## Plat-Con-201 Pdf Free Is The Useful Key to Pass Salesforce Certified Omnistudio Consultant

How to get the test Plat-Con-201 certification in a short time, which determines enough qualification certificates to test our learning ability and application level. This may be a contradiction of the problem, we hope to be able to spend less time and energy to take into account the test Plat-Con-201 Certification, but the qualification examination of the learning process is very wasted energy, so how to achieve the balance? Our Plat-Con-201 exam prep can be done with its high-efficient merit. Try it now!

## Salesforce Certified Omnistudio Consultant Sample Questions (Q36-Q41):

### NEW QUESTION # 36

what can a DataRaptor Extract do?

- A. Extract data from a spreadsheet
- B. Create data in multiple related objects
- C. Load data from external sources
- D. Retrieve data from multiple related objects

**Answer: D**

Explanation:

A DataRaptor Extract can retrieve data from multiple related objects. A DataRaptor Extract is a tool that can read data from a Salesforce object or invoke a Salesforce API, using SOQL queries or Apex methods. A DataRaptor Extract can also use filters,

joins, and formulas to manipulate the data. A DataRaptor Extract can retrieve data from multiple related objects by using lookup or master-detail relationships in the SOQL queries or Apex methods

### NEW QUESTION # 37

A company needs to implement new verification processes for contacts in their org. This process relies on three Contact record types: Recruiter, Candidate, and Trainer. The verification process is different for each type of contact. For example, recruiters must pass a background check; trainers must complete mandatory training classes, and candidates must achieve certifications.

Which OmniStudio tools should the consultant recommend to meet these requirements?

- A. Single FlexCard with an Action to invoke an OmniScript
- B. Single OmniStudio Action that invokes separate Omniscritps
- C. Multiple OmniStudio Actions that invoke separate OmniScripts
- D. Specific FlexCards with Actions for each type of Contact

**Answer: C**

Explanation:

The OmniStudio tools that should be recommended to meet these requirements are single OmniStudio Action that invokes separate Omniscritps. OmniStudio Action can be used to conditionally launch different Omniscritps based on the record type of the contact. Omniscritps can be used to implement the verification processes for each type of contact. Specific FlexCards with Actions for each type of Contact would require creating redundant FlexCards and Actions for each record type. Multiple OmniStudio Actions that invoke separate Omniscritps would require creating redundant Actions for each record type. Single FlexCard with an Action to invoke an Omniscritp would not allow for different verification processes based on the record type.

### NEW QUESTION # 38

A business requires a solution to generate an event {platform event) using account information. All the event information is related to the customer and is stored in Salesforce.

Using an Integration Procedure, which two actions are necessary to design this solution?

Choose 2 answers

- A. HTTP
- B. DataRaptor Post
- C. DataRaptor Extract
- D. Response

**Answer: B,C**

Explanation:

The two actions that are necessary to design this solution using an Integration Procedure are DataRaptor Post and DataRaptor Extract. A DataRaptor Post is an action that can write data to a Salesforce object or invoke a Salesforce API. The consultant can use a DataRaptor Post action to create an event (platform event) using account information. A DataRaptor Extract is an action that can retrieve data from a Salesforce object or invoke a Salesforce API. The consultant can use a DataRaptor Extract action to get the account information from Salesforce

### NEW QUESTION # 39

A business needs a 360° view of their accounts, including a FlexCard to display all of the products sold to the account. The business identified 20 different data elements and 10 actions that users would need when viewing the product information. Once all of the elements were collected together on the FlexCard, it looked cluttered.

What FlexCard feature should the consultant recommend to address this issue?

- A. Flyouts
- B. Actions
- C. States
- D. Zones

**Answer: A**

Explanation:

The FlexCard feature that the consultant should recommend to address this issue is Flyouts. A Flyout is a pop-up window that can display additional information or actions for a FlexCard. The consultant can use Flyouts to show some of the data elements and actions that are not essential for the main view of the product information, such as product details, specifications, reviews, etc. This way, the consultant can reduce the clutter on the main FlexCard and improve the user experience

#### NEW QUESTION # 40

A company uses calculation procedures to determine product pricing. Due to the company's pricing schedules, there is always more than one calculation procedure active at one time for a given date.

In this scenario, how will the calculation engine select which calculation procedure to run?

- A. Sequence
- **B. Priority**
- C. Date created
- D. Date modified

**Answer: B**

Explanation:

The calculation engine will select which calculation procedure to run based on Priority. Priority is a field on the calculation procedure object that determines the order in which calculation procedures are executed when there are multiple active ones for a given date. The lower the priority number, the higher the precedence. Date modified, Sequence, and Date created are not factors that affect the calculation procedure selection logic.
