Most effective these exam dumps are routinely updated with usually precise and most current material by profoundly talented authorities, that have obtained authentication in their absolute very first attempt. Whenever you get your hands around the most current exam dumps preparation supply, then, at that point, you don't need to pressure over alluding to distinctive sources. These correct exam dumps pdf cover just about every single prospectus of this exam. You must merely concentrate on these exam questions cautiously and comprehend them well.

Using the assistance with the exam dumps you can quickly release your stress more than your exam readiness due to the deficiency. Prepare on time and get genuine exam dumps for efficient preparation. Get the additional weight due to the fact of it, you can get the itemized this exam questions connected along with your affirmation. These precise exams supply you using a belief of how to plan for the exam successfully. The genuine exams intended for operating on the expert abilities of the contender for the exam certification dumps who want to be able to cope with just about every one of the concerns impeccably.

Get prepared by means of the updated exam, you find out using the most current innovations, and any time you program by the most recent exam dumps 2022, you comprehend its significance and also the advantages in the executions. The part of the veritable exam dumps is coordinated appropriately by the endeavors of our topic matter experts. Carve out opportunities to perform it appropriately and afterward, you receive the greatest outcomes in your exam conclusion. Make your preparation in advance by taking the exam dumps.

Choose the major excellent exam dumps for the preparation of the exam which are checked by the exam dumps. The greatest exam questions and answers are finished by the precise exam dumps that happen to be in your schedule. Get ready with a compelling exam dumps pdf then you definitely will truly like to answer 90% from the exam certification dumps ideal. The fundamentals of the certified exam are investigated by professionals, so our refreshed exam questions will construct your capacity of inventiveness.

EAEP2201 Test Questions & Reliable EAEP2201 Test Materials

Our PDFTorrent's EAEP2201 test training materials can test your knowledge, when you prepare for EAEP2201 test; and can also evaluate your performance at the appointed time. Our EAEP2201 exam training materials is the result of PDFTorrent's experienced IT experts with constant exploration, practice and research for many years. Its authority is undeniable. If you have any concerns, you can first try EAEP2201 PDF VCE free demo and answers, and then make a decision whether to choose our EAEP2201 dumps or

not.

The EAEP2201 certification exam is a challenging exam that requires extensive preparation and experience in GIS administration. Candidates who pass EAEP2201 exam can demonstrate their expertise in managing and administering enterprise GIS systems, which can lead to better job opportunities and higher salaries in the GIS industry.

The EAEP2201 exam is designed for GIS professionals who are responsible for managing Esri enterprise GIS systems. This includes tasks such as designing, deploying, configuring, and maintaining enterprise GIS systems, as well as providing technical support to users. EAEP2201 Exam covers a range of topics, including server architecture, security, performance tuning, and data management.

Esri Enterprise Administration Professional 2201 Sample Questions (Q57-Q62):

NEW QUESTION # 57

A GIS administrator is analyzing the usage statistics of ArcGIS Enterprise. The administrator needs to pull tabular statistics on various groups and users about the type of content that they produce and consume.

Which action should the administrator perform?

- A. Open ArcGIS Server statistics to create a report for commonly used items.
- **B. Run usage reports in Portal for ArcGIS to determine the effect on the organization.**
- C. Use ArcGIS Monitor to capture desired information over a period of time in a report.

Answer: B

Explanation:

Portal for ArcGIS provides built-in usage reports that allow administrators to monitor how members are using, sharing, and contributing resources. These reports offer insights into content creation, usage patterns, and group activities. Administrators can generate and export these reports in tabular formats for further analysis.

ArcGIS Server statistics focus on service-level metrics and do not provide detailed user or group content statistics. ArcGIS Monitor captures system performance metrics but is not designed for detailed content usage analysis by users or groups.

Reference Source: ArcGIS Enterprise documentation on usage reports in Portal for ArcGIS.

NEW QUESTION # 58

A GIS administrator publishes a feature service that references user-managed data. The administrator wants users to add new features. Users should not make changes to attributes of existing features or delete features.

Which feature service operations should be set?

- A. Extract and create
- **B. Create and query**
- C. Update and sync

Answer: B

Explanation:

To allow users to add new features without the ability to modify or delete existing ones, the feature service should have the "Create" and "Query" operations enabled. The "Create" operation permits users to add new features, while the "Query" operation allows them to view existing features. By not enabling the "Update" and

"Delete" operations, users are restricted from making changes to or removing existing features. This configuration is ideal for workflows where data integrity is crucial, and only the addition of new data is permitted.

Enabling "Update and sync" (Option A) would allow users to modify existing features and synchronize changes, which is not desired in this scenario. "Extract and create" (Option C) is not a standard combination of operations for controlling editing permissions in feature services.

Reference Source: ArcGIS Server documentation on editor permissions for feature services

NEW QUESTION # 59

A GIS analyst is running raster analysis in the ArcGIS Enterprise portal Map Viewer. The input data is an image layer, but the output of the raster analysis is a feature layer.

Which ArcGIS Server will host the output feature service?

- A. ArcGIS Hosting Server site
- B. ArcGIS Image Hosting Server site
- C. ArcGIS Raster Analytics Server site

Answer: A

Explanation:

In ArcGIS Enterprise, when performing raster analysis that results in feature data (e.g., vector outputs), the ArcGIS Hosting Server is responsible for hosting the resulting feature services. The Raster Analytics Server processes the raster data, and the output is then stored in the ArcGIS Data Store associated with the Hosting Server, which subsequently serves the feature layer.

The Image Hosting Server is primarily used for hosting large imagery datasets and does not handle feature services. The Raster Analytics Server conducts the analysis but does not host the output services.

Reference Source: ArcGIS Enterprise documentation on configuring and deploying raster analytics

NEW QUESTION # 60

A small organization has an ArcGIS Enterprise deployment where all components are installed on one virtual server hosted on Microsoft Azure. Each deployment component was initially installed manually. The organization wants to upgrade its deployment to the most recent version in the most efficient way.

Which action should the organization perform?

- A. Upgrade the entire deployment with ArcGIS Enterprise Builder
- B. Run the ArcGIS Enterprise Cloud Builder for Microsoft Azure tool
- C. Manually upgrade each ArcGIS Enterprise component

Answer: C

Explanation:

For ArcGIS Enterprise deployments on Microsoft Azure that were initially installed manually, the recommended approach for upgrading is to manually upgrade each component. This involves downloading the latest installers for each component (Portal for ArcGIS, ArcGIS Server, ArcGIS Data Store, etc.) and following the standard upgrade procedures for each. This method ensures that each component is properly updated and configured according to the organization's specific setup.

Using ArcGIS Enterprise Builder (Option B) is intended for new installations and is not suitable for upgrading existing deployments. ArcGIS Enterprise Cloud Builder for Microsoft Azure (Option C) is designed for deployments that were originally created using Cloud Builder; it cannot be used to upgrade deployments that were installed manually.

Reference Source: ArcGIS Enterprise documentation on upgrading manually installed deployments

NEW QUESTION # 61

An organization must publish hosted feature layers and hosted scene layers to its ArcGIS Enterprise portal.

The GIS administrator takes the following steps to enable this functionality:

* Federates a GIS Server with the portal

* Registers an ArcGIS Data Store relational data store with the GIS Server Which action should the administrator perform next?

- A. Set the GIS Server as the hosting server in the ArcGIS Enterprise portal
- B. Publish a hosted feature layer to test the deployment's functionality
- C. Register an ArcGIS Data Store tile cache data store with the GIS Server

Answer: A

Explanation:

After federating a GIS Server with the portal and registering a relational data store, the next step is to designate the GIS Server as the hosting server in the ArcGIS Enterprise portal. This configuration enables the portal to support the publishing of hosted feature layers and hosted scene layers. The hosting server must have both a relational data store and a tile cache data store configured to support these functionalities.
