Valid FCSS_CDS_AR-7.6 Exam Tutorial - FCSS_CDS_AR-7.6 Reliable Braindumps Ebook

We offer you free update for 365 days for FCSS_CDS_AR-7.6 study guide materials, so that you can have a better understanding of what you are going to buy. And update version for FCSS_CDS_AR-7.6 exam materials will be sent to your email automatically. In addition, FCSS_CDS_AR-7.6 exam materials are compiled by experienced experts, and they are quite familiar with the exam center, therefore if you choose us, you can get the latest information for the exam. We also have online and offline chat service, if you have any questions about FCSS_CDS_AR-7.6 Study Guide, you can contact with us online or by email, and we will give you reply as quickly as we can.

Fortinet FCSS_CDS_AR-7.6 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Troubleshooting and Connectivity Management: Targeting DevOps Engineers, this section focuses on diagnosing and resolving connectivity problems within AWS and Azure cloud services. It emphasizes troubleshooting issues related to cloud network connectivity, including challenges with Software-Defined Networking (SDN) connectors, to maintain stable and secure cloud operations.
Topic 2	<ul style="list-style-type: none">• Security Solutions Deployment and Integration: This section evaluates Cloud Security Engineers on deploying Fortinet solutions to secure various cloud service models, including Infrastructure as a Service (IaaS) and Container as a Service (CaaS). It includes integrating Fortinet security tools with cloud-native services to ensure robust protection across cloud workloads and environments.

Topic 3	<ul style="list-style-type: none"> • Cloud Infrastructure Monitoring: Cloud Security Engineers are assessed on their ability to monitor cloud networks and workloads using both cloud provider native tools and Fortinet's monitoring solutions. This section includes overseeing AWS and Azure network health and security posture to ensure continuous visibility and threat detection in cloud environments.
Topic 4	<ul style="list-style-type: none"> • Automation and Deployment Tools: This domain focuses on the skills of DevOps Engineers in automating cloud infrastructure and security deployments. It covers using Infrastructure as Code tools such as Terraform and Ansible for cloud provisioning, as well as deploying Fortinet solutions through platform-specific automation frameworks like Azure Bicep and AWS CloudFormation to enable repeatable and scalable security implementations.

Fortinet FCSS - Public Cloud Security 7.6 Architect Sample Questions (Q72-Q77):

NEW QUESTION # 72

Which of the following is a key advantage of using Terraform over other IaC tools?

Response:

- A. It is only used for security automation
- B. It does not require configuration files
- **C. It supports multi-cloud deployments**
- D. It is a cloud-native tool for AWS

Answer: C

NEW QUESTION # 73

The cloud administration team is reviewing an AWS deployment that was done using CloudFormation.

The deployment includes six FortiGate instances that required custom configuration changes after being deployed. The team notices that unwanted traffic is reaching some of the FortiGate instances because the template is missing a security group.

To resolve this issue, the team decides to update the JSON template with the missing security group and then apply the updated template directly, without using a change set.

What is the result of following this approach?

- A. CloudFormation rejects the update and warns that a new full stack is required.
- B. If new FortiGate instances are deployed later, they will include the updated changes.
- **C. Some of the FortiGate instances may be deleted and replaced with new copies.**
- D. The update is applied, and the security group is added to all instances without interruption.

Answer: C

NEW QUESTION # 74

Refer to the exhibit. An administrator deployed an HA active-active load balance sandwich in Microsoft Azure. The setup requires configuration synchronization between devices.

What can you conclude from the configured settings shown in the exhibit? (Choose two.)

- A. FortiGate A and FortiGate B are two independent devices.
- B. FortiGate-VM instances are scaled out automatically according to predefined workload levels.
- **C. It does not synchronize the FortiGate hostname.**
- **D. By default, FortiGate uses FGCP.**

Answer: C,D

Explanation:

By default, FortiGate uses FGCP (FortiGate Clustering Protocol) for synchronization and HA operations, which applies here. In an auto-scale/load-balance sandwich setup, only configuration synchronization for supported objects occurs; system-specific settings like the hostname are not synchronized.

NEW QUESTION # 75

You need to deploy Fortinet solutions using Terraform in an AWS environment. Which command should you use to initialize the required Terraform provider?

Response:

- A. terraform apply
- B. terraform validate
- C. terraform plan
- **D. terraform init**

Answer: D

NEW QUESTION # 76

What is the primary function of Terraform's terraform plan command?

Response:

- A. Destroys existing infrastructure
- **B. Displays the execution plan before making changes**
- C. Creates a new Terraform module
- D. Applies changes to the infrastructure

Answer: B

NEW QUESTION # 77

.....

Our FCSS_CDS_AR-7.6 study materials are designed carefully. We have taken all your worries into consideration. Also, we adopt the useful suggestions about our FCSS_CDS_AR-7.6 study materials from our customers. Now, our study materials are out of supply. Thousands of people will crowd into our website to choose the FCSS_CDS_AR-7.6 study materials. So people are different from the past. Learning has become popular among different age groups. Our FCSS_CDS_AR-7.6 Study Materials truly offer you the most useful knowledge. You can totally trust us. We are trying our best to meet your demands. Why not give our Fortinet study materials a chance? Our products will live up to your expectations.
