SAP Certified Specialist - Project Manager - SAP Activate for Agile Implementation Management 認定 E_ACTAI_2403 試験問題 (Q35-Q40):

質問 # 35

Where do you activate SAP Best Practices from Cloud ALM to be used during the fit-to-standard workshops for SAP S/4HANA Cloud Public Edition?

- A. Production System
- B. Quality System
- C. Development System
- D. Starter System

正解: D

解説:

In the context of SAP S/4HANA Cloud Public Edition, SAP Best Practices are activated from the Starter System during the fit-to-standard workshops. The Starter System in SAP S/4HANA serves as a preliminary, fully configured system that allows project teams to explore and understand SAP functionalities, configure business processes, and make necessary adjustments before these are moved to the production environment. It is crucial during the initial stages of implementation to help in aligning the standard SAP solutions with the organization's business processes. The activation of these practices in the Starter System ensures that the project team can test and validate processes without affecting the live business operations that occur in the production system, or ongoing development in the development system. 質問 # 36

When do you perform Quality Gate (Q-Gate) during a project? Note: There are 2 correct answers to this question.

- A. At the end of Discover phase
- B. At the end of Run phase
- C. At the end of Realize phase
- D. At the end of Prepare phase

正解: C、D

解説:

Quality Gates (Q-Gates) are performed during a project at specific phases to ensure quality and readiness for the next phase:

- * A. At the end of Realize phase: This is a critical checkpoint to assess if the project deliverables are ready for deployment and meet the set expectations.
- * B. At the end of Prepare phase: Marks the completion of initial project setup and planning, ensuring all elements are in place for the project's execution phase. Options C (At the end of Discover phase) and D (At the end of Run phase) are not typically associated with Quality Gates in the SAP Activate methodology. References:

質問 # 37

Which tools can SAP Cloud ALM leverage for project tasks? Note: There are 2 correct answers to this question.

- A. SAP Signavio Process Navigator
- B. SAP Solution Manager
- C. SAP Central Business Configuration
- D. SAP Readiness Check

正解: C、D

解説:

SAP Cloud ALM leverages several tools to facilitate the management of project tasks effectively:

- * A. SAP Readiness Check: This tool helps organizations assess their readiness for migration to SAP S/4HANA by analyzing their existing environment and providing insights on what needs to be addressed before, during, and after the migration process.
 - * B. SAP Central Business Configuration: This is a new capability that supports the configuration needs of SAP's Intelligent Enterprise Suite. It enables a guided configuration process that simplifies the setup of SAP solutions across the business landscape, ensuring a coherent and aligned configuration. Option C (SAP Solution Manager) is traditionally used for application lifecycle management in existing SAP landscapes but is distinct from SAP Cloud ALM, which is designed for cloud solutions and does not generally leverage Solution Manager directly. Option D (SAP Signavio Process Navigator) aids in process management and optimization but is not primarily a tool leveraged directly by SAP Cloud ALM for project task management.

質問 # 38

Which of the following belong to the Application Design and Configuration workstream in the Explore phase?

Note: There are 2 correct answers to this question.

- A. Change Impact Analysis
- B. Configuration definition
- C. Fit-to-standard workshop
- D. Integration prerequisites confirmation

正解: B、C

解説:

In the Explore phase, within the Application Design and Configuration workstream, the following activities are performed:

- * A. Configuration definition: This involves defining how the SAP system will be configured to meet the business requirements. It includes setting parameters and options within the system to tailor it to the business's needs.
 - * D. Fit-to-standard workshop: These workshops are a key component of the Explore phase, where business processes are matched with the standard SAP functionality to identify any required configurations or gaps.
- Both activities are critical for ensuring that the system is designed and configured accurately to support the business processes effectively.
