問題 #49

A client wants to change how they publish their content. Refer to the following client business requirements:

- * The client has a seasonal business that has significant content changes across their site that need to be rolled out at once based on the season change over date.
- * The content authors need to be able to work one season in advance of publish dates to ensure that all changes can be completed on time.
- * The content authors need a way to indicate that all the seasonal changes are ready. If the content changes are not completed, then the pages should not get published.

* The content authors need the ability to modify the current live pages without rolling back changes for a future content rollout. What approach should the Architect recommend?

- A. Use Launches inside of AEM for each new season and use the production ready flag to show changes are completed.
- **B. Use the Manage Publication with scheduling value set to the season change over date when changes are completed.**
- C. Create a Project inside of AEM for each new season and create a task for notifying that changes are completed.
- D. Use the Versioning feature when editing a page to toggle and publish changes when ready.

答案: B

問題 #50

A customer has a requirement to allow authors to access AEM with single sign-on. To achieve this an Architect needs to integrate AEM with the customer's identity management system.
