- A. Monitors
- B. Virtual Servers
- C. Link
- D. Persistence
- E. Wide IPs
- F. Data Centers

Answer: A,B,D

NEW QUESTION # 219

When configuring a pool member's monitor, which three association options are available? (Choose three.)

- A. configure a default monitor
- B. assign a monitor to the specific member
- C. inherit the pool's monitor
- D. inherit the node's monitor

- E. do not assign any monitor to the specific member

Answer: B,C,E

NEW QUESTION # 220

A site wishes to perform source address translation on packets arriving from the Internet for clients using some pools but not others. The determination is not based on the client's IP address, but on the pool they are load balanced to. What could best accomplish this goal?

- A. For each virtual server, regardless their default load balancing pools, association with SNAT pools could vary dependent upon need.
- B. The decision to perform source address translation is always based on a client's address (or network). Thus, this goal cannot be achieved.
- C. A SNAT for all addresses could be defined, and then disable the SNAT processing for select pools.
- D. The decision to perform source address translation is always based on VLAN. Thus, the goal cannot be achieved.

Answer: C

NEW QUESTION # 221

To get 101 exam certification, you will strive for a further improvement. When you choose GuideTorrent, it will help you pass 101 certification exam.
