application, simulates the Real DEP-2025 Exam, supports MS operating system and boosts 2 modes for practice and you can practice offline at any time. You can learn the APP online version of DEP-2025 guide torrent in the computers, cellphones and laptops and you can choose the most convenient method to learn.

Apple Deployment and Management Exam Sample Questions (Q104-Q109):

NEW QUESTION # 104
What's the benefit of using supervision?

- A. Enables advanced management
- B. Separates personal and managed data
- C. Allows personalization
- D. Improves network performance

Answer: A

Explanation:
Supervision, applied via Apple Configurator or ADE, enables advanced management by unlocking additional MDM capabilities, such as blocking app removal, enforcing single-app mode, or managing Activation Lock. This provides greater control for organizations. Personalization (option A) is often restricted under supervision. Network performance (option C) is unrelated, and data separation (option D) is a User Enrollment feature. The Apple Platform Deployment Guide highlights advanced management as supervision's key benefit.

NEW QUESTION # 105
Which two of these can MDM provide with an EraseDevice command when using the Return to Service workflow? (Select two.)

- A. Location Services
- B. App preservation
- C. Enrollment profile
- D. Wi-Fi payload
- E. Managed Apple Account

Answer: C,D

Explanation:
Return to Service includes Wi-Fi and enrollment. The Mobile Device Management Protocol Reference states, "With Return to Service, MDM can include a Wi-Fi payload and enrollment profile in the EraseDevice command to automate redeployment."
Reference:
Mobile Device Management Protocol Reference, "Return to Service" section.
Apple Platform Deployment Guide, "Device Wipe" section.

NEW QUESTION # 106
What's required to use Apple Configurator?

- A. A VPN configuration
- B. User acceptance
- C. An MDM solution
- D. A Mac

Answer: D

Explanation:
Apple Configurator is a macOS application requiring a Mac computer to run, used for supervising and configuring iOS/iPadOS/tvOS devices via USB. An MDM solution (option A) can complement it but isn't required. User acceptance (option C) isn't needed, as it's an administrative tool. A VPN configuration (option D) is unrelated. The Apple Platform Deployment Guide specifies a Mac as the platform for Apple Configurator.

NEW QUESTION # 107

What must you upload to MDM so that you can distribute App Store apps to your MDM-enrolled devices?

- **A. Content token**
- B. Server token
- C. App token
- D. Distribution token

Answer: A

Explanation:

A content token, downloaded from ABM or Apple School Manager (ASM), must be uploaded to the MDM server to enable Managed Distribution of App Store apps. The Apple Business Manager User Guide explains, "To distribute apps, download the content token from Apple Business Manager and upload it to your MDM solution. This token links your MDM server to your app licenses, enabling managed distribution." Options B and D are fictitious, and C is for device enrollment, not app distribution.
Reference:
Apple Business Manager User Guide, "Apps and Books" section.
Mobile Device Management Protocol Reference, "Managed Distribution" section.

NEW QUESTION # 108

Which Wi-Fi standard helps devices join Wi-Fi networks and roam more quickly and effectively between access points?

- **A. 802.11r**
- B. 802.11q
- C. 802.11ad
- D. FastLane

Answer: A

Explanation:

802.11r enhances roaming. The Apple Platform Deployment Guide states, "802.11r, or Fast BSS Transition, improves Wi-Fi performance by enabling faster roaming between access points, reducing authentication overhead." Option C is a QoS feature, not a standard, and A and D are unrelated.
Reference:
Apple Platform Deployment Guide, "Wi-Fi Standards" section.
macOS Deployment Reference, "Network Optimization" section.

NEW QUESTION # 109

......

The Apple DEP-2025 real questions are an advanced strategy to prepare you according to the test service. You can change the time and type of questions of the Apple DEP-2025 exam dumps.
