As a result, it gives you a feeling of taking the actual test. The CompTIA N10-009 desktop practice exam software runs on computers and laptops with a Windows operating system and it requires no internet. Since BraindumpQuiz always assists its customers, you can contact our team 24/7 to address your issues.

CompTIA N10-009 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• OSI reference model concepts, Comparison of networking appliances, applications, and functions
Topic 2	<ul style="list-style-type: none">• Selection and configuration of wireless devices.
Topic 3	<ul style="list-style-type: none">• Network Implementation: For network technicians and junior network engineers, this section covers Characteristics of routing technologies, Configuration of switching technologies and features, and
Topic 4	<ul style="list-style-type: none">• Network Security: This section of the exam for cybersecurity specialists and network security administrators covers the importance of basic network security concepts, Various types of attacks and their impact on the network, application of network security features, defense techniques, and solutions.• Network Troubleshooting: For help desk technicians and network support specialists, this section covers troubleshooting methodology, troubleshooting common cabling and physical interface issues, troubleshooting common issues with network services, and use of appropriate tools or protocols to solve networking issues.
Topic 5	<ul style="list-style-type: none">• Network Operations: For IT operations staff and network operations center (NOC) technicians, this part of the exam covers the purpose of organizational processes and procedures and use of network monitoring technologies.
Topic 6	<ul style="list-style-type: none">• Cloud concepts and connectivity options, and Common networking ports.

Latest N10-009 Exam Tips - N10-009 Reliable Test Pattern

A lot of progress is being made in the CompTIA sector today. Many companies offer job opportunities to qualified candidates, but they have specific N10-009 certification criteria to select qualified candidates. Thus, they can filter out effective and qualified candidates from the population. CompTIA Network+ Certification Exam (N10-009) must be taken and passed to become a

certified individual.

CompTIA Network+ Certification Exam Sample Questions (Q181-Q186):

NEW QUESTION # 181

Which of the following types of attacks is most likely to occur after an attacker sets up an evil twin?

- A. On-path
- B. DDoS
- C. Phishing
- D. ARP spoofing

Answer: A

Explanation:

Comprehensive and Detailed Explanation (paraphrased, aligned to N10-009):

An evil twin is a malicious wireless access point that impersonates a legitimate SSID. Once victims connect, the attacker can intercept and manipulate traffic, performing an on-path (man-in-the-middle) attack-capturing credentials, injecting content, or downgrading encryption.

B . DDoS overwhelms services with traffic; it's not the typical follow-on from clients joining a rogue AP.

C . ARP spoofing is another way to become on-path on wired segments, but with an evil twin, the wireless association itself enables the on-path position.

D . Phishing is social engineering; while an evil twin could be used to present fake portals, the primary technical posture after connection is on-path.

Reference (CompTIA Network+ N10-009):

Domain: Network Security - Wireless threats (rogue APs/evil twins), traffic interception, on-path attacks.

NEW QUESTION # 182

A company is experiencing intermittent issues when browsing websites, even though pinging external IP addresses like 8.8.8.8 works correctly. Which of the following is the most likely cause?

- A. VLAN mismatch
- B. Incorrect default gateway
- C. Subnet mask configuration
- D. Duplicate ISP IP address

Answer: D

Explanation:

If the business shares or duplicates the ISP-assigned public IP address, routing instability and conflicts will occur. Pinging a public IP like 8.8.8.8 may work (since ICMP can bypass certain conflicts), but browsing websites (which requires stable sessions and return traffic) will fail intermittently.

* A. If the default gateway were incorrect, no external connectivity would work at all.

* B. VLAN mismatch is an internal issue, not affecting ISP routing.

* C. Subnet mask misconfiguration would prevent consistent routing but usually blocks ping too.

References (CompTIA Network+ N10-009):

* Domain: Network Troubleshooting - Internet connectivity issues, ISP IP conflicts.

NEW QUESTION # 183

A network engineer needs to change, update, and control APs remotely, with real-time visibility over HTTPS.

Which of the following will best allow these actions?

- A. Web interface
- B. API gateway
- C. SNMP console
- D. Command line

Answer: B

Explanation:

API gateways offer programmable control and real-time communication, commonly over HTTPS, which allows administrators to update and manage devices like access points remotely and efficiently.

From Andrew Ramdayal's guide:

"APIs enable automation and real-time interaction with network devices via secure interfaces, often using HTTPS for encrypted communication and control."

NEW QUESTION # 184

Which of the following is the most closely associated with segmenting compute resources within a single cloud account?

- **A. VPC**
- B. IaaS
- C. Hybrid cloud
- D. Network security group

Answer: A

Explanation:

A Virtual Private Cloud (VPC) is most closely associated with segmenting compute resources within a single cloud account. A VPC allows you to define a virtual network that closely resembles a traditional network, complete with subnets, route tables, and gateways. This segmentation enables the isolation of different parts of a network within a cloud environment, ensuring security and efficient resource management. VPCs are a key component in many cloud infrastructures, providing the flexibility to manage and control network settings and resources.

NEW QUESTION # 185

A company receives a cease-and-desist order from its ISP regarding prohibited torrent activity.

Which of the following should be implemented to comply with the cease-and-desist order?

- A. Screened subnet
- B. Perimeter network
- C. MAC security
- **D. Content filtering**

Answer: D

Explanation:

Content filtering can be used to block or restrict access to websites and services that facilitate torrenting and other prohibited activities. By implementing content filtering, the company can comply with the ISP's cease-and-desist order and prevent users from accessing torrent sites and engaging in prohibited activities.

NEW QUESTION # 186

.....

At the BraindumpQuiz, we guarantee that our customers will receive the best possible CompTIA Network+ Certification Exam (N10-009) study material to pass the CompTIA N10-009 certification exam with confidence. Joining this site for the N10-009 Exam Preparation would be the greatest solution to the problem of outdated material.
