If you still have no confidence for passing test, here we will recommend you an excellent reference material. Our valid 312-85 exam collection pdf will help you pass exam and go to success, you will approach to IT field top. You can just spend short time in preparing for real test with our latest 312-85 Exam Collection Pdf. You can download free demo in our website for your reference to verify the reliability of our dumps before purchasing.

The CTIA certification is ideal for security professionals, threat hunters, security analysts, risk managers, and anyone looking to enhance their knowledge and skills in threat intelligence analysis. Certified Threat Intelligence Analyst certification is recognized globally and is highly regarded in the cybersecurity industry. It provides candidates with the necessary skills and knowledge to develop and implement effective threat intelligence programs that can help organizations identify and mitigate threats effectively.

The CTIA exam covers a wide range of topics related to threat intelligence analysis, including threat intelligence fundamentals, threat intelligence data sources, threat intelligence analysis methods, and threat intelligence dissemination. 312-85 Exam also covers the use of various threat intelligence tools and technologies, such as threat intelligence platforms, threat feeds, and threat hunting tools.

ECCouncil 312-85 Updated Test Cram & New 312-85 Exam Name

For candidates who buy 312-85 exam bootcamp online, they may have the concern about the money safety. We apply the international recognition third party for the payment, and it will protect the interests of you. Therefore you put your mind at rest if you buy 312-85 exam bootcamp from us. In addition, we have free demo for you to have a try, so that you can have a deeper understanding the complete version of the 312-85 Exam Dumps. If you have any other questions, just contact us, and we will do what we can do to help you.

ECCouncil Certified Threat Intelligence Analyst Sample Questions (Q29-Q34):

NEW QUESTION # 29

An analyst is conducting threat intelligence analysis in a client organization, and during the information gathering process, he gathered information from the publicly available sources and analyzed to obtain a rich useful form of intelligence. The information source that he used is primarily used for national security, law enforcement, and for collecting intelligence required for business or strategic decision making.

Which of the following sources of intelligence did the analyst use to collect information?

- A. OPSEC
- **B. OSINT**
- C. SIGINT
- D. ISAC

Answer: B

NEW QUESTION # 30

Karry, a threat analyst at an XYZ organization, is performing threat intelligence analysis. During the data collection phase, he used a data collection method that involves no participants and is purely based on analysis and observation of activities and processes going on within the local boundaries of the organization.

Identify the type data collection method used by the Karry.

- A. Exploited data collection
- B. Active data collection
- **C. Passive data collection**
- D. Raw data collection

Answer: C

NEW QUESTION # 31

Lizzy, an analyst, wants to recognize the level of risks to the organization so as to plan countermeasures against cyber attacks. She used a threat modelling methodology where she performed the following stages:

Stage 1: Build asset-based threat profiles

Stage 2: Identify infrastructure vulnerabilities

Stage 3: Develop security strategy and plans

Which of the following threat modelling methodologies was used by Lizzy in the aforementioned scenario?

- A. TRIKE
- B. VAST
- **C. OCTAVE**
- D. DREAD

Answer: C

Explanation:

The threat modeling methodology employed by Lizzy, which involves building asset-based threat profiles, identifying infrastructure vulnerabilities, and developing security strategies and plans, aligns with the OCTAVE (Operationally Critical Threat, Asset, and Vulnerability Evaluation) methodology. OCTAVE focuses on organizational risk and security practices, emphasizing self-directed risk assessments to identify and prioritize threats to organizational assets and develop appropriate security strategies and plans. This methodology is asset-driven and revolves around understanding critical assets, identifying threats to those assets, and assessing vulnerabilities, leading to the development of a comprehensive security strategy. * The CERT Guide to System and Network Security Practices by Julia H. Allen

* "OCTAVE Method Implementation Guide Version 2.0," Carnegie Mellon University, Software Engineering Institute

NEW QUESTION # 32

An organization suffered many major attacks and lost critical information, such as employee records, and financial information.

Therefore, the management decides to hire a threat analyst to extract the strategic threat intelligence that provides high-level information regarding current cyber-security posture, threats, details on the financial impact of various cyber-activities, and so on.

Which of the following sources will help the analyst to collect the required intelligence?

- A. Campaign reports, malware, incident reports, attack group reports, human intelligence

- B. Human, social media, chat rooms
- C. Active campaigns, attacks on other organizations, data feeds from external third parties
- **D. OSINT, CTI vendors, ISAO/ISACs**

Answer: D

Explanation:

For gathering strategic threat intelligence that provides a high-level overview of the current cybersecurity posture, potential financial impacts of cyber activities, and overarching threats, sources such as Open Source Intelligence (OSINT), Cyber Threat Intelligence (CTI) vendors, and Information Sharing and Analysis Organizations (ISAOs)/Information Sharing and Analysis Centers (ISACs) are invaluable. OSINT involves collecting data from publicly available sources, CTI vendors specialize in providing detailed threat intelligence services, and ISAOs/ISACs facilitate the sharing of threat data within specific industries or communities.

These sources can provide broad insights into threat landscapes, helping organizations understand how to align their cybersecurity strategies with current trends and threats. References:

NEW QUESTION # 33

A threat analyst wants to incorporate a requirement in the threat knowledge repository that provides an ability to modify or delete past or irrelevant threat data.

Which of the following requirement must he include in the threat knowledge repository to fulfil his needs?

- A. Evaluating performance
- **B. Data management**
- C. Protection ranking
- D. Searchable functionality

Answer: B

Explanation:

Incorporating a data management requirement in the threat knowledge repository is essential to provide the ability to modify or delete past or irrelevant threat data. Effective data management practices ensure that the repository remains accurate, relevant, and up-to-date by allowing for the adjustment and curation of stored information. This includes removing outdated intelligence, correcting inaccuracies, and updating information as new insights become available. A well-managed repository supports the ongoing relevance and utility of the threat intelligence, aiding in informed decision-making and threat mitigation strategies. References:
