

Quiz 2026 Authoritative Palo Alto Networks PSE-Cortex-Pro-24: Palo Alto Networks Systems Engineer Professional - Cortex Valid Test Bootcamp

P.S. Free & New PSE-Cortex-Pro-24 dumps are available on Google Drive shared by Lead1Pass: <https://drive.google.com/open?id=1-xVU4OZsa3wUUGwz87oi0oPJ3t5CrDdJ>

Everything needs a right way. The good method can bring the result with half the effort, the same different exam also needs the good test method. Our PSE-Cortex-Pro-24 study questions in every year are summarized based on the test purpose, every answer is a template, there are subjective and objective exams of two parts, we have in the corresponding modules for different topic of deliberate practice. To this end, our PSE-Cortex-Pro-24 Training Materials in the qualification exam summarize some problem-solving skills, and induce some generic templates. The user can scout for answer and scout for score based on the answer templates we provide, so the universal template can save a lot of precious time for the user.

Lead1Pass is within your reach to obtain the top-rated Palo Alto Networks PSE-Cortex-Pro-24 Exam Questions. And it guarantees that you will pass the PSE-Cortex-Pro-24 certification exam on the maiden attempt. Several aspiring candidates have already heard about the prestigious Palo Alto Networks Systems Engineer Professional - Cortex PSE-Cortex-Pro-24 Certification. But the real problem they face is their inability to find trustworthy, updated, and relevant Palo Alto Networks Systems Engineer Professional - Cortex PSE-Cortex-Pro-24 exam practice tests that can assist them.

Authentic PSE-Cortex-Pro-24 Exam Questions | PSE-Cortex-Pro-24 Latest Dumps Ppt

There are a lot of students that bought Lead1Pass's Palo Alto Networks PSE-Cortex-Pro-24 dumps and are satisfied with our services because they passed their PSE-Cortex-Pro-24 on the very first try. We assure you that if you study with our provided Palo Alto Networks Systems Engineer Professional - Cortex (PSE-Cortex-Pro-24) practice questions, you can pass Palo Alto Networks certifications Exam test in a single attempt, and if you fail to do it, you can claim your money back from us according to terms and conditions.

Palo Alto Networks Systems Engineer Professional - Cortex Sample Questions (Q52-Q57):

NEW QUESTION # 52

What is a key difference between audit users and full users in Cortex XSOAR?

- A. Audit users have read-only permission, while full users have read-write permission.
- B. Audit users can only view incidents, while full users can edit system components.
- C. Audit users can run scripts and playbooks, while full users can only view reports.
- D. Full users can only view dashboards, while audit users can investigate incidents.

Answer: A

Explanation:

Audit users in Cortex XSOAR have limited, read-only access to the system, which allows them to view information without making any changes. Full users, on the other hand, have read-write access, meaning they can both view and modify incidents, configurations, and other system components.

NEW QUESTION # 53

Which two entities can be created as a BIOC? (Choose two.)

- A. alert log
- B. file
- C. registry
- D. event log

Answer: B,C

Explanation:

<https://docs.paloaltonetworks.com/cortex/cortex-xdr/cortex-xdr-pro-admin/investigation-and-response/cortex-xdr-indicators/working-with-biocs/create-a-bioc-rule.html>

NEW QUESTION # 54

What is the primary mechanism for the attribution of attack surface data in Cortex Xpanse?

- A. Dark web monitoring
- B. Scanning from public internet data sources
- C. Active scanning with network-installed agents
- D. Customer-provided asset inventory lists

Answer: B

Explanation:

The primary mechanism for the attribution of attack surface data in Cortex Xpanse is scanning from public internet data sources. Cortex Xpanse continuously scans the internet to identify assets that are potentially exposed or vulnerable, providing a comprehensive view of an organization's attack surface based on public-facing data.

NEW QUESTION # 55

Which step is required to prepare the VDI Golden Image?

- A. Run the VDI conversion tool
- B. Ensure the latest content updates are installed
- C. Review any PE files that WildFire determined to be malicious
- D. Set the memory dumps to manual setting

Answer: C

NEW QUESTION # 56

What is the size of the free Cortex Data Lake instance provided to a customer who has activated a TMS tenant, but has not purchased a Cortex Data Lake instance?

- A. 100 GB
- B. 10 TB

- C. 1 TB
- D. 10 GB

Answer: A

Explanation:

Cortex Data Lake (often referred to as Strata Logging Service in some contexts) is Palo Alto Networks' cloud-based storage solution that centralizes security data for products like Cortex XDR, Prisma Access, and NGFWs. The question involves a customer who has activated a TMS (Tenant Management Service) tenant but has not purchased a Cortex Data Lake instance. TMS is part of the Palo Alto Networks ecosystem for managing tenants and services, typically associated with Cortex or Prisma deployments. Let's break this down to determine the size of the free Cortex Data Lake instance provided in this scenario.

Understanding TMS and Cortex Data Lake:

* TMS Tenant: The Tenant Management Service is a framework used to manage multiple tenants or instances within Palo Alto Networks' cloud services (e.g., Cortex XDR, Prisma Access). Activating a TMS tenant implies the customer has initialized a management structure but hasn't committed to a full Cortex Data Lake purchase.

* Free Cortex Data Lake Instance: Palo Alto Networks provides a limited, free tier of Cortex Data Lake storage to customers who activate certain services or products, allowing them to evaluate functionality or store minimal data before committing to a paid license.

Free Storage Allocation:

When a customer activates a TMS tenant without purchasing a Cortex Data Lake instance, Palo Alto Networks allocates a default free storage capacity to enable basic functionality. According to official documentation and standard practices:

* The free Cortex Data Lake instance provides 100 GB of storage.

* This amount is intended for initial use cases, such as storing logs from a small number of endpoints (e.g., Cortex XDR Prevent agents), firewall logs, or trial data during evaluation periods.

Option Analysis:

* A. 10 GB:

* Analysis: 10 GB is too small to be a meaningful free tier for a product like Cortex Data Lake, which is designed to handle security telemetry from endpoints, networks, or cloud services. Even basic log storage for a few devices over a short period would exceed this quickly.

* Conclusion: Incorrect.

* B. 1 TB:

* Analysis: 1 TB (1,000 GB) is a substantial amount of storage, typically associated with paid Cortex Data Lake subscriptions rather than a free tier. Offering this much for free would undermine the paid licensing model.

* Conclusion: Incorrect.

* C. 10 TB:

* Analysis: 10 TB is even larger and aligns with enterprise-scale paid deployments, not a free instance. This size is far beyond what's provided without a purchase.

* Conclusion: Incorrect.

* D. 100 GB:

* Analysis: 100 GB is the documented size of the free Cortex Data Lake instance provided to customers who activate a tenant (e.g., via TMS) without purchasing additional storage. It's sufficient for small-scale testing, such as storing logs from a handful of Cortex XDR agents or firewall data for a limited retention period (e.g., 30 days).

* Conclusion: Correct.

Supporting Context:

* Cortex XDR Example: For Cortex XDR Prevent customers, activating a tenant includes 100 GB of free Cortex Data Lake storage for 30 days of alert data (not full telemetry, which requires XDR Pro).

This aligns with the TMS scenario, where basic tenant activation triggers the same free tier.

* Prisma Access: Similarly, Prisma Access customers activating a tenant without a purchased Data Lake instance receive 100 GB for initial log storage.

* Documentation: While exact wording may vary, Palo Alto Networks consistently references 100 GB as the free tier across product activation guides.

References:

Cortex Data Lake Getting Started Guide (Palo Alto Networks Documentation):

States that customers who activate a tenant without purchasing storage receive "100 GB of free storage" for initial use.

docs-cortex.paloaltonetworks.com/r/Cortex-Data-Lake/Cortex-Data-Lake-Getting-Started/Get-Started-with-Cortex-Data-Lake

Cortex XDR Prevent Activation:

Notes that 100 GB is included for free with tenant activation, supporting basic alert storage.

Palo Alto Networks Sales and Licensing FAQs:

Confirms 100 GB as the standard free tier for Cortex Data Lake when no additional storage is purchased.

NEW QUESTION # 57

.....

In today's society, there are increasingly thousands of people put a priority to acquire certificates to enhance their abilities. With a total new perspective, PSE-Cortex-Pro-24 study materials have been designed to serve most of the office workers who aim at getting a PSE-Cortex-Pro-24 certification. Our PSE-Cortex-Pro-24 Test Guide keep pace with contemporary talent development and makes every learner fit in the needs of the society. There is no doubt that our PSE-Cortex-Pro-24 latest question can be your first choice for your relevant knowledge accumulation and ability enhancement.
