中国でこのような諺があります。天がその人に大任を降さんとする時、必ず先ず困窮の中においてその心志を苦しめ、その筋骨を勞し、その皮膚を餓やし、その身を貧困へと貶めるのである。この話は現在でも真です。しかし、成功には方法がありますよ。正確な選択をしたら、そんなに苦勞しなくても成功することもできます。Fast2testのSAPのC_BCBTP_2502試験トレーニング資料はIT職員を対象とした特別に作成されたものですから、IT職員としてのあなたが首尾よく試験に合格することを助けます。もしあなたは試験に準備するために知識を詰め込み勉強していれば、間違い方法を選びましたよ。こうやってすれば、時間とエネルギーを無駄にするだけでなく、失敗になるかもしれません。でも、今方法を変えるチャンスがあります。早くFast2testのSAPのC_BCBTP_2502試験トレーニング資料を買いに行きましょう。その資料を手に入れたら、異なる人生を取ることができます。運命は自分の手にあることを忘れないでください。

SAP C_BCBTP_2502 認定試験の出題範囲:

トピック	出題範囲

トピック 1	<ul style="list-style-type: none"> • Illustrating CIO Transformation Delivered by SAP Business Suite: This section of the exam evaluates the skills of IT Transformation Managers and covers the role of SAP Business Suite in delivering value for CIO-led digital transformation. It highlights the significance of SAP's portfolio in enterprise IT, introduces the capabilities of SAP BTP, and shows how it connects with end-to-end processes and industry-specific use cases. Candidates should also be able to identify the key products within SAP BTP and explain how cross-portfolio components integrate to deliver measurable value.
トピック 2	<ul style="list-style-type: none"> • Discovering SAP Business Technology Platform: This section of the exam measures the skills of SAP Solution Architects and focuses on positioning the SAP Business Technology Platform within the overall SAP Business Suite strategy. It includes understanding the platform's role in enabling transformation, aligning with enterprise strategy, and supporting digital innovation. Candidates are expected to recognize the relevance of SAP BTP in modern business processes and how it integrates with other SAP offerings.

試験の準備方法-100%合格率のC_BCBTP_2502出題内容試験-検証するC_BCBTP_2502実際試験

今日、社会での競争はより激しく、専門知識がなければ競争で有利な地位を占めることができず、除かれることもあります。テストC_BCBTP_2502認定に合格すると、一部の分野で有能になり、労働市場で競争上の優位性を獲得できます。C_BCBTP_2502学習教材を購入すると、C_BCBTP_2502テストにスムーズに合格します。当社SAPの製品は多くの利点を高め、テストの準備をするのに最適です。C_BCBTP_2502学習準備は、一流の専門家チームによってコンパイルされ、実際の試験と密接にリンクしています。

SAP Certified Associate - Positioning SAP Business Technology Platform as part of SAP Business Suite 認定 C_BCBTP_2502 試験問題 (Q17-Q22):

質問 # 17

Which market trend is driving the adoption of SAP BTP?

- A. Reduced emphasis on business automation.
- B. Decreasing focus on API-based integrations.
- C. Declining use of cloud-based solutions.
- **D. Increased need for data-driven decision-making.**

正解: D

解説:

One of the most powerful market trends driving the global adoption of SAP BTP is the increased need for data-driven decision-making. In today's hyper-competitive landscape, "gut feeling" is no longer a viable strategy for business leaders. Organizations are sitting on mountains of data, but the challenge lies in extracting actionable insights from it. SAP BTP addresses this trend by providing a unified environment where data management, analytics, and AI converge. This allows businesses to transform raw data into a strategic asset, enabling more accurate forecasting, optimized operations, and enhanced customer experiences.

This trend is further accelerated by the "Digital Transformation" movement, where companies are moving away from monolithic, isolated systems toward agile, interconnected platforms. Businesses now demand real-time visibility across their entire value chain—from procurement to sales. SAP BTP's ability to integrate disparate systems and provide a "single source of truth" through SAP HANA Cloud and SAP Analytics Cloud directly addresses this market demand. As companies strive to become "Intelligent Enterprises," they rely on BTP to provide the technical infrastructure that supports continuous innovation, rapid automation, and the ability to pivot their business models based on data-driven evidence rather than historical assumptions.

質問 # 18

Which of the following capabilities does SAP AI Core provide?

- A. Strictly rule-based automation without AI capabilities.
- **B. Predictive analytics and machine learning model deployment.**

- C. Transactional data management for ERP systems.
- D. Hardware infrastructure for AI development.

正解: B

解説:

SAP AI Core is a vital service within the "Intelligent Technologies" pillar of SAP BTP, designed to handle the heavy lifting of artificial intelligence at an enterprise scale. Its primary capability is providing a standardized, highly scalable runtime for predictive analytics and machine learning (ML) model deployment. In the modern SAP Business Suite, "intelligence" is no longer just a buzzword; it is a functional requirement. SAP AI Core allows businesses to take raw data from their systems, train sophisticated models, and then deploy those models into production environments where they can serve real-time predictions.

This service is unique because it supports the full lifecycle of an AI model, including execution and monitoring. It allows developers to integrate AI features into their applications while maintaining "AI Ethics" and transparency, which are critical for enterprise compliance. Unlike standard transactional databases that focus on record-keeping, SAP AI Core focuses on "inference"-using data to generate new insights and automate complex decisions. By positioning SAP AI Core as the engine for intelligence, SAP BTP ensures that organizations can move beyond basic automation toward advanced, self-learning processes that improve over time, such as predictive maintenance in manufacturing or intelligent lead scoring in sales.

質問 # 19

How does SAP BTP enable businesses to extend their existing SAP applications?

- A. By providing low-code/no-code development tools.
- B. By restricting integration with external systems.
- C. By requiring all applications to be developed from scratch.
- D. By limiting customization to SAP standard functionalities.

正解: A

解説:

A fundamental principle of modernizing the SAP ecosystem is the concept of a "Clean Core." SAP BTP enables this by allowing organizations to build extensions "side-by-side" rather than within the core ERP code (classic "in-app" customization). By providing low-code/no-code development tools, such as SAP Build, the platform empowers both professional developers and "citizen developers" (business users with limited coding knowledge) to create applications that add specific business value without compromising the stability or upgradeability of the core SAP S/4HANA system.

These tools allow for the rapid creation of user interfaces using SAP Fiori elements and the automation of manual tasks through visual drag-and-drop interfaces. This approach is a stark contrast to traditional development, which often required extensive, custom ABAP coding that made system upgrades difficult and expensive. By positioning BTP as the extension layer, SAP ensures that businesses can remain agile and respond quickly to market changes. This flexibility is supported by a robust set of services that facilitate secure communication between the extension and the core system via APIs. Consequently, businesses can innovate at the edge while maintaining a stable, standardized digital core, which is the hallmark of the SAP Business Suite's evolution into the cloud era.

質問 # 20

How does SAP HANA Cloud improve business data processing?

- A. Eliminates cloud computing in favor of on-premise storage.
- B. Restricts data access to SAP applications only.
- C. Enables in-memory computing for real-time analytics.
- D. Requires batch processing for data retrieval.

正解: C

解説:

The primary innovation of SAP HANA Cloud is its in-memory computing engine, which stores data in RAM rather than on traditional spinning disks. This architecture allows for the processing of vast amounts of data at speeds that are orders of magnitude faster than legacy databases. For the SAP Business Suite, this means that the boundary between "doing the work" (transactions) and "analyzing the work" (analytics) disappears. Users can run complex, multi-dimensional analytical queries on live, "hot" data without the need for time-consuming data extracts or batch processing.

By enabling real-time analytics, SAP HANA Cloud empowers business leaders to make decisions based on what is happening now,

rather than what happened last week. It also introduces "data tiering," which allows organizations to manage costs by keeping frequently accessed data in-memory while moving less critical data to cheaper "warm" or "cold" storage (Data Lake), all while keeping it accessible through a single interface.

This flexibility is essential for modern enterprises that deal with "Big Data" but require the agility of the cloud. Positioning HANA Cloud as the data foundation of BTP ensures that every application built on the platform is inherently fast, scalable, and capable of delivering instant insights.

質問 # 21

Which SAP BTP service allows businesses to create low-code/no-code applications?

- A. SAP Business Network
- **B. SAP Build Apps**
- C. SAP BusinessObjects
- D. SAP Concur

正解: B

解説:

To accelerate digital transformation, SAP has introduced the SAP Build portfolio on BTP, which is specifically designed to democratize application development. SAP Build Apps (formerly AppGyver) is the primary service within this portfolio that enables the creation of enterprise-grade applications using a no-code visual environment. This service allows users to build sophisticated user interfaces for mobile and web applications by simply dragging and dropping components. It also includes a visual logic editor, which eliminates the need to write traditional code for defining how the application behaves.

The strategic importance of SAP Build Apps within the SAP Business Technology Platform is its ability to reduce the backlog of IT departments. By allowing business experts—who understand the process but may not know how to code—to build their own solutions, SAP ensures that innovation can happen at the "front lines" of the business. These apps can easily be connected to SAP S/4HANA or other backend systems through secure APIs, ensuring that data integrity is maintained. This contrasts with tools like SAP BusinessObjects, which is focused on business intelligence and reporting, or SAP Concur, which is a specific SaaS application for travel and expense management. SAP Build Apps is a foundational service for positioning BTP as an agile platform for rapid extension and innovation.

質問 # 22

.....

当社は、すべての受験者が試験に簡単に合格できるようにC_BCBTP_2502最新の練習教材を開発することに専念しており、10年以上の開発の後に大きな成果を上げています。認定資格は非常に価値が高いため、適切なC_BCBTP_2502試験ガイドは、バナーを通過するホットナイフのようなC_BCBTP_2502試験に合格するための強力な推進力となります。そして、C_BCBTP_2502試験ガイドの質の高いC_BCBTP_2502学習ガイドは、98%以上の高い合格率によって証明されているため、C_BCBTP_2502試験問題はまさにあなたにとって正しいものです。
