# Test CISSP Discount Voucher & Certification CISSP Exam Dumps

BTW, DOWNLOAD part of ExamTorrent CISSP dumps from Cloud Storage: https://drive.google.com/open?id=17TbT5qBlSJ_PW5SNcuGVkeKeTHmJbzvX

The ISC CISSP questions PDF questions are portable and printable, making it simple for you to prepare for the Certified Information Systems Security Professional (CISSP) (CISSP) test in a short time. Smart devices such as smartphones, tablets, and laptops all support the ISC CISSP Exam PDF dumps format of our study material.

Total Number of Questions in the ISC CISSP exam

The number of questions is 100-150.

The CISSP exam covers a broad range of topics related to information security, including security and risk management, asset security, security engineering, communication and network security, identity and access management, security assessment and testing, security operations, and software development security. CISSP Exam is designed for professionals with at least five years of experience in information security, and passing the exam requires a deep understanding of these topics and their practical application in real-world scenarios.

Unparalleled Test CISSP Discount Voucher & Leader in Qualification Exams & Perfect CISSP: Certified Information Systems Security Professional (CISSP)

The CISSP Learning Materials of us are pass guaranteed and money back guaranteed. Since the CISSP exam dumps are of high accuracy and high quality, and it can ensure you pass the exam successfully. We also give you any help you want, if you need any help or you have any questions, just contact us without any hesitation, we will do all we can to help you pass the exam. Just have a try, and you will benefit a lot.

The CISSP certification exam covers eight domains of information security, including security and risk management, asset security, security architecture and engineering, communication and network security, identity and access management, security assessment and testing, security operations, and software development security. CISSP Exam is designed to test an individual's knowledge and understanding of these domains, as well as their ability to apply this knowledge in practical scenarios.

ISC Certified Information Systems Security Professional (CISSP) Sample Questions (Q894-Q899):

NEW QUESTION # 894

What type of security controls operate on the input to a computing system, on the data being processed, and the output of the system?

- A. Data controls
- B. Numerical controls
- C. Application controls
- D. Normative controls

Answer: C

Explanation:
The correct answer is Application controls. The other answers are distracters.

NEW QUESTION # 895

A firewall that performs stateful inspection of the data packet across all
layers is considered a:

- A. First-generation firewall.
- B. Second-generation firewall.
- C. Fourth-generation firewall.
- D. Third-generation firewall.

Answer: D

Explanation:
The correct answer is Third-generation firewall. A stateful inspection firewall is considered a third-generation firewall.

NEW QUESTION # 896

The copyright law ("original works of authorship") protects the right of the owner in all of the following except?

- A. Display of the idea
- B. Reproduction of the idea
- C. The public distribution of the idea
- D. The idea itself

Answer: D

Explanation:
Explanation/Reference:
Explanation:
Copyright law does not product the idea itself. Copyright law protects the right of an author to control the public distribution, reproduction, display, and adaptation of his original work.
Incorrect Answers:
A: Copyright law protects the right of an author to control the public distribution of his original work.
B: Copyright law protects the right of an author to control the reproduction of his original work.
D: Copyright law protects the right of an author to control the display of his original work.

NEW QUESTION # 897

Which of the following is NOT an essential component of a VPN?

- A. authentication
- B. VPN Server
- C. encryption
- D. NAT Server

Answer: D

NEW QUESTION # 898
Which of the following is NOT a technique used to perform a penetration test?

- A. scanning and probing
- B. war dialing
- C. traffic padding
- D. sniffing

Answer: C

Explanation:
Traffic padding is a countermeasure to traffic analysis.
Even if perfect cryptographic routines are used, the attacker can gain knowledge of the amount of traffic that was generated. The attacker might not know what Alice and Bob were talking about, but can know that they were talking and how much they talked. In certain circumstances this can be very bad. Consider for example when a military is organising a secret attack against another nation: it may suffice to alert the other nation for them to know merely that there is a lot of secret activity going on.
As another example, when encrypting Voice Over IP streams that use variable bit rate encoding, the number of bits per unit of time is not obscured, and this can be exploited to guess spoken phrases.
Padding messages is a way to make it harder to do traffic analysis. Normally, a number of random bits are appended to the end of the message with an indication at the end how much this random data is. The randomness should have a minimum value of 0, a maximum number of N and an even distribution between the two extremes. Note, that increasing 0 does not help, only increasing N helps, though that also means that a lower percentage of the channel will be used to transmit real data. Also note, that since the cryptographic routine is assumed to be uncrackable (otherwise the padding length itself is crackable), it does not help to put the padding anywhere else, e.g. at the beginning, in the middle, or in a sporadic manner.
The other answers are all techniques used to do Penetration Testing.
