

HPE0-J68 Valid Dumps Ppt, HPE0-J68 Exam Consultant

Solution	Use Case
Primera	Smaller site traditional deployments
MSA	Complete solution for virtualized environments
Nimble	Enterprise class storage for SMB
Nimble dHCI	Enterprise class storage with Tier-0 features
SimpliVity	hyperconverged control with independent compute and storage scalability

The advent of our HP HPE0-J68 study guide with three versions has helped more than 98 percent of exam candidates get the certificate successfully. Rather than insulating from the requirements of the HPE Storage Solutions HPE0-J68 Real Exam, our HPE0-J68 practice materials closely co-related with it.

HP HPE0-J68 is an industry-recognized certification exam offered by Hewlett Packard Enterprise. HPE0-J68 exam is designed specifically for professionals who aspire to become HPE storage solutions certified professionals. HPE Storage Solutions certification validates the knowledge and expertise that candidates need to design, install, configure, and manage secure HPE storage solutions in a business environment.

HP HPE0-J68 Exam Consultant, HPE0-J68 Download

Many times getting a right method is important and more efficient than spending too much time and money in vain. Our ActualPDF team devote themselves to studying the best methods to help you pass HPE0-J68 exam certification. From the time when you decide whether to purchase our HPE0-J68 exam software or not, we have provided you with comprehensive guarantees, including free demo download before buying, payment guarantee in purchase process, one-year free update service after you purchased HPE0-J68 Exam software, and full refund guarantee of dump cost if you fail HPE0-J68 exam certification, which are all our promises to ensure customer interests.

HP HPE0-J68 exam is intended for individuals who have a solid understanding of storage technologies and solutions. HPE0-J68 exam is designed to assess the candidate's ability to analyze and solve complex storage problems, as well as their knowledge of HPE storage solutions. HPE0-J68 Exam consists of 60 multiple-choice questions, and the candidate has 90 minutes to complete it. The passing score for the exam is 65%.

HPE Storage Solutions Sample Questions (Q33-Q38):

NEW QUESTION # 33

A customer has a SAN infrastructure with the HPE C-class blade Enclosure ,and a mix of proliant G7,gen8 and Ge9 server .They require a new storage platform ... How can you confirm the storage array will be supported in the existing environment?

- A. Design an array with older version of the firmware to ensure compatibility
- B. Document existing server and SAN information ,and consult SPOCK to ensure firmware compatibility
- C. Check recommended firmware levels in the HP SAN design reference guide to ensure firmware compatibility
- D. Design and array with the latest firmware ,and recommend that the customer engage HPE point Next to upgrade the existing hardware

Answer: B

Explanation:

To confirm that a new storage array will be supported in an existing environment that includes HPE C-class Blade Enclosures and a

mix of ProLiant G7, Gen8, and Gen9 servers, the correct approach is to document the existing server and SAN information and consult the HPE SPOCK (Single Point of Connectivity Knowledge) tool. SPOCK is an HPE resource that provides detailed compatibility information for various HPE products, including firmware and software compatibility matrices. This ensures that the new storage array will work seamlessly with the existing infrastructure.

NEW QUESTION # 34

Which SAN topology will result in E Port type at the SAN switch?

- A. Routed fabric
- B. Point-to-point
- C. Arbitrated loop
- **D. Meshed fabric**

Answer: D

Explanation:

In a meshed fabric SAN topology, the E Port (Expansion Port) type is used on SAN switches. E Ports connect to other switches within the fabric, allowing for inter-switch links (ISLs) that enable communication between multiple switches in the SAN. This topology is essential for creating a scalable and resilient storage network, as it allows multiple paths for data to travel between different nodes in the SAN.

NEW QUESTION # 35

What information should be collected for creating a proper host entry within Data Ops Manager when using an HPE Alletra MP solution?

- A. HBA vendor
- **B. Port World Wide Name**
- C. LUN ID
- D. Data protection policy

Answer: B

Explanation:

When creating a proper host entry within Data Ops Manager while using an HPE Alletra MP solution, it is crucial to collect the Port World Wide Name (WWN). The WWN is a unique identifier for each port on a host's HBA (Host Bus Adapter) and is essential for configuring storage connectivity, zoning, and mapping between the storage system and the host. Accurate WWN information ensures correct and secure access to the storage resources.

NEW QUESTION # 36

What is used to migrate data between nodes in an HPE StoreVirtual VSA environment?

- **A. Network RAID**
- B. SmartClone
- C. Remote Copy
- D. Peer Motion

Answer: A

Explanation:

In an HPE StoreVirtual VSA environment, Network RAID is used to manage data across multiple nodes. Network RAID mirrors

or stripes data across different nodes in the cluster, providing resilience and high availability. During data migration or when rebalancing the load between nodes, Network RAID ensures that the data is protected and that the migration process does not disrupt ongoing operations.

This technology allows for automatic data redistribution across nodes in the event of a failure or during scaling operations, ensuring consistent performance and availability.

HPE Network RAID

NEW QUESTION # 37

Refer to the exhibit.

You are configuring a new HPE array and verifying properties of a set of volumes. Which RAID level is used on the VMwareDatastores-GF volume?

- A. RAID 6
- B. Triple Parity+
- C. RAID 0
- **D. RAID 5**

Answer: D
