Passing ASIS certification PSP exam can improve your IT skills. Our TestPassed provide you practice questions about ASIS Certification PSP Exam. TestPassed's professional IT team will provide you with the latest training tools to help you realize their dreams earlier. TestPassed have the best quality and the latest ASIS certification PSP exam training materials and they can help you pass the ASIS certification PSP exam successfully.

ASIS Physical Security Professional Exam Sample Questions (Q122-Q127):

NEW QUESTION # 122

When are KPIs defined?

- A. At the start of the Construction Phase
- B. After the Bidding Phase
- C. At NTP
- **D. At project initiation**

Answer: D

NEW QUESTION # 123

Scenario:

The entire network consists of the following activities and relationships. Activity A is twenty days long and is tied to Activity B, a ten-day activity, with a finish-to-finish tie with a lag value of five. Activity B is tied to Activity C, a twenty-day activity, with a start-to-start relationship with a lag value of five.

□ PSP Activities Table

Scope Known about Rock-Filled Dam Project:

The dam requires river diversion and work over two or more rainy seasons. The contract is lump sum, competitively bid, and will be self-performed. The owner has attempted to shift all risk to the contractor by employing "no differing sit conditions" and "no damage for delay" clauses. There is a bonus/penalty provision of \$2,500 per calendar day for early or late delivery. The early completion bonus is capped at \$500,000, with no cap for late delivery penalty.

Liquidated damages end at the finish of demobilization. Indirect costs per calendar day are \$2,800 for the "normal" schedule and \$3,200 for the "crashed" schedule. The winter/wet weather season is 151 days between October 15 and March 25 of each year, reduces the efficiency of the contractor's operations by 20% and costs the contractor \$10,000 per day. Assume a start date of March 5, 2001 and use a 7-day work week.

The following table lists work activities as planned by the contractor.

□ Theoretically construct a summary activity for only those activities with a finish-to-start relationship for Activities 8001 through 10001. Using the "normal" schedule, what is the cost of this hammock?

- A. \$420,000.
- B. \$307,000.
- C. \$524,000.
- **D. \$552,000.**

Answer: D

NEW QUESTION # 124

What method would be the best way to determine the most likely as-built critical path of a project that is underway, and the schedule of which has been partially progressed?

- A. Use the progressed portion of the critical path of all the updates previous to the current update.
- B. Use the progressed portion of the critical path of the baseline schedule.
- **C. Use the forward-looking critical path of the most current updates.**
- D. Interview the project personnel for their perceptions and opinions because the schedule is usually inadequate.

Answer: C

Explanation:

Understanding As-Built Critical Path Analysis:

* Determining the as-built critical path of a project involves identifying the sequence of activities that actually dictated the completion

of the project. This is especially important in projects that are underway, as schedules often deviate from the original baseline due to progress updates and unplanned changes.

* Explanation of Each Option:

* A. Use the progressed portion of the critical path of all the updates previous to the current update:

This is correct. To determine the most likely as-built critical path, analyzing the progressed portion of the critical path from all previous updates provides the most accurate representation of the project's actual execution. By reviewing the progression over time, you can piece together the actual sequence of critical activities.

* B. Use the progressed portion of the critical path of the baseline schedule: This is incorrect. The baseline schedule reflects the original plan, which may no longer be accurate due to progress deviations, delays, or changes in logic. Using the baseline alone does not account for the dynamic nature of the project.

* C. Interview the project personnel for their perceptions and opinions because the schedule is usually inadequate: This is incorrect. While project personnel may provide insights, relying solely on subjective opinions introduces biases and inconsistencies. A properly maintained and updated schedule is far more reliable for determining the critical path.

* D. Use the forward-looking critical path of the most current updates: This is incorrect. The forward-looking critical path only reflects what is expected to happen from the current point onward. It does not provide an accurate representation of the as-built critical path up to the current point.

Study Guide References:

* The PSP Study Guide emphasizes the importance of analyzing progress updates to trace the actual sequence of critical activities. Section 2.3.2 (Tracking Schedule Progress) discusses the role of historical updates in understanding project performance.

* The guide also highlights that a proper as-built analysis requires a review of all updates to identify shifts in the critical path over time.

NEW QUESTION # 125

Those who are delegated authority in the direct chain of command to accomplish specific organizational objectives are known as:

- A. Line executives
- B. Stockholders
- C. Management
- D. Authorized directives

Answer: A

NEW QUESTION # 126

Why does activity 11001 not show successor activities?

□

- A. The early finish and late finish are circular
- B. The scheduler forgot to add the successor activities
- C. It is the final activity for the required work for the project
- D. It is the penultimate work required for the project

Answer: C

NEW QUESTION # 127
