

Standard CSDB Answers, Exams CSDB Torrent

Based structure, TO manage these Data modules CSDB was maintained. (Database). Data Module is the standalone section of the document. For example, let's assume that one data module is prepared on Operation of GPS and stored in CSDB, then whenever GPS operations are to be reproduced for different aircraft or different systems, simply that Data module can be copied and plugged.

In short, re-usability and the format used is XML, and tags are defined by the S1000D steering committee.

S1000D Basic Principle

- Content or data produced following the standard is in Data Module
- This data module is the smallest and self-contained content or data unit within a technical publication
- A data module must have sense and meaning when viewed without any supporting data other than images and diagrams
- These data modules will be stored and managed in CSDB, Common Source Database.
- Using this CSDB we can publish output in a page-oriented or Interactive Electronic Technical Manual.
- These Individual data modules are re-usable components and can be used repeatedly in an output.
