Sharing-and-Visibility-Architect問題と解答、 Sharing-and-Visibility-Architect模擬試験最新版

短時間で試験に合格して認定資格を取得する場合は、適切なSharing-and-Visibility-Architect試験問題を選択することが非常に重要です。 Sharing-and-Visibility-Architect学習資料にもっと注意を払う必要があります。 。すべてのお客様に適切な学習教材を提供するために、当社の多くの専門家がSharing-and-Visibility-Architectトレーニング教材を設計しました。 Sharing-and-Visibility-Architect試験の質問を購入すると、Sharing-and-Visibility-Architect試験に合格して認定資格を取得するのが非常に簡単になると約束できます。

Salesforce Certified Sharing and Visibility Architect 認定 Sharing-and-Visibility-Architect 試験問題 (Q74-Q79):

質問 # 74
Universal Containers has a Performance Feedback custom object (Private organization-wide default) used by customers to report

any issues with delivery drivers. Feedback should not be visible to the driver, but any feedback records should be accessible to people above them in the Role Hierarchy, even when the driver changes managers.

Assuming managers have Read access to the Feedback object, which three steps are necessary to solve these requirements?

- A. Remove Read permission on the Driver profile, have feedback ownership transferred to the driver when feedback is submitted, and create an ownership-based sharing rule.
- B. Remove Read permission on the Driver profile, have feedback ownership transferred to the driver when feedback is submitted, and use the Role Hierarchy to give access to a driver's manager
- C. Remove Read permission on the Driver profile, have feedback ownership transferred to the driver's manager when feedback Is submitted, and use the Role Hierarchy to give access to a driver's manager.

正解：C

解説：

* Step 1: Remove Read permission on the Driver profile for the Feedback object to ensure that drivers cannot see their feedback records. Object-level permissions control whether users can see, edit, or delete records.
* Step 2: Automatically transfer ownership of feedback to the driver's manager upon submission. This ensures that managers own the feedback records, providing a natural ownership hierarchy for data visibility.
* Step 3: Leverage the Role Hierarchy to grant access to the manager's superiors, ensuring that visibility extends appropriately up the organizational structure.
* Why Option B is Correct: It directly aligns with the requirement that managers (not drivers) need access, and feedback visibility should follow the Role Hierarchy even after a driver's manager changes.
* Why Others Are Incorrect:
* Option A: Sharing rules would be redundant in this case since the Role Hierarchy already provides the required access.
* Option C: Allowing drivers to retain ownership conflicts with the requirement that they should not have visibility.

For detailed references, see Salesforce Role Hierarchies and Ownership documentation: https://help.salesforce.com/

質問 # 75

Universal Containers (UC) has a custom Apex class that enforces a business process and updates opportunity field-level security permissions of read only certain user's profiles are being updated by their class.

How should the architect fix this problem?

- A. Put the code in an class that uses the With Sharing keyword.
- B. Use the IsUpdateable() Apex method to test each field prior to allowing updates.
- C. Add with Sharing keyword to the class.
- D. Use the with SECURYT_ENFORCED keyword in the SOQL statement.

正解：B

解説：

Explanation

Using the IsUpdateable() Apex method to test each field prior to allowing updates is the best way to fix this problem. This method returns true if the user has permission to edit a specific field on a specific object, and false otherwise. Option A is incorrect, since putting the code in a class that uses the With Sharing keyword would not affect field-level security permissions, but rather record-level access based on sharing rules. Option C is incorrect, since using the with SECURITY_ENFORCED keyword in the SOQL statement would not prevent updates on fields that are read-only for certain profiles, but rather enforce field- and object-level data protection. Option D is incorrect, since adding with Sharing keyword to the class would have the same effect as option A.

質問 # 76

Sales operations at Universal Containers (UC) has created Public Reports and Dashboards folders for sales managers. Sales operations and sales managers report to the VP of Sales. Sales operations currently spends a few hours each month updating users that should have access to edit reports and dashboards in these folders.

How should UC grant access to sales managers to automate access to these Public Reports and Dashboards folders?

- A. Share the folders with the Sales Managers profile.
- B. Share the folders with the lowest roles in the Role Hierarchy; superiors will get access automatically.
- C. Share the folders with a "Sales Managers" Public Group.

正解：A

質問 # 77
Universal Containers implemented Sales Cloud and requested that sales agents have access to products and prices the company sells, and to be able to create opportunities for its customers.
What should the organization-wide defaults be for pricebook?

- A. Public Read-Only
- B. Use
- C. View

正解：B

質問 # 78
Universal Containers would like to control access to records and objects according to the following business requirements: Sales users can view all account records but only edit their own records. Sales managers can view all account records but only edit records of their team. Service users can view all account records that are not marked with a RecordType of Prospect.
Which organization-wide default configuration should an architect recommend to fulfill these requirements?

- A. Public Read/Transfer
- B. Private
- C. Public Read Write

正解：B
