Every applicant goal is to find success in the Microsoft SC-100 exam for the very first time. Candidates make an effort to study for the Microsoft SC-100 test and are looking for a platform that ensures they will pass the SC-100 Exam on the first attempt. Candidates have fear of money and time loss because of using invalid Microsoft SC-100 practice test material.

To prepare for the Microsoft SC-100 Certification Exam, you'll need to have a solid understanding of cybersecurity fundamentals and a strong foundation in computer networking and architecture. You can also take advantage of Microsoft's online training resources and study guides to help you prepare for the exam. Microsoft also offers a range of practice tests and simulations to help you familiarize yourself with the exam format and identify areas where you may need to focus your study efforts.

Microsoft SC-100 Exam Practice Test Helps You Ace Your Microsoft Cybersecurity Architect

Passing the Microsoft SC-100 exam is no easy feat. It requires a great deal of preparation, knowledge, and experience. However, you can use our free practice test to help you prepare for it. Our practice exams are written by our own team of subject matter experts and provide a practical approach to learning concepts. In addition, they are updated regularly so that they always reflect the latest version of the exam.

Our **SC-100 Dumps** include questions that are similar in format and content to actual exam questions. This allows you to become familiar with how real exams look like and how they are scored. You can also use this opportunity to assess your performance against different types of questions so that you can focus on improving those areas where you need improvement.

We offer free access to all of our practice exams for one year from the date of purchase or registration. After this period expires, you will need to pay \$9.99 per month in order to continue using them.

SC-100 Latest Exam Dumps & SC-100 Verified Study Torrent & SC-100 Practice Torrent Dumps

Our Microsoft SC-100 exam dumps PDF can help you prepare casually and pass exam easily. If you make the best use of your time and obtain a useful certification you may get a senior position ahead of others. Chance favors the prepared mind. Pass4suresVCE provide the best Microsoft SC-100 Exam Dumps Pdf materials in this field which is helpful for you.

Microsoft SC-100 Exam is a valuable certification for individuals who want to start their career in cybersecurity architecture. It provides a solid foundation for professionals to build upon and helps them gain the skills and knowledge required to design and implement effective cybersecurity solutions.

Microsoft Cybersecurity Architect Sample Questions (Q92-Q97):

NEW QUESTION # 92

Your company has a third-party security information and event management (SIEM) solution that uses Splunk and Microsoft Sentinel. You plan to integrate Microsoft Sentinel with Splunk.

You need to recommend a solution to send security events from Microsoft Sentinel to Splunk. What should you include in the recommendation?

- A. Azure Event Hubs
- B. a Microsoft Sentinel workbook
- C. a Microsoft Sentinel data connector
- D. Azure Data Factor

Answer: C

Explanation:

NEW QUESTION # 93

Your company has an on-premise network in Seattle and an Azure subscription. The on-premises network contains a Remote Desktop server.

The company contracts a third-party development firm from France to develop and deploy resources to the virtual machines hosted in the Azure subscription.

Currently, the firm establishes an RDP connection to the Remote Desktop server. From the Remote Desktop connection, the firm can access the virtual machines hosted in Azure by using custom administrative tools installed on the Remote Desktop server. All the traffic to the Remote Desktop server is captured by a firewall, and the firewall only allows specific connections from France to the server.

You need to recommend a modern security solution based on the Zero Trust model. The solution must minimize latency for developers.

Which three actions should you recommend? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Migrate from the Remote Desktop server to Azure Virtual Desktop.
- B. Configure Azure Active Directory (Azure AD) Conditional Access with multi-factor authentication (MFA) and named locations.
- C. Deploy a Remote Desktop server to an Azure region located in France.
- D. Configure network security groups (NSGs) to allow access from only specific logical groupings of IP address ranges.
- E. Implement Azure Firewall to restrict host pool outbound access.

Answer: A,C,E

NEW QUESTION # 94

You have a Microsoft 365 subscription and an Azure subscription. Microsoft 365 Defender and Microsoft Defender for Cloud are enabled.

The Azure subscription contains 50 virtual machines. Each virtual machine runs different applications on Windows Server 2019. You need to recommend a solution to ensure that only authorized applications can run on the virtual machines. If an unauthorized application attempts to run or be installed, the application must be blocked automatically until an administrator authorizes the application.

Which security control should you recommend?

- A. Azure Active Directory (Azure AD) Conditional Access App Control policies
- **B. application control policies in Microsoft Defender for Endpoint**
- C. OAuth app policies in Microsoft Defender for Cloud Apps
- D. app protection policies in Microsoft Endpoint Manager

Answer: B

Explanation:

<https://docs.microsoft.com/en-us/windows/security/threat-protection/windows-defender-application-control/select-types-of-rules-to-create#windows-defender-application-control-policy-rules>

NEW QUESTION # 95

You are evaluating the security of ClaimsApp.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE; Each correct selection is worth one point.

☐

Answer:

Explanation:

☐

NEW QUESTION # 96

You need to design a solution to provide administrators with secure remote access to the virtual machines. The solution must meet the following requirements:

- * Prevent the need to enable ports 3389 and 22 from the internet.
- * Only provide permission to connect the virtual machines when required.
- * Ensure that administrators use the Azure portal to connect to the virtual machines.

Which two actions should you include in the solution? Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

- A. Configure Azure VPN Gateway.
- B. Enable Azure Active Directory (Azure AD) Privileged Identity Management (PIM) roles as virtual machine contributors.
- **C. Configure Azure Bastion.**
- **D. Enable just-in-time (JIT) VM access.**
- E. Enable Just Enough Administration (JEA).

Answer: C,D

Explanation:
