CCFA-200b Quiz Prep Makes CCFA-200b Exam Easy - ITexamReview

In a word, you can try our free CCFA-200b study guide demo before purchasing, CrowdStrike Certified Falcon Administrator - 2024 Version Pdf After the researches of many years, we found only the true subject of past-year exam was authoritative and had

time-validity, For your benefit, ITexamReview is putting forth you to attempt the free demo and CrowdStrike CCFA-200b Exam Dumps the best quality highlights of the item, because nobody gives this facility only the ITexamReview CCFA-200b Free Learning provide this facility. The example on the right was a simple widget designed Reliable CCFA-200b Pdf to track points in a rewards program, The pearsonvue website is not affiliated with us, Although computers are great at gathering, manipulating, and calculating raw data, humans prefer their data presented in an orderly fashion.

CrowdStrike Certified Falcon Administrator - 2024 Version Sample Questions (Q66-Q71):

NEW QUESTION # 66

What prevention policy setting prevents sensor-related files, folders, and registry objects from being renamed or deleted?

- A. Host Modification Protection
- B. System Configuration Protection
- C. Sensor Modification Protection
- **D. Sensor Tampering Protection**

Answer: D

Explanation:

Sensor Tampering Protection is the prevention policy setting that blocks attempts to interfere with core Falcon sensor components. The official prevention policy guidance states that when this setting is enabled, it "blocks attempts to tamper with the sensor" and protects "sensor-related files, folders and registry objects from renaming or deletion." If disabled, Falcon may still create detections for tampering attempts, but it will not block the activity. This distinction is important because attackers commonly attempt to disable or corrupt endpoint security tooling before establishing persistence, evading detection, or executing payloads. Host Modification Protection, System Configuration Protection, and Sensor Modification Protection are not the named Falcon prevention setting for this control. The correct CCFA topic alignment is Policy Application, specifically Prevention Policy Settings > Sensor Capabilities > Sensor Tampering Protection.

NEW QUESTION # 67

What impact does disabling detections on a host have on an API?

- **A. DetectionSummaryEvent stops sending to the Streaming API for that host**
- B. Endpoints cannot have their detections disabled individually
- C. Endpoints with detections disabled will not alert on anything for 24 hours (by default) or longer if that setting is changed
- D. Endpoints with detections disabled will not alert on anything until detections are enabled again

Answer: A

Explanation:

Disabling detections on a host will stop the DetectionSummaryEvent from sending to the Streaming API for that host. This means that the host will not send any detection events to the Streaming API, which is used to stream data from the Falcon Cloud to external applications or systems. The other options are either incorrect or not related to disabling detections on a host.

NEW QUESTION # 68

Where can you find information about all supported operating systems for the Falcon sensor?

- A. Sensor Downloads
- B. News
- **C. Documentation**
- D. Sensor Release Notes

Answer: C

NEW QUESTION # 69

You have 100 hashes that have been prohibited by management and need to be blocked within your organization. Using Falcon, what is the best way to accomplish this?

- A. Navigate to Configure > IOC Management. Inside this dashboard, add a custom Prevention Policy. Add the list of hashes. Set the action to Block. Verify the policy includes Custom Execution Blocking.
- B. Navigate to Configure > IOC Management. Inside this dashboard, add a custom IOAdd the list of hashes. Set the action to Block. Verify the prevention policy includes Custom Blocking under Execution Blocking.
- C. Navigate to Configure > Prevention policies. Inside this dashboard, add an IOC Policy. Add the list of hashes as CSV file. Set the action to "Block." Verify the option for Custom Execution Blocking is active.
- D. Navigate to Configure > Prevention policies. Inside this dashboard, add an IOC Policy. Add the list of hashes as a CSV file. Set the action to "Block and Alert." Verify the option for Custom Blocking inside Execution Blocking is active.

Answer: B

NEW QUESTION # 70

How can you find a list of hosts that have not communicated with the CrowdStrike Cloud in the last 30 days?

- A. Under Host setup and management, choose the Host Management page. Set the group filter to "Inactive Sensors"
- B. Under Dashboards and reports, choose the Sensor Report. Set the "Last Seen" dropdown to 30 days and reference the Inactive Sensors widget
- C. Under Host setup and management, choose the Disabled Sensors Report. Change the time range to 30 days
- D. Under Host setup and management > Managed endpoints > Inactive Sensors. Change the time range to 30 days

Answer: D

Explanation:

The administrator can find a list of hosts that have not communicated with the CrowdStrike Cloud in the last 30 days by going to Host setup and management > Managed endpoints > Inactive Sensors. Then, change the time range to 30 days. This will show the host name, last seen date, sensor version and group name for each inactive host. The other options are either incorrect or not available.

NEW QUESTION # 71

.....

Obtaining a certificate has many benefits, you can strengthen your competitive force in the job market, enter a better company, and double your wage etc. CCFA-200b exam bootcamp of us will help you get the certificate successfully. With experienced experts to edit and verify, CCFA-200b exam dumps are high quality and accuracy. You can pass the exam just one time. In addition, CCFA-200b Exam Bootcamp contain both questions and answers, and you can check the answer easily. Free update for 365 days is available. Our system will send the latest version of CCFA-200b exam dumps to you automatically.
