A. False
- B. True

Answer: A

Explanation:

Running terraform fmt without any flags in a directory with Terraform configuration files will not check the formatting of those files without changing their contents, but will actually rewrite them to a canonical format and style. If you want to check the formatting without making changes, you need to use the -check flag.

NEW QUESTION # 230

• • • • •

The experts in our company have been focusing on the Terraform-Associate-003 examination for a long time and they never overlook any new knowledge. The content of our Terraform-Associate-003 study materials has always been kept up to date. Don't worry if any new information comes out after your purchase of our Terraform-Associate-003 Study Guide. We will inform you by E-mail when we have a new version. We can ensure you a pass rate as high as 99%. If you don't pass the Terraform-Associate-003 exam, you will get a refund. Why not study and practice for just 20 to 30 hours and then pass the examination?
