Our CISA Research materials design three different versions for all customers. These three different versions include PDF version, software version and online version, they can help customers solve any problems in use, meet all their needs. Although the three major versions of our CISA learning materials provide a demo of the same content for all customers, they will meet different unique requirements from a variety of users based on specific functionality. The most important feature of the online version of our CISA Learning Materials are practicality. The online version is open to all electronic devices, which will allow your device to have common browser functionality so that you can open our products. At the same time, our online version of the CISA learning materials can also be implemented offline, which is a big advantage that many of the same educational products are not able to do on the market at present.

NEW QUESTION # 1085
Which of the following should an IS auditor review when evaluating information systems governance for a large organization?

- A. Procedures for regression testing system changes
- B. Approval processes for new system implementations
- C. Approval processes for updating the corporate website
- D. Procedures for adding a new user to the invoice processing system

Answer: B

Explanation:
According to the ISACA CISA Study Manual, evaluating information systems governance for a large organization should include reviewing the approval processes for new system implementations, as well as reviewing the processes for system maintenance, system retirement, and system decommissioning.

NEW QUESTION # 1086
Which of the following should be the PRIMARY consideration when validating a data analytic algorithm that has never been used before?

- A. Increasing speed and efficiency of audit procedures
- B. Decreasing the time for data analytics execution
- C. Enhancing the design of data visualization
- D. Confirming completeness and accuracy

Answer: D

NEW QUESTION # 1087
Which of the following is the BEST indication that an information security awareness program is effective?

- A. A reduction in the success rate of social engineering attacks
- B. A reduction in the cost of maintaining the information security program
- C. A reduction in the number of information security attacks
- D. A reduction in the number of reported information security incidents

Answer: A

Explanation:
The success rate of social engineering attacks directly measures the behavioral changes resulting from an information security awareness program. Employees who are aware and informed are better equipped to identify and thwart such attacks.
* Reduction in Reported Incidents (Option A): This may indicate underreporting rather than program effectiveness.
* Reduction in Cost of Maintaining the Program (Option C): This reflects cost efficiency, not program effectiveness.
* Reduction in Number of Attacks (Option D): The number of attacks is beyond the control of awareness programs and does not reflect their impact.
