Proper isolation for composite resin restorations is critical to ensure maximal bond strength. Composite restoration placement is technique-sensitive, and saliva contamination is one of the biggest culprits in decreasing these restorations' longevity.

When enamel and dentin are etched, micromechanical irregularities are formed which allow for interlocking with the resin. This results in micromechanical retention, not

If you purchasing the Service-Con-201 Test Practice files designed by many experts and professors from our company, we can promise that our online workers are going to serve you day and night during your learning period. And you can enjoy updates of Service-Con-201 learning guide for one year after purchase.

Salesforce Certified Service Cloud Consultant Sample Questions (Q52-Q57):

NEW QUESTION # 52

A service manager at Cloud Kicks has received complaints from customers who speak languages other than English that their cases are taking a long time to be resolved. After investigation, the consultant has determined that these work items fail to be assigned to the correct agents.

What should the consultant recommend that the service manager do first?

- A. Review Assigned Work.
- **B. Review Skills Backlog.**
- C. Review Queues Backlog.

Answer: B

Explanation:

Reviewing the Skills Backlog allows the service manager to identify any mismatches or delays in assigning cases to agents with the appropriate language skills. Addressing issues in the skills assignment process can help reduce resolution times for non-English speaking customers by ensuring cases are directed to the right agents.

NEW QUESTION # 53

Cloud Tech Support is preparing to deploy Service Cloud with new features including Case Escalation Rules and a Knowledge Base. Their current support staff is accustomed to email-only case management. The company wants minimal downtime and a high adoption rate for the new solution.

What should the Service Cloud Consultant recommend to prepare the support reps for the transition?

- A. Assign power users to configure the system and handle questions post-launch without a formal enablement plan.
- **B. Deliver a combination of hands-on training and Trailhead-based learning aligned to business processes before deployment.**
- C. Develop just-in-time video tutorials and provide access after go-live so reps can learn as they use the system.

Answer: B

Explanation:

Salesforce implementation best practices emphasize proactive change management and user enablement before deployment. Delivering hands-on training combined with Trailhead-based guided learning ensures users are confident in new features such as Case Escalation and Knowledge Management prior to go-live.

This approach minimizes downtime, drives adoption, and aligns learning with actual business processes-core principles of the Implementation Strategies domain.

Option A delays learning until after go-live, increasing adoption risk.

Option C lacks structured enablement and change management planning.

Referenced Salesforce Materials:

Service Cloud Consultant Exam Guide - Implementation Strategies Domain.

NEW QUESTION # 54

Universal Containers has created permission sets granting access to objects and fields in one of its sandboxes.

Following best practices, how should a consultant deploy these permission sets to production?

- A. Use Salesforce Workbench.
- B. Re-create them manually.
- **C. Use a change set.**

Answer: C

Explanation:

The best practice for deploying permission sets from a sandbox to production is to use a change set. Change sets allow administrators to push configurations, including permission sets, directly from one Salesforce environment to another. This ensures a smooth and error-free transfer of configurations, maintaining the integrity of permissions and access controls in the production environment.

NEW QUESTION # 55

Universal Containers is considering a Knowledge-Centered Support (KCS) implementation.

Which benefit can be expected from KCS adoption?

- A. Reduced issue resolution time
- B. Reduced administrative overhead
- C. Reduced need for self-service

Answer: A

Explanation:

Knowledge-Centered Support (KCS) focuses on integrating knowledge creation and maintenance into the problem-solving process. By adopting KCS, organizations can expect a reduction in issue resolution time as service agents have quicker access to solutions and knowledge articles, enabling faster responses to customer inquiries and issues.

NEW QUESTION # 56

Using the Lightning Service Console, how can a contact center manager see which service agents are currently available to accept new cases?

- A. Omni-Channel Analytics
- B. Omni-Channel Utility component
- C. Omni-Channel Supervisor tab

Answer: C

Explanation:

The Omni-Channel Supervisor tab in the Lightning Service Console provides real-time visibility into the status of service agents, including who is currently available to accept new cases. This feature allows contact center managers to monitor and manage agent availability and workload effectively, ensuring efficient case distribution.

NEW QUESTION # 57

.....

It is common in modern society that many people who are more knowledgeable and capable than others finally lost some good opportunities for development because they didn't obtain the Service-Con-201 Certification. The prerequisite for obtaining the Service-Con-201 certification is to pass the exam, but not everyone has the ability to pass it at one time. Because of not having appropriate review methods and review materials, or not grasping the rule of the questions, so many candidates eventually failed to pass even if they have devoted much effort.
