## Scrum Professional Scrum Master I Sample Questions (Q24-Q29):

### NEW QUESTION # 24

The Daily Scrum is an event that happens every day. What would be three key concerns if the frequency were to be lowered to every two or three days? (Choose three.)

- A. The Scrum Master loses the ability to update the Gantt chart properly.
- **B. Opportunities to inspect and adapt the Sprint Backlog are lost.**
- **C. Impediments are raised and resolved more slowly.**
- D. The Product Owner cannot accurately report progress to the stakeholders.
- E. Too much work is spent updating the Scrum board before the meeting.
- **F. The Sprint plan may become inaccurate.**

**Answer: B,C,F**

Explanation:

According to the Scrum Guide<sup>1</sup>, the Daily Scrum is an event for the Developers of the Scrum Team. The purpose of the Daily Scrum is to inspect progress toward the Sprint Goal and adapt the Sprint Backlog as necessary, adjusting the upcoming planned work. The Daily Scrum optimizes the probability that the Developers will meet the Sprint Goal. Every day, the Developers should understand how they intend to work together as a self-organizing team to accomplish the Sprint Goal and create the anticipated Increment by the end of the Sprint. If the frequency of the Daily Scrum were to be lowered to every two or three days, some key concerns would be:

Opportunities to inspect and adapt the Sprint Backlog are lost, which may result in wasted work or missed dependencies.

Impediments are raised and resolved more slowly, which may hinder the progress and quality of the work.

The Sprint plan may become inaccurate, as changes in requirements, risks, or priorities are not reflected in a timely manner.

The other options are not valid concerns, as they are not aligned with Scrum values and principles.

### NEW QUESTION # 25

When is the Sprint Backlog created?

- A. Prior to the Sprint Planning meeting.
- **B. During the Sprint Planning meeting.**
- C. At the beginning of the project.
- D. During the Sprint.

**Answer: B**

Explanation:

The correct answer is B, because the Sprint Backlog is created during the Sprint Planning meeting. The Scrum Guide states that "the Sprint Backlog is the set of Product Backlog items selected for the Sprint, plus a plan for delivering the product Increment and realizing the Sprint Goal."

### NEW QUESTION # 26

If burndown charts are used to visualize progress, what does a trend line through a release burndown chart indicate? (Choose the best answer.)

- A. When the project will be over if the Product Owner removes work that is equal in effort to any new work that is added.
- **B. When the work remaining will likely be completed if nothing changes on the Product Backlog or the Development Team.**
- C. The evolution of the cost spent on the project.
- D. When all work will be completed to the Scrum Team can be released for other work.

**Answer: B**

### NEW QUESTION # 27

Who should know the most about the progress toward a business objective or a release?

- A. The Project Manager.
- **B. The Product Owner.**
- C. The Development Team.
- D. The Scrum Master.

**Answer: B**

Explanation:

The Product Owner should know the most about the progress toward a business objective or a release, as stated in the Scrum Guide: "The Product Owner is responsible for maximizing the value of the product resulting from work of the Development Team. How this is done may vary widely across organizations, Scrum Teams, and individuals."

### NEW QUESTION # 28

Which three of the following are time-boxed events in Scrum? (Choose three.)

- A. Release Testing.
- **B. Sprint Planning.**
- C. Sprint 0.
- D. Release Retrospective.
- **E. Sprint Retrospective.**
- **F. Daily Scrum.**
- G. Sprint Testing.

**Answer: B,E,F**
