EXAMINATION SUMMARY REPORT

FCP - FortiManager 7.6 Administrator

Candidate Name:
 Exam Series: FCP_FMG_AD-7.6
 Examination Date: July 17, 2025
 Grade: Pass

Congratulations on passing the FCP - FortiManager 7.6 Administrator exam!

Performance by Exam Section

Performance on each exam section is shown only for reference. The exam grade is based on the overall exam performance and not on the performance of individual exam sections. The main topics assessed on the exam are listed, with the proportion filled indicating the strength of each section. The chart is based on a 0% - 100% scale. If a bar is not displayed for an exam section, no questions were answered correctly for that topic.

Your Fortinet NSE Training Institute account will be updated within 5 business days. A digital exam badge will be issued for passing this exam. A digital certification badge and a printable certificate will be issued for achieving Certification once all certification requirements are met.

Viele Leute, die in der IT-Branche arbeiten, wissen die mühsame Vorbereitung auf die Fortinet FCP_FMG_AD-7.6 Prüfung. Wir PrüfungFrage können doch den Schwierigkeitsgrad der Fortinet FCP_FMG_AD-7.6 Prüfung nicht ändern, aber wir können die Schwierigkeitsgrad der Vorbereitung für Sie vermindern. Ihre Angst vor der Fortinet FCP_FMG_AD-7.6 Prüfung wird beseitigen, solange Sie die Prüfungsunterlagen von unserem Technik-Team probiert haben. Wir tun unser Bestes, um Ihnen zu helfen, Ihre Konfidenz für Fortinet FCP_FMG_AD-7.6 zu verstärken!

Fortinet FCP_FMG_AD-7.6 Prüfungsplan:

Thema	Einzelheiten
Thema 2	<ul style="list-style-type: none"> Administration: This section of the exam measures the skills of System Administrators and covers the essential features of FortiManager. It includes the initial configuration process and the setup of administrative domains (ADOMs), ensuring smooth system management.
Thema 3	<ul style="list-style-type: none"> Troubleshooting
Thema 4	<ul style="list-style-type: none"> Policy and Objects: This section of the exam measures the skills of System Administrators and evaluates their ability to manage policies and objects within FortiManager. It involves ADOM revisions, workspace mode, and policy imports and installations, emphasizing consistent policy control across networks.
Thema 5	<ul style="list-style-type: none"> Device Manager: This section of the exam measures the skills of Network Security Engineers and focuses on registering devices within ADOMs and handling device configurations. Candidates also learn how to install changes through scripts and diagnose issues using the revision history.

FCP_FMG_AD-7.6 Prüfungsguide: FCP - FortiManager 7.6 Administrator & FCP_FMG_AD-7.6 echter Test & FCP_FMG_AD-7.6 sicherlich-zu-bestehen

Wir PrüfungFrage haben reiche Ressourcen und viele entsprechende Prüfungsfragen von Fortinet FCP_FMG_AD-7.6 Prüfungen. Und Wir PrüfungFrage bieten Ihnen auch die kostenlose Demo von Fortinet FCP_FMG_AD-7.6 Zertifizierungsprüfungen. Sie können die Prüfungsfragen und Testantworten herunterladen. Wir PrüfungFrage bieten echte und umfassende Prüfungsfragen und Testantworten. Mit unseren besonderen Fortinet FCP_FMG_AD-7.6 Prüfungsunterlagen können Sie Fortinet FCP_FMG_AD-7.6 Prüfungen leicht bestehen. Wir PrüfungFrage garantieren 100% Erfolg.

Fortinet FCP - FortiManager 7.6 Administrator FCP_FMG_AD-7.6 Prüfungsfragen mit Lösungen (Q32-Q37):

32. Frage

Refer to the exhibit.

Which two statements about the configuration shown in the exhibit are true? Choose two answers.

- A. The FortiManager is in workflow mode.
- B. The administrator created a snapshot of the Remote-FortiGate policy package.
- C. An administrator can lock the Local-FortiGate_root policy package.
- D. The FortiManager ADOM workspace mode is set to normal.

Antwort: C,D

Begründung:

The exhibit shows Remote-FortiGate with a green closed lock icon, which indicates a locked policy package. The FortiManager 7.6 Administrator Study Guide states: "Policy locking is available in workspace normal and per-ADOM modes" and "Policy locking allows administrators to work on and lock a single policy package instead of locking the whole ADOM." This confirms that a package such as Local-FortiGate_root can also be locked, so A is correct.

B is incorrect because the study guide and lab guide describe snapshots as ADOM revisions, not policy package snapshots: "An ADOM revision creates a snapshot of the policy and object configuration for the ADOM." D is incorrect because in workflow mode, sessions and approval are required before installation. The exhibit shows a normal save/lock state, not a workflow session state.

33. Frage

An administrator has a FortiGate-HQ device with VDOMs-root, HR and Facilities, currently managed under the FortiManager ADOM-Site1. They try to move VDOM HR to the FortiManager ADOM-Site2, but it does not work.

Why is the administrator not able to move FortiGate-HQ VDOM HR to FortiManager ADOM-Site2?

- A. The administrator must have full access in the device layer of FortiGate-HQ VDOM-root before they can VDOMs to different ADOMs.
- B. The FortiGate-HQ must be managed under the FortiManager ADOM-root to allow moving its VDOMs to different ADOMs.
- C. The administrator must delete the FortiGate-HQ device from FortiManager and add it again using the Add Device wizard before moving the VDOM.
- D. FortiManager must be in ADOM normal mode, which does not allow VDOMs to be managed separately.

Antwort: D

34. Frage

Refer to Exhibit:

Configuration Revision History

ID	Date & Time	Name	Created by	Installation	Comments
7	2025-03-27 17:07:13	BR1-FGT-1	admin	Installed

12155 set comments "test"
12156 next
```

An administrator admin used the Configuration Revision History window to revert the FortiGate device configuration to revision ID 6. After running the reinstall policy package, the administrator noticed problems with the firewall policy- they could not see the unset comment on policy ID 1.

Why did FortiManager not remove the comment from policy ID 1 when the administrator ran reinstall policy package?

- A. Because the administrator used the Revision Diff view, which shows what changed, not what will be installed.
- B. Because every time the administrator uses the revert config file, they must use the Install Wizard instead of running the reinstall policy package.
- C. Because the administrator student must install the configuration changes to correctly see the expected results.
- D. Because the administrator must import the firewall policies to update the firewall policy package.

Antwort: D

Begründung:

The correct answer is B. The FortiManager 7.6 Administrator Study Guide gives the exact extract:

"Performing a revert operation followed by an installation only reverts device-level changes and does not revert policy packages. To achieve full synchronization, you must run the Import Configuration tool on FortiManager to synchronize the policy package." The guide also states: "After every retrieve, auto-update, or revert operation, you must use Import Configuration to ensure the policy information is synchronized." In the exhibit, the missing unset comment for policy ID 1 is a policy package issue, not just a device-

level revert issue. Reinstalling the existing policy package does not automatically rebuild it from the reverted revision. The administrator must import the firewall policies again so the policy package reflects the reverted policy state. That is why the comment was not removed.

35. Frage

Which is recommended when you are managing a high volume of logs in your network?

- A. Store logs on FortiManager and use FortiView.
- **B. Add and manage FortiAnalyzer from FortiManager.**
- C. Enable advanced ADOM mode on FortiManager.
- D. Forward logs from FortiAnalyzer to FortiManager daily.

Antwort: B

Begründung:

When managing a high volume of logs in your network, FortiAnalyzer is specifically designed to handle log storage, analysis, and reporting. It provides centralized log management and can scale more effectively than relying on FortiManager or FortiGate alone for log storage.

36. Frage

Company policy dictates that any time a change is made to a policy package on FortiManager an ADOM revision is created before the change installed, and that revision is held for a minimum of 90 days.

Over the past three months, each installed change has resulted in several unused policies and duplicate objects.

The FortiManager administrator plans to upgrade the FortiGate devices and then upgrade the FortiManager ADOM from version 7.4 to 7.6.

Which action can the administrator take to avoid slow ADOM upgrades?

- A. Check and repair the global configuration database before upgrading.
- **B. Limit ADOM revisions before upgrading.**
- C. Export firewall policies to Excel, delete them on the ADOM. then reimport them after upgrading the ADOM.
- D. Find unused firmware templates, then delete them before upgrading.

Antwort: B

Begründung:

Limiting ADOM revisions reduces the number of stored historical configurations, which helps avoid performance degradation and slow ADOM upgrades caused by a large volume of revisions.

37. Frage
