The DumpsMaterials is one of the top-rated and trusted platforms that are committed to making the Microsoft SC-200 exam preparation simple, easy, and quick. To achieve this objective the DumpsMaterials is offering valid, updated, and easy-to-use Microsoft SC-200 Exam Practice test questions in three different formats. These three formats are Microsoft SC-200 exam practice test questions PDF dumps, desktop practice test software, and web-based practice test software.

Microsoft Security Operations Analyst Sample Questions (Q109-Q114):

NEW QUESTION # 109
You have an Azure subscription that has Azure Defender enabled for all supported resource types.
You create an Azure logic app named LA1.
You plan to use LA1 to automatically remediate security risks detected in Defenders for Cloud.
You need to test LA1 in Defender for Cloud.
What should you do? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Answer:

Explanation:
Explanation:
According to Microsoft Defender for Cloud automation documentation, Logic Apps can be integrated to automatically respond to recommendations or alerts. To test or automate remediation from Defender for Cloud, you must configure an automation workflow (Logic App) that triggers when a recommendation is created or updated.
Microsoft defines the available triggers for Defender for Cloud automation as follows:
* When a Defender for Cloud Recommendation is created or triggered - This event type initiates the Logic App whenever a new security recommendation appears or an existing one changes state. It's the proper trigger for remediation scenarios because recommendations typically indicate a detected security misconfiguration or risk requiring action.
* When a Defender for Cloud Alert is created or triggered - This applies to security alerts, not recommendations.
* When a response to a Defender for Cloud alert is triggered - Used for incident-response workflows, not for testing remediation logic.
In the context of the question, the goal is to test automatic remediation for detected configuration issues (security risks). Those are surfaced as recommendations within Defender for Cloud, not as alerts.
Next, the execution source should be configured under:
* Trigger the execution of LA1 from: Recommendations
This ensures that Defender for Cloud will execute the Logic App (LA1) automatically when relevant recommendations are triggered, allowing immediate testing and validation of the remediation logic.
In summary:
To test the Logic App remediation workflow in Defender for Cloud, you must:
* Set the trigger type to "When a Defender for Cloud Recommendation is created or triggered".
* Configure it to execute from "Recommendations".
Thus, the verified correct answers are:
Set the LA1 trigger to: When a Defender for Cloud Recommendation is created or triggered
Trigger the execution of LA1 from: Recommendations

NEW QUESTION # 110
You need to meet the Microsoft Sentinel requirements for collecting Windows Security event logs. What should you do? To answer, select the appropriate options in the answer area. NOTE Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

NEW QUESTION # 111
You have an Azure Functions app that generates thousands of alerts in Azure Security Center each day for normal activity.
You need to hide the alerts automatically in Security Center.
Which three actions should you perform in sequence in Security Center? Each correct answer presents part of the solution.
NOTE: Each correct selection is worth one point.

Answer:

Explanation:
1 - Select Security policy.
2 - Select Supperssion rules, and then select Create new suppression rule.
3 - Select Azure Resource as the entity type and specify the ID.

NEW QUESTION # 112
You have a Microsoft Sentinel workspace that contains a custom workbook named Workbook1.
You need to create a visual based on the SecuntyEvent table. The solution must meet the following requirements:
* Identify the number of security events ingested during the past week.
* Display the count of events by day in a timechart
What should you add to Workbook1?

- A. a query
- B. a group
- C. a metric
- D. links or tabs

Answer: A

NEW QUESTION # 113
You have resources in Azure and Google cloud.
You need to ingest Google Cloud Platform (GCP) data into Azure Defender.
In which order should you perform the actions? To answer, move all actions from the list of actions to the answer area and arrange them in the correct order.

Answer:

Explanation:
1 - Configure the GCP Security Command Center.
2 - Enable Security Health Analytics.
3 - Enable the GCP Security Command Center API.
4 - Create a dedicated service account ans a private key.
5 - From Azure Security Center, add cloud connectors.
