300-535 New Study Notes | Free 300-535 Test Questions

With the help of performance reports of Automating and Programming Cisco Collaboration Solutions (300-535) Desktop practice exam software, you can gauge and improve your growth. You can also alter the duration and Automating and Programming Cisco Collaboration Solutions (300-535) questions numbers in your practice tests. Questions of this Automating and Programming Cisco Collaboration Solutions (300-535) mock test closely resemble the format of the actual test. As a result, it gives you a feeling of taking the actual test.

Cisco 300-535 is a globally recognized certification exam, focused on the automation and programming of Cisco Collaboration Solutions. 300-535 exam is designed to validate the candidate's understanding of various aspects of scripting languages, APIs, and tools required to automate Cisco collaboration solutions in a streamlined manner.

Cisco Automating and Programming Cisco Collaboration Solutions Sample Questions (Q94-Q99):

NEW QUESTION # 94

What is a key feature of YANG?

- A. error prediction
- B. reusable types and groupings
- C. JAVA compatibility
- D. use identification

Answer: B

NEW QUESTION # 95

Which Cisco IOS XR command should be used to identify if MPLS TE FRR is enabled?

- A. show mpls traffic-eng protection
- B. show mpls fast-reroute
- C. show mpls fr
- D. show mpls protection
- E. show mpls traffic-eng tunnel <tunnel#>

Answer: E

Explanation:

The MPLS Traffic Engineering (TE)-Fast Reroute (FRR) Link and Node Protection feature provides link protection (backup tunnels that bypass only a single link of the label-switched path (LSP)), node protection (backup tunnels that bypass next-hop nodes along LSPs), and the following FRR features:

*Backup tunnel support

*Backup bandwidth protection

*Resource Reservation Protocol (RSVP) Hellos

Prerequisites for MPLS Traffic Engineering (TE)-Fast Reroute (FRR) Link and Node Protection Your network must support the following Cisco IOS features:

*IP Cisco Express Forwarding

*Multiprotocol Label Switching (MPLS)

Your network must support at least one of the following protocols:

*Intermediate System-to-Intermediate System (IS-IS)

*Open Shortest Path First (OSPF)

Before configuring FRR link and node protection, it is assumed that you have done the following tasks but you do not have to already have configured MPLS TE tunnels:

*Enabled MPLS TE on all relevant routers and interfaces

*Configured MPLS TE tunnels

NEW QUESTION # 96

```
request": {  
    "url": "http://{{server}}:{{port}}/restconf/data/13vpn:vpn/13vpn=test",  
    "method": "POST",  
<snip>
```

Refer to the exhibit. An automation engineer has created a RESTCONF POST to configure network devices.

Which two tasks are accomplished when the code is executed? (Choose two.)

- A. If the specified configuration is already in the running configuration, the command is not replaced by this request.
- B. If the specified configuration is already executed in the running configuration, the command is merged with this request.
- C. If the specified configuration is not on the device, the POST request creates it.
- D. If the specified configuration is already in the running configuration, the command updates this request.
- E. If the specified configuration is already in the running configuration, the command is replaced by this request.

Answer: C,D

Explanation:

Section: 2.0 Automation APIs and Protocols

NEW QUESTION # 97

Refer to the exhibit. A network engineer is configuring dial-out model-based telemetry on Cisco IOS XR. The telemetry server receives an event, but the payload cannot be parsed correctly.

What is the issue?

```
telemetry model-driven
  destination-group DGroup1
    address family ipv4 172.0.0.1 port 5432
    encoding gpb
    protocol tcp
  sensor-group SGroup1
    sensor-path Cisco-IOS-XR-infra-statsd-oper:infra-statistics/
      interfaces/interface/latest/generic-counters
  !
  subscription Sub1
    sensor-group-id SGroup1 sample-interval 30000
    destination-id DGroup1
```

- A. Encoding configuration in the destination-group is incorrect
- B. The protocol configured in the destination-group needs to be udp.
- C. IPv4 addressing is not supported and cannot be used
- D. The sample-interval configuration is too short.

Answer: A

Explanation:

The encoding is set to gpb (Google Protocol Buffers), but if the collector is expecting a different format (like JSON or XML), the payload cannot be parsed. The encoding in the destination group must match the format expected by the telemetry server/collector.

NEW QUESTION # 98

An engineer needs to update the configuration on a Cisco 3850 switch. To execute this change, RESTCONF must be used. Which two operations must the engineer use that are covered by NETCONF <edit-config>? (Choose two.)

- A. GIVE
- B. GET
- C. POST
- D. HEAD
- E. PUT

Answer: C,E

Explanation:

POST is used in RESTCONF to create new resources, similar to how <edit-config> in NETCONF creates or updates configuration data.

PUT is used in RESTCONF to update or replace existing resources, which also aligns with NETCONF <edit-config> operations for updating configuration.

NEW QUESTION # 99

.....

Questions in desktop-based mock exams are identical to the real ones. Our practice exams give you options to change their durations and questions' numbers to polish your skills. You can easily assess your readiness with the assistance of results produced by the practice exam. This Automating and Programming Cisco Collaboration Solutions software records all your previous takes so you can identify your mistakes and overcome them before the final attempt. The Automating and Programming Cisco Collaboration

Solutions (300-535) desktop practice exam software works only on Windows operating system.
