### Salesforce Certified Field Service Consultant Sample Questions (Q43-Q48):

#### NEW QUESTION # 43

Technician often need to generate reports in customer language  
Which configuration should the consultant recommend to meet the requirements?

- A. Update the default language of the organization
- B. Add the language field to the contact page layouts
- C. Update the language of the current user
- **D. Add the service report language field to the work order page layout**

**Answer: D**

#### NEW QUESTION # 44

Universal Containers has implemented a Knowledge solution to provide Field Technicians with information necessary to complete assigned work. Which two capabilities will now be available?

- **A. Attach Articles to Work Orders and Work Order Line Items.**
- B. Attach Knowledge Articles to Work Order Line Items Only.
- **C. Manage Attached Articles and Search the Knowledge Base.**
- D. Include Quick Actions and Global Actions in Attached Articles.

**Answer: A,C**

#### NEW QUESTION # 45

Which object can be used to share Service Appointments with Service Resources in Salesforce Field Service?

- A. Service Territory
- **B. User Territory**
- C. Service Territory Member
- D. Work Order

**Answer: B**

#### NEW QUESTION # 46

Universal Containers requires trained inspectors to make three site visits per year to inspect containers at customer sites. These visits must be created 14 days before the next suggested inspection date.

What are two ways 3 Consultant can configure Maintenance Plans to meet the requirement?  
Choose 2 answers

- A. Auto-generate Work Orders with a 14 day Generation Horizon.
- B. Auto-generate Work Orders with a 14 day Generation Timeframe.
- C. Associate a Required Skill called Site Visit to a Maintenance Plan.
- D. Associate 2 Work Type called Site Visit to a Maintenance Plan

Answer: A,D

#### NEW QUESTION # 47

universal containers wants to provide a view of emergency work that is only visible to dispatchers What should the consultant do to meet the requirement?

- A. Custom gantt filter
- B. Custom report in a private report folder
- C. Custom list view
- D. Custom lightning component

Answer: A

Explanation:

Custom gantt filters are filters that allow dispatchers to view service appointments based on specific criteria such as status, priority, or custom fields[67]. Creating a custom gantt filter would allow providing a view of emergency work that is only visible to dispatchers by setting up criteria such as status equals emergency and sharing the filter with dispatchers only[68]. Custom lightning component is a component that allows developers to create custom user interfaces using Lightning Web Components or Aura Components[69]. Creating a custom lightning component would require coding and would not leverage the existing gantt chart functionality. Custom report in a private report folder is a report that allows users to view data based on specific criteria such as objects, fields, filters, or charts[70]. Creating a custom report in a private report folder would not provide a view of emergency work on the gantt chart and would not allow dispatchers to schedule or reschedule service appointments. Custom list view is a list view that allows users to view records based on specific criteria such as filters, fields, or sorting[71]. Creating a custom list view would not provide a view of emergency work on the gantt chart and would not allow dispatchers to schedule or reschedule service appointments. References:
