

Latest Updated Latest HQT-4160 Test Labs - Hitachi Reliable HQT-4160 Test Materials: Hitachi Vantara Qualified Professional - VSP 5000 Series Installation

Exam Type
Qualification

Format
Proctored, closed book exam

Credential
Hitachi Vantara Qualified Professional - VSP 5000 Series Installation

Validity 3 years

Delivery
Kryterion Webassessor System*

Questions 35

Passing Score 65%

Duration 60 minutes

Cost
US \$100 or equivalent in local currency (plus local tax, depending on location)

Supporting Material
• 1990PI - Installing and Configuring the Hitachi VSP 5000 Series (5 day-ILT)

This test is designed for Hitachi Vantara employees and partners who install Hitachi Virtual Storage Platform (VSP) 5000 series systems. The test will validate that the successful candidate has knowledge and skills in installing, configuring and supporting VSP 5000 series systems at customer sites. This includes strong knowledge of the systems' hardware and associated program products, thorough understanding of installation and configuration procedures, and associated support activities. This test covers Hitachi Virtual Storage Platform models VSP 5100(H), VSP 5500(H), VSP 5200(H) and VSP 5600(H).

Audience: Hitachi Vantara Employee and Partner Installation Professionals

Hitachi VSP 5000 series installation professionals should have strong knowledge and skills in installing and supporting storage systems deployed as part of VSP 5000 series solutions implementation. They perform pre-installation checks and install, configure and test the systems so they can be handed over in an operational state to customers. They also provide post-installation services, including support, maintenance, updates and upgrades, and have knowledge of problem-determination and incident-resolution procedures, tools and techniques.

Test Objectives	
Section 1 System Architecture	
1.1	Describe the different VSP 5000 models and their specifications.
1.2	Describe the VSP 5000 systems architecture, their components and their functions.
1.3	Describe the front-end design and layout of VSP 5000 systems and the supported Channel Boards (CHBs).
1.4	Describe the back-end design and layout of VSP 5000 systems and the supported Disk Adapters (DKAs).
Section 2 System Pre-Installation and Installation	
2.1	Describe the VSP 5000 storage systems pre-installation procedures and documentation.
2.2	Describe the VSP 5000 disk controllers (DKCs) interconnections.
2.3	Describe the "New Installation" procedure for VSP 5000 storage systems and when it is appropriate to use.
2.4	Describe the VSP 5000 storage systems network settings.
2.5	Describe the VSP 5000 storage microcode upgrade procedures.
Section 3 System Configuration	
3.1	Describe the key steps involved in the installation of VSP 5000 storage systems.
3.2	Describe how to create Parity Groups on VSP 5000 storage systems.

* Depending on the location and course delivery format, this closed-book, proctored qualification test may also be offered and administered by the instructor at the conclusion of the supporting course.

Prep4away is website that can help a lot of IT people realize their dreams. If you have a IT dream, then quickly click the click of Prep4away. It has the best training materials, which is Prep4away;s Hitachi HQT-4160 Exam Training materials. This training materials is what IT people are very wanted. Because it will make you pass the exam easily, since then rise higher and higher on your career path.

Hitachi HQT-4160 exam is an industry-recognized certification that can enhance your career in the IT industry. It is intended for professionals who are involved in the installation, configuration, and maintenance of Hitachi VSP 5000 solutions. Successful candidates of the examination will demonstrate understanding of fundamental concepts, architecture, and installation procedures for the VSP 5000, as well as requirements for configuring connectivity, data replication, and data recovery features.

Hitachi HQT-4160: Hitachi Vantara Qualified Professional - VSP 5000 Series Installation exam is a great way for professionals to demonstrate their skills and knowledge in the storage and data management industry. HQT-4160 Exam is designed to be challenging and requires candidates to have a good understanding of the subject matter. Passing HQT-4160 exam is a great way for professionals to enhance their career prospects and to demonstrate their commitment to their profession.

Reliable HQT-4160 Test Materials, HQT-4160 Review Guide

As for the HQT-4160 study materials themselves, they boost multiple functions to assist the learners to learn the study materials efficiently from different angles. For example, the function to simulate the HQT-4160 exam can help the exam candidates be familiar with the atmosphere and the pace of the Real HQT-4160 Exam and avoid some unexpected problem occur such as the clients answer the questions in a slow speed and with a very anxious mood which is caused by the reason of lacking confidence.

The Hitachi HQT-4160 exam is designed to test the candidate's knowledge and understanding of the latest technology and best practices in the field of data storage and management. HQT-4160 Exam is also designed to ensure that candidates have the necessary skills to configure and optimize storage systems for optimal performance.

Hitachi Vantara Qualified Professional - VSP 5000 Series Installation Sample Questions (Q33-Q38):

NEW QUESTION # 33

What distinguishes the back-end design of VSP 5000 systems from traditional storage systems?

- A. The use of solid-state drives only
- B. The absence of any physical drives
- C. The direct connection to cloud storage
- D. The use of Disk Adapters (DKAs) for enhanced data management

Answer: D

Explanation:

In the Hitachi VSP 5000 storage system:

Disk Adapters (DKAs) are specialized components that manage communication between the storage controllers and physical disks.

DKAs provide:

Efficient I/O routing

Support for multiple disk types (SSD, SAS, etc.)

RAID management and data distribution

High performance and reliability compared to traditional storage systems that rely on simpler disk controllers.

This back-end architecture allows the VSP 5000 to handle large-scale, high-speed enterprise workloads while maintaining data protection and flexibility.

NEW QUESTION # 34

A VSP 5500 system is installed with a pair of Controller Boxes (CBXs). How many LAN cables are needed to attach controllers to the switch/HUB located on the Hitachi Service and Network Box-0 (HSNBX-0)?

- A. 0
- B. 1
- C. 2
- D. 3

Answer: C

Explanation:

Only the "LAN board 1" management ports on each of the two controllers in CBX-0 connect to the switch/hub in HSNBX-0 - one cable per controller - for a total of two LAN cables.

NEW QUESTION # 35

Which three ISO files are part of the Microcode Kit for the VSP 5000 series? (Choose three.)

- A. Maintenance PC (MPC)
- B. Custom Tools (CT)
- C. Microcode (R9)
- D. Open Source Software (OSS)
- E. Documents and Programs (DP)

Answer: C,D,E

Explanation:

Documents and Programs (DP)

This ISO contains the necessary documentation and utility programs required for microcode installation and maintenance.

Microcode (R9)

This ISO provides the actual microcode (firmware) that is installed onto the VSP 5000 series hardware.

Open Source Software (OSS)

This ISO includes open source software components required by the system or referenced during installation.

NEW QUESTION # 36

You need to install an iSCSI channel board feature on a VSP 5500 system. Which two steps are required? (Choose two.)

- A. Use the Maintenance Utility (Sub Panel) of the VSP GUI to assign ports to the added boards.
- **B. Use the Maintenance Utility to add the boards to the system configuration.**
- **C. Physically install the pair of channel boards in the appropriate slots.**
- D. Physically install the pair of channel boards in any available slot.

Answer: B,C

Explanation:

Physically install the pair of channel boards in the appropriate slots.

Channel boards must be installed in specific, designated slots to ensure proper system recognition and redundancy.

Use the Maintenance Utility to add the boards to the system configuration.

After installation, the Maintenance Utility is used to logically add and configure the new channel boards within the system.

NEW QUESTION # 37

You need to upgrade the cache of a VSP 5500 online. How do you accomplish this task?

- A. Use Storage Navigator to put the CHB Adapters offline one controller at a time, and add the extra cache to the inactive controller.
- **B. Use the Maintenance Utility to block the controllers one at the time, and add the extra cache to the blocked controller.**
- C. Use the VSP GUI and click on Change Configuration and follow the instructions on the screen to add the extra cache.
- D. Use the Web Console to block the controllers one at the time, and add the extra cache to the blocked controller.

Answer: B

Explanation:

To upgrade the cache online, you must use the Maintenance Utility to sequentially block each controller, add the extra cache modules to the blocked controller, and then unblock it, ensuring system availability throughout the process.
