

PracticeVCE CheckPoint 156-590 Exam Real and Updated Dumps are Ready for Download

BONUS!!! Download part of PracticeVCE 156-590 dumps for free: <https://drive.google.com/open?id=1uBd18Zeyb-2qAxAmfE9-H4NljhoIT0ZH>

I am proud to tell you that our company is definitely one of the most authoritative companies in the international market for 156-590 exam. What's more, we will provide the most considerate after sale service for our customers in twenty four hours a day seven days a week, therefore, our company is really the best choice for you to buy the 156-590 Training Materials. You can just feel rest assured that our after sale service staffs are always here waiting for offering you our services on our 156-590 exam questions. Please feel free to contact us. You will be surprised by our good 156-590 study guide.

Our services before, during and after the clients use our 156-590 study materials are considerate. Before the purchase, the clients can download and try out our 156-590 study materials freely. During the clients use our products they can contact our online customer service staff to consult the problems about our products. After the clients use our 156-590 Study Materials if they can't pass the test smoothly they can contact us to require us to refund them in full and if only they provide the failure proof we will refund them at once. Our company gives priority to the satisfaction degree of the clients and puts the quality of the service in the first place.

Your Investment with PracticeVCE CheckPoint 156-590 Practice Test is Secured

It is a prevailing belief for many people that practice separated from theories are blindfold. Our 156-590 learning quiz is a salutary guidance helping you achieve success. The numerous feedbacks from our clients praised and tested our strength on this career, thus our 156-590 practice materials get the epithet of high quality and accuracy. We are considered the best ally to our customers who want to pass their 156-590 exam by their first attempt and achieve the certification successfully!

CheckPoint Check Point Certified Threat Prevention Specialist (CTPS) Sample Questions (Q30-Q35):

NEW QUESTION # 30

What is a distinct limitation of Active Streaming compared to Passive Streaming in conjunction with Anti- Virus?

- A. There is no limitation.
- B. Only scheduled scans are possible.
- C. File size limits.
- D. Only a subset of file types supported.

Answer: D

Explanation:

The correct answer is D. Only a subset of file types supported . In Check Point traffic inspection architecture, Passive Streaming and Active Streaming are stream-handling mechanisms used by content- inspection components. Passive Streaming allows inspection of traffic as a stream is observed, while Active Streaming is more intrusive because the gateway can actively participate in traffic handling, buffering, or modification. In Anti-Virus inspection, this distinction matters because file classification and supported file handling depend on the inspection mechanism and file-type processing model. Check Point's Anti-Virus settings expose file-type controls, including processing file-type families and configuring actions per file type.

Check Point's Security Gateway documentation also identifies CPAS as Check Point Active Streaming and PSL as Passive Streaming Layer, with MUX selecting between passive and active streaming for application traffic.

The exam distinction is that Active Streaming does not provide unrestricted Anti-Virus inspection coverage across every possible file type; its limitation is that only a subset of file types is supported. Option A is wrong because Anti-Virus inspection is not limited to scheduled scans. Option B is not the distinct comparative limitation in this context. Option C is incorrect because there is a documented architectural distinction between the two streaming approaches. Reference topics: CPAS, PSL, MUX, Anti-Virus file-type processing, content inspection architecture.

NEW QUESTION # 31

What is the correct action to exclude one or more Threat Prevention Blades in a Blade exception rule?

- A. "ignore"
- B. "inactive"
- C. "Ask user"
- D. "bypass"

Answer: D

Explanation:

The correct answer is D. "bypass" . A blade exception rule is used when matching traffic should be excluded from inspection by one or more Threat Prevention blades. In this context, bypass is the correct action because it tells the gateway not to apply the selected blade inspection to that traffic. Check Point's exception documentation describes exceptions as a way to set a different action for an object in the protected scope, usually to reduce enforcement. The same guide shows that exception rules can include a Protection/Site/File

/Blade cell, where administrators can select categories including Blades as exception items.

This is distinct from making a protection inactive globally. Inactive disables a protection or blade more broadly and is not the correct per-exception action for excluding selected traffic. Ignore is not the Threat Prevention exception action used in this context. Ask user is a UserCheck-style interaction and is not appropriate for bypassing Threat Prevention blade inspection. Bypass is precise: it preserves the broader policy while excluding only the matching scope from the selected blade or file-processing behavior. The guide also shows bypass behavior in file-type exception configuration, where a file type can be selected and bypassed under profile exception handling. Reference topics: Threat Prevention Exception Rules, Blade exceptions, bypass action, protected scope, file/blade exclusion.

NEW QUESTION # 32

Task: Validate Anti-Virus updates are recent.

Answer:

Explanation:

See the Explanation.Explanation:

- 1- Use SmartConsole > Gateways > Threat Prevention > Updates.
- 2- Confirm update timestamp is recent.
- 3- SSH into Gateway and run cpstat anti-virus.
- 4- Run: cat \$FWDIR/tmp/antivirus_status.xml to verify signature version.
- 5- Confirm no update errors in \$FWDIR/log/antivirus_update.elg.

NEW QUESTION # 33

What happens to traffic that matches the Access Control Policy but not the Threat Prevention Policy?

- A. The traffic is not dropped. It is simply not inspected by the Threat Prevention Engine.

- B. It is accepted and logged.
- C. It is accepted.
- D. It is dropped and logged.

Answer: A

Explanation:

The correct answer is D. The traffic is not dropped. It is simply not inspected by the Threat Prevention Engine. Access Control and Threat Prevention are separate enforcement stages. The Access Control policy first decides whether the connection is allowed, rejected, or dropped. If Access Control accepts the connection, Threat Prevention is then applied only if the connection matches a Threat Prevention rule and therefore receives a Threat Prevention profile. Check Point documentation describes Threat Prevention policy as the mechanism used to activate only the protections needed and prevent attacks that most threaten the network. It also explains that Threat Prevention policy layers calculate their action separately and that in a single layer, the first matched rule is enforced.

Therefore, if accepted traffic does not match the Threat Prevention rulebase, no Threat Prevention profile is selected for that connection. The traffic is not blocked merely because of the non-match; it passes according to the Access Control decision, but without Threat Prevention inspection. Option A is too aggressive and incorrect. Option B incorrectly assumes logging. Option C is directionally true but incomplete because the key point is that Threat Prevention inspection is not applied. Reference topics: Access Control before Threat Prevention, Threat Prevention Rule Base, profile selection, unmatched traffic, ordered layer evaluation.

NEW QUESTION # 34

Task: Configure inspection settings for mobile VPN users.

Answer:

Explanation:

See the Explanation.

- 1- Go to Threat Prevention > Inspection Settings.
- 2- Add a new exception group for mobile user IP pool.
- 3- Set reduced inspection sensitivity for this group.
- 4- Save, publish, and test VPN user traffic.
- 5- Ensure logs still show critical threats being detected.

NEW QUESTION # 35

.....

Check Point Certified Threat Prevention Specialist (CTPS) (156-590) exam dumps offers are categorized into several categories, so you can find the one that's right for you. 156-590 practice exam software uses the same testing method as the real 156-590 exam. With 156-590 exam questions, you can prepare for your Check Point Certified Threat Prevention Specialist (CTPS) (156-590) certification exam. Job proficiency can be evaluated through 156-590 Exam Dumps that include questions that relate to a company's ideal personnel. These CheckPoint 156-590 practice test feature questions similar to conventional scenarios, making scoring questions especially applicable for entry-level recruits and mid-level executives.
