

100% Pass 2026 The Best SCP-NPM: SolarWinds Network Performance Monitor (NPM) Exam Valid Mock Test

2025 Latest SureTorrent SCP-NPM PDF Dumps and SCP-NPM Exam Engine Free Share: <https://drive.google.com/open?id=1KdMIBJJCJVubQME9n0Mt2yZfHD8HLKN9>

The SureTorrent is one of the top-rated and trusted platforms that are committed to making the SolarWinds SCP-NPM exam preparation simple, easy, and quick. To achieve this objective the SureTorrent is offering valid, updated, and easy-to-use SolarWinds SCP-NPM Exam Practice test questions in three different formats. These three formats are SolarWinds SCP-NPM exam practice test questions PDF dumps, desktop practice test software, and web-based practice test software.

SureTorrent wants to win the trust of SolarWinds SCP-NPM exam candidates at any cost. To achieve this objective SureTorrent is offering some top features with SCP-NPM exam practice questions. These prominent features hold high demand and are specifically designed for quick and complete SCP-NPM Exam Questions preparation.

Exam SolarWinds SCP-NPM Questions Pdf & SCP-NPM Reliable Dump

So many candidates have encountered difficulties in preparing to pass the SCP-NPM exam. But our study materials will help candidates to pass the exam easily. Our SCP-NPM guide questions can provide statistics report function to help the learners to find weak links and deal with them. The SCP-NPM Test Torrent boost the function of timing and simulating the exam. They set the timer to simulate the exam and help the learners adjust the speed and keep alert. So the SCP-NPM guide questions are very convenient for the learners to master and pass the exam.

SolarWinds SCP-NPM (SolarWinds Network Performance Monitor) Exam is designed to provide network administrators and IT professionals with the knowledge and skills necessary to effectively monitor and manage network performance using the SolarWinds NPM platform. The SolarWinds NPM is a comprehensive network monitoring and management tool that allows IT teams to proactively identify and resolve network issues before they impact end-users. The SCP-NPM Certification validates an individual's proficiency in using this platform to monitor and manage network devices, applications, and services.

SolarWinds Network Performance Monitor (NPM) Exam Sample Questions (Q79-Q84):

NEW QUESTION # 79

You want to create a custom poller for a device. When you select the OID you get an "OID not supported" error. What does this mean?

- A. Your firewall is blocking SNMP requests
- B. The SNMP string that you used is incorrect
- C. This OID requires the read/write community string
- **D. The SNMP agent on the device does not report on this OID**

Answer: D

Explanation:

An OID (Object Identifier) is a unique identifier for a specific variable in a MIB (Management Information Base) that can be polled or monitored by SNMP (Simple Network Management Protocol). However, not all OIDs are supported by all devices or SNMP agents, which are software components that collect and report the MIB data. If you select an OID that is not supported by the device or the SNMP agent, you will get an "OID not supported" error when you try to create a custom poller for that device in NPM (Network Performance Monitor). This means that the device or the SNMP agent does not have the information for that OID or does not respond to the SNMP request for that OID.

To resolve this issue, you can try the following steps:

Verify that the device supports the OID that you want to monitor. You can use the MIB Browser or the MIB Walk tool to browse the MIB tree of

the device and find the OID. You can also check the device vendor's documentation or website for the supported OIDs and MIBs. Verify that the SNMP agent on the device is configured properly and has the latest version. You may need to update the SNMP agent or enable some features or extensions to support the OID. You can also check the SNMP agent's logs or status for any errors or warnings. Verify that the SNMP credentials and settings are correct and match the device's configuration. You may need to use a different SNMP version, community string, port, or timeout value to communicate with the device. You can also test the SNMP connectivity using the SNMP Test tool or the Test button in the UnDP (Universal Device Poller) application. Verify that there are no network issues or firewalls that are blocking the SNMP traffic between the NPM server and the device. You may need to allow the SNMP protocol and port on the firewall or router, or use a different network path or interface to reach the device. You can also use the Ping or Traceroute tools to check the network connectivity and latency.

NEW QUESTION # 80

The Orion platform supports agent-based monitoring for which OS types? (Choose all that apply.)

- A. Windows
- B. Linux
- C. AIX Unix Agents
- D. Sun Solaris
- E. IBM

Answer: A,B,C

Explanation:

The Orion platform supports agent-based monitoring for Windows, Linux/Unix, and AIX systems. An Orion agent is software that provides a communication channel between the Orion server and the target system, as an alternative to WMI or SNMP. Agent-based monitoring can offer better performance, security, and reliability than agentless monitoring, especially for remote or cloud-based systems. The Orion platform does not support agent-based monitoring for Sun Solaris or IBM systems, as they are not compatible with the agent software. Reference: Monitor with SolarWinds Platform agents in SAM, SolarWinds Platform Agent requirements, Orion Platform | SolarWinds

NEW QUESTION # 81

After you create an NPM report with custom charts for availability and response time metrics, you schedule the report and add an action to export it. But you cannot export it as an Excel file. What is the likely reason?

- A. The custom charts only support a PDF export
- B. You do not have the permissions to export the report
- C. You must link the report with a URL in an email action to run live in the web console
- D. Excel file formats are not supported

Answer: D

Explanation:

The Export to Excel button is only displayed if the report contains only custom table resources. Other resources cannot be converted to the Excel format. https://documentation.solarwinds.com/en/success_center/orionplatform/content/core-exporting-reports-sw1547.htm#:~:text=the%20Excel%20format,-Click%20Reports%20%3E%20All%20Reports%20in%20the%20menu%20bar%2C%20and%20click,Click%20either%20Export%20as%20Excel

NEW QUESTION # 82

Which is not true for Device Studio Poller?

- A. Can poll multiple OIDs for a given technology
- B. Can perform logical operations or transformations on the polled data
- C. Polled values are displayed in existing resources
- D. Collects data from Orion Failover Engine or Hot Standby Engines

Answer: C

NEW QUESTION # 83

You're troubleshooting a complex network issue and need to build a comparison of several metrics across multiple devices and SolarWinds products to identify the problem. What feature can you use?

- A. AppStack
- B. NetPath
- C. PerfStack
- D. Network Insight

Answer: C

Explanation:

PerfStack is a feature of the Orion Platform that allows you to compare and correlate performance data from multiple SolarWinds products and entities in a single view¹. You can drag and drop metrics from different sources, such as NPM, SAM, NCM, NTA, and more, and create custom dashboards that help you troubleshoot complex network issues². PerfStack can also show historical data and baselines for comparison³.
