Reliable SCP-NPM Exam Review 100% Pass-Rate Questions Pool Only at Easy4Engine

Using Easy4Engine you can pass the SolarWinds SCP-NPM exam easily. The first time you try to participate in SolarWinds SCP-NPM exam, selecting Easy4Engine's SolarWinds SCP-NPM training tools and downloading SolarWinds SCP-NPM practice questions and answers will increase your confidence of passing the exam and will effectively help you pass the exam. Other online websites also provide training tools about SolarWinds certification SCP-NPM exam, but the quality of our products is very good. Our practice questions and answers have high accuracy. Our training materials have wide coverage of the content of the examination and constantly update and compile. Easy4Engine can provide you with a very high accuracy of exam preparation. Selecting Easy4Engine can save you a lot of time, so that you can get the SolarWinds SCP-NPM Certification earlier to allow you to become a SolarWinds IT professionals.

SolarWinds Network Performance Monitor (NPM) Exam Sample Questions (Q36-Q41):

NEW QUESTION # 36

When you configure a report, you can limit access to specific users.

- A. TRUE
- B. FALSE

Answer: A

Explanation:

When you configure a report in the SolarWinds Platform Web Console, you can limit access to specific users by assigning a report limitation category to the report and to the user account. A report limitation category is a custom label that defines which reports a user can see. For example, you can create a "finance" category and assign it to the reports and users related to the finance department. Users with the "finance" category can only access the reports with the same category, and not the reports with other categories, such as "marketing" or

"IT". You can also prevent users from accessing any reports by applying the "No Reports" limitation to their account, or allow administrators to see all reports by applying the "No Limitation" category to their account. References: Restrict who can access reports in the SolarWinds Platform, Define what users can access and do in the SolarWinds Platform.

NEW QUESTION # 37

You want to create an alert that notifies you when packet loss meets or exceeds 50%, but only for a select set of nodes in your network. How do you accomplish this?

- A. Set an alert limitation for the nodes to be included in the alert
- B. Set the scope of the alert to only apply to nodes to be included in the alert
- C. Create separate SWQL trigger condition for each node to be included in the alert
- D. Set the alert trigger evaluation to evaluate nodes to be included in the alert

Answer: A

Explanation:

An alert limitation is a filter that restricts the scope of an alert to a specific set of objects, such as nodes, interfaces, applications, or groups. You can use an alert limitation to create an alert that only applies to a select set of nodes in your network, and exclude the rest. To set an alert limitation for the nodes to be included in the alert, follow these steps1:

Click Alerts & Activity > Alerts > Manage Alerts.

Find the alert that you want to edit or create a new alert.

On the Trigger Condition tab, define the condition that triggers the alert, such as Percent Loss is greater than or equal to 50.

On the Scope of Alert tab, select Limit the scope of this alert to a specific subset of objects.

Choose the method to define the subset of objects, such as Select objects manually, Use a custom SWQL query, or Use a custom SQL query.

Select or enter the criteria to filter the objects, such as the node name, IP address, group, custom property, or any other attribute.

Click Add Selected Objects to add the objects to the alert limitation.

Click Next and complete the rest of the alert configuration.

You can now save and enable the alert, and it will only notify you when packet loss meets or exceeds 50% for the nodes that you have selected in the alert limitation. References: 1: Limit the objects an alert applies to

NEW QUESTION # 38

The Orion platform supports agent-based monitoring for which OS types? (Choose all that apply.)

- A. Sun Solaris
- B. AIX Unix Agents
- C. Windows
- D. IBM
- E. Linux

Answer: A,C,D

NEW QUESTION # 39

You have two groups of users - one in Sydney and one in Perth. How do you limit the users within the Orion Platform so they only have access to the devices in their location?

- A. Group devices into geographical Orion groups and use single group Account limitations to limit user access
- B. Configure Network Atlas to show only devices in their geographical location
- C. Use the Orion Service Manager to limit user access to nodes only in their location
- D. Configure the Orion Web Console settings to show only devices in the user's geographical location

Answer: A

NEW QUESTION # 40

Status, Average Response Time, and Packet Loss are the only node details data you can view for your switch A device. The node details of your identical switch B device show Status, Average Response Time, and Packet Loss and other statistics. How can you monitor the other statistics on switch A and not lose any historical data?

- A. Add switch A again without deleting it first, and this time choose "Most Devices: SNMP and ICMP" as the polling method
- B. Edit the node properties of switch B and change the polling method to "Status Only: ICMP"
- C. Edit the node properties of switch A and change the polling method to "Status Only: ICMP"
- D. Delete switch A, and then add it again and this time choose "Most Devices: SNMP and ICMP" as the polling method
- E. Edit the node properties of switch A and change the polling method to "Most Devices: SNMP and ICMP"

Answer: A

NEW QUESTION # 41

.....

Our SCP-NPM study materials have enough confidence to provide the best SCP-NPM exam torrent for your study to pass it. With many years work experience, we have fast reaction speed to market change and need. In this way, we have the latest SCP-NPM guide torrent.
