The PC version is ideal for computers with windows systems, which can simulate a real test environment. There are also the Value pack of our NCP-MCA study materials for you to purchase.

Nutanix Certified Professional - Multicloud Automation (NCP-MCA 6.10) Sample Questions (Q98-Q103):

NEW QUESTION # 98

When a developer launches the created Blueprint within the Blueprint Editor, the application gets deployed correctly. However, when the Blueprint is launched via Marketplace, it gets a check login error. What is causing this issue?

- A. The credential in the Project Environment is invalid.
- B. Prism Central can't communicate with Active Directory.
- C. User is not authorized to launch Blueprints.
- D. The SSH key within the user's laptop is not valid.

Answer: A

Explanation:

When a Blueprint is launched via Marketplace, it uses the credential that is configured in the Project Environment. If the credential is invalid, the Blueprint deployment will fail with a check login error. To fix this issue, the developer needs to verify and update the credential in the Project Environment and ensure that it has the required permissions to access the target infrastructure and applications. NEW QUESTION # 99

An administrator wants to be alerted when production VMs become idle. The VMs will be determined to be idle when CPU usage is lower than 5% for more than 5 minutes. All affected VMs are categorized as Environment:Production, since they have Flow microsegmentation rules.

What should the administrator do to satisfy this requirement?

- A. Create an alert for all VMs, create a Playbook with this alert as the trigger > reduce 1 CPU > send an email as the action.
- B. Create an alert for VMs in the correct category, create a Playbook with this alert as the trigger > take a snapshot > send an email as the action.
- C. Create an alert for VMs in the correct category, create a Playbook with this alert as the trigger and send an email as the action.
- D. Create an alert for all VMs, create a Playbook with this alert as the trigger and send an email as the action.

Answer: D

NEW QUESTION # 100

An administrator is trying to delete a category, but the option is greyed out. Which two conditions could be causing this issue? (Choose two.)

- A. The category is assigned to powered-on VMs.
- B. The category is system defined.
- C. The category is user defined.
- D. The category is part of a flow policy.

Answer: A,B

NEW QUESTION # 101

What is one prerequisite for deploying Self-Service (formerly Calm)?

- A. The mDNS server is reachable from Prism Central.
- B. A unique Service IP address must be configured in the Prism web console cluster that is running on Prism Central.
- C. A unique Virtual IP address must be configured in the Prism web console cluster that is running on Prism Central.
- D. At least 12 GB of memory is allocated.

Answer: C

Explanation:

One prerequisite for deploying Self-Service (formerly Calm) is that a unique Virtual IP address (VIP) must be configured in the

Prism web console cluster that is running on Prism Central. This VIP is necessary for high availability and to ensure that Self-Service can be accessed reliably.

Reference:

Nutanix Calm documentation on Deployment Requirements.

Nutanix Best Practices for Configuring VIP.

NEW QUESTION # 102

A customer is trying to deploy an application with Calm and receives this error for a Linux VM:

What is the cause of this error within the blueprint?

- A. Connection section has no network adapters selected for the Address box in Connection section.
- B. Connection section has a network adapter selected for the Address box in Connection section.
- C. Connection Type has a protocol selected.
- D. Connection Type has no protocol selected.

Answer: A

Explanation:

In the context of deploying an application with Calm, if a customer receives an error for a Linux VM, it could be due to the absence of network adapters selected for the Address box in the Connection section within the blueprint. This means that there is no specified network connection for the VM, leading to a failure in script execution.
