In order to help customers study with the paper style, our C1000-173 test torrent support the printing of page. We will provide you with three different versions, the PDF version allow you to switch our C1000-173 study torrent on paper. You just need to download the PDF version of our C1000-173 Exam Prep, and then you will have the right to switch study materials on paper. We believe it will be more convenient for you to make notes. And you can be assured to download the version of our C1000-173 study torrent.

## IBM C1000-173 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>Architect with AI Series: This section measures the skills of an AI Solution Architect and includes designing architectures for solutions involving various IBM Watson AI services. Architecting with Watson Assistant involves creating conversational AI interfaces. Watson Discovery solutions focus on building cognitive search and content analytics applications. Watson Pipelines solutions involve orchestrating data science workflows. Watson OpenScale architectures enable AI model monitoring and governance. Architecting with Match 360 supports personalized engagement by integrating multi-channel customer insights.</li></ul>

Topic 2	<ul style="list-style-type: none"> <li>• Security Requirements: This domain targets a Security Architect and focuses on planning security for a Cloud Pak for Data deployment. It includes managing certificates that secure communications, identity management systems, and access and authorization controls to enforce secure and compliant user and service interactions. The auditing features and their integration with enterprise audit systems are crucial to ensure traceability and accountability. Asset interchange security involves safeguarding data movement between services.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>• Architect with Data Governance Services: This section evaluates skills of a Data Governance Specialist, covering the architecture of knowledge catalogs to enable data discovery and management. Data Privacy architectures ensure compliance with regulatory requirements around data protection. Knowledge Accelerators involve designing solutions that speed up data governance processes through predefined policies and templates.</li> </ul>

## IBM C1000-173 Valid Dumps Ppt & Valid C1000-173 Exam Simulator

The C1000-173 exam dumps are the ideal study material for quick and complete C1000-173 exam preparation. The real and top-notch IBM C1000-173 exam questions are being offered in three different formats. These formats are IBM C1000-173 PDF Dumps Files, desktop practice test software, and web-based practice test software.

### IBM Cloud Pak for Data v4.7 Architect Sample Questions (Q86-Q91):

#### NEW QUESTION # 86

How are caches defined in IBM Data Virtualization?

- A. Caches are manually defined based on recommendations and monitoring data.
- B. They are created automatically based on usage patterns.
- C. Caches are suggested based on statistics collected during data source configuration.
- D. DataStage flows are created in a project for maintaining caches.

**Answer: A**

Explanation:

In IBM Data Virtualization, caches must be manually defined by administrators. While monitoring and query performance statistics can guide where caching would be beneficial, the creation and configuration of caches (e.g., refresh schedules and scope) are manual tasks. There is no automated cache creation mechanism (A), nor are DataStage flows used for cache maintenance (B). Suggestions based on statistics (D) may assist administrators, but they do not automatically create the caches.

#### NEW QUESTION # 87

How do storage classes in IBM Cloud Pak for Data impact application performance?

- A. By altering the user access levels only
- B. They have no impact on performance
- C. By defining the availability and durability of data
- D. By changing the color of the storage interface

**Answer: C**

#### NEW QUESTION # 88

A customer wants to manage Cloud Pak for Data secrets via an existing supported vault system. What is needed to integrate any supported vault systems into Cloud Pak for Data?

- A. Client certificate to authenticate to the vault.
- B. Username and password of the vault.

- C. Fully qualified URL of the vault.
- D. Client key in .key or .pem format to authenticate to the vault.

**Answer: C**

Explanation:

To integrate a supported vault system with IBM Cloud Pak for Data, the fully qualified URL of the external vault is a required component for establishing communication between Cloud Pak for Data and the vault. This is typically configured in the external secrets manager settings. While authentication credentials (like client certificates or keys) are also necessary depending on the authentication method used, the fully qualified URL is universally required to locate and connect to the vault.

IBM Cloud Pak for Data supports integration with vaults such as:

HashiCorp Vault

AWS Secrets Manager

Azure Key Vault

IBM Key Protect

For more details, refer to:

IBM Cloud Pak for Data: Using external secrets managers

### NEW QUESTION # 89

Insurance industry datasets frequently include personally identifiable information (PII) and many data analysts need access to datasets but not to PII. Which Cloud Pak for Data services leverage Data Protection Rules?

- A. DataStage, SPSS Modeler, and Python Notebooks
- B. IBM Data Virtualization, Data Privacy, and IBM Knowledge Catalog
- C. Watson Discovery and Watson Assistant
- D. Data Refinery, Watson Pipeline, and Watson Studio

**Answer: B**

Explanation:

IBM Cloud Pak for Data includes built-in Data Protection Rules to enforce access control on sensitive data, such as PII. These rules are integrated directly into services like IBM Data Virtualization, Data Privacy, and IBM Knowledge Catalog. When analysts or applications access data through these services, the platform automatically masks, obfuscates, or restricts access to sensitive fields based on the defined policies. This ensures compliance with data privacy regulations and organizational security policies without manual intervention.

### NEW QUESTION # 90

Which of the following IBM Cloud Pak for Data services are essential for real-time data analysis and decision-making? (Select two)

- A. Decision Optimization
- B. Watson Knowledge Catalog
- C. Db2 Event Store
- D. Watson Studio

**Answer: A,C**

### NEW QUESTION # 91
