問題 #19

What are the phases of the PDCA cycle?

- A. Plan, Validate, Verify, Act
- B. Propose, Do, Validate, Act
- **C. Plan, Do, Check, Act**
- D. Plan, Do, Verify, Assure

答案: C

解題說明:

The PDCA cycle stands for Plan, Do, Check, Act. It is a management model commonly associated with management systems, including the implementation and continual improvement of an ISMS. In the context of ISO/IEC 27001:2022, this logic supports planning the ISMS, implementing and operating it, monitoring and reviewing performance, and taking actions for continual improvement. Therefore, option B is correct.

問題 #20

Identify the missing words in the following sentence.

The organization shall establish, _____, maintain, and continually improve an information security management system.

- A. administer
- B. monitor
- **C. implement**
- D. exploit

答案: C

解題說明:

Clause 4.4 of ISO/IEC 27001:2022 requires the organization to establish, implement, maintain, and continually improve an information security management system. This is one of the core statements of the standard and defines the lifecycle expectation for the ISMS. Therefore, the missing word is implement, making option A correct.

問題 #21

Annex A of ISO/IEC 27001:2022 consists of:

- A. Guidelines for risk management
- B. Elements necessary for a good design and implementation of the ISMS
- **C. A comprehensive list of controls grouped by themes**
- D. None of the above

答案: C

解題說明:

Annex A of ISO/IEC 27001:2022 contains the reference set of information security controls used to support risk treatment decisions. In the 2022 edition, these controls are organized into four themes: organizational, people, physical, and technological controls. Annex A is not a set of ISMS implementation steps and it is not a risk management guideline. Its role is to provide a structured set of control objectives and controls that may be selected as part of risk treatment. Therefore, option B is the correct

answer.

ISO/IEC 27001:2022 requires the organization to establish and maintain information security risk criteria, identify information security risks, and identify risk owners as part of the risk assessment process. - A. The status of actions from previous management reviews
- B. Changes in external and internal issues that are relevant to the ISMS
