- C. Create and activate a case type.
- D. Create an email channel for the object type Cases and enter the default case type to be used.

**Answer: C,D**

Explanation:

To convert incoming emails into cases in SAP Service Cloud V2, administrators must create an email channel for the object type Cases and enter the default case type to be used, which defines how emails are mapped to cases. Additionally, creating and activating a case type is required to ensure the system recognizes the case structure for email conversions. According to SAP documentation, "Setting up an email channel for Cases and activating a case type are mandatory steps for email-to-case functionality." Enabling the email channel within CTI configuration (A) is incorrect, as email channels are separate from CTI.
