Cisco Securing Networks with Cisco Firepower Sample Questions (Q73-Q78):

NEW QUESTION # 73
An engineer is configuring a cisco FTD appliance in IPS-only mode and needs to utilize fail-to- wire interfaces. Which interface mode should be used to meet these requirements?

- A. inline set
- B. transparent
- C. passive
- D. routed

Answer: A

Explanation:
https://www.cisco.com/c/en/us/td/docs/security/firepower/630/configuration/guide/fpmc-config- guide-v63/inline_sets_and_passive_interfaces_for_firepower_threat_defense.html

NEW QUESTION # 74
What is the result of specifying of QoS rule that has a rate limit that is greater than the maximum throughput of an interface?

- A. Matching traffic is not rate limited.
- B. The rate-limiting rule is disabled.
- C. The system repeatedly generates warnings.
- D. The system rate-limits all traffic.

Answer: A

Explanation:
Reference:
https://www.cisco.com/c/en/us/td/docs/security/firepower/620/configuration/guide/fpmc-config- guide-v62/quality_of_service_qos.pdf

NEW QUESTION # 75
Refer to the exhibit.

An engineer generates troubleshooting files in Cisco Secure Firewall Management Center (FMC). A successfully completed task Is removed before the files are downloaded. Which two actions must be taken to determine the filename and obtain the generated troubleshooting files without regenerating them? (Choose two.)

- A. Connect to CU on the FTD67 and FTD66 devices and copy the tiles from flash to the PIP server.
- B. Click System Monitoring, men Audit to determine the correct filename from the line containing the Generate Troubleshooting Files string.
- C. Go to the same screen as shown in the exhibit, click Advanced Troubleshooting, enter the rile name, and then start the download
- D. Use an FTP client Hi expert mode on Secure FMC lo upload the files to the FTP server.
- E. Go to expert mode on Secure FMC. list the contents of/Var/common, and determine the correct filename from the output

Answer: B,E

Explanation:
If a task to generate troubleshooting files in Cisco Secure Firewall Management Center (FMC) is completed successfully but removed before the files are downloaded, the following steps can be taken to determine the filename and obtain the generated troubleshooting files without regenerating them:
* Go to expert mode on Secure FMC:
* Access expert mode on the FMC via SSH or the console.
* List the contents of the directory/var/commonto locate the generated troubleshooting files. Use the commandls /var/common.
* Use the System Monitoring Audit logs:
* In FMC, navigate toSystem > Monitoring > Audit.
* Find the line containing the "Generate Troubleshooting Files" string to determine the correct filename.
These actions help identify and retrieve the generated troubleshooting files without the need to regenerate them, saving time and resources.

NEW QUESTION # 76

An organization wants to secure traffic from their branch office to the headquarter building using Cisco Firepower devices, They want to ensure that their Cisco Firepower devices are not wasting resources on inspecting the VPN traffic. What must be done to meet these requirements?

- A. Tune the intrusion policies in order to allow the VPN traffic through without inspection
- B. Configure the Cisco Firepower devices to bypass the access control policies for VPN traffic.
- C. Configure the Cisco Firepower devices to ignore the VPN traffic using prefilter policies
- D. Enable a flexconfig policy to re-classify VPN traffic so that it no longer appears as interesting traffic

Answer: B

Explanation:
When you configure the Cisco Firepower devices to bypass the access control policies for VPN traffic, the devices will not inspect the VPN traffic and thus will not waste resources on it. This is the best option to ensure that the VPN traffic is not wasting resources on the Cisco Firepower devices.
