Pdf AD0-E117 Version - 100% Professional Questions Pool

As is known to us, the quality is an essential standard for a lot of people consuming movements, and the high quality of the AD0-E117 study materials is always reflected in the efficiency. We are glad to tell you that the AD0-E117 study materials from our company have a high quality and efficiency. If you decide to choose our study materials as you first study tool, it will be very possible for you to pass the AD0-E117 Exam successfully, and then you will get the related certification in a short time.

Adobe Experience Manager Architect Master Sample Questions (Q87-Q92):

NEW QUESTION # 87
A large retail customer is building their ecommerce platform on AEM. Several third-party vendors sell products through their site. Those vendors need to review and verify the content close to production before the content goes live and the customer wants to provide them a restricted environment.
Which approach should the Architect recommend?

- A. Export content as PDF and share with the vendors
- B. Use the Preview Capabilities of AEM Author Server
- C. Add a Publish (preview) Server and provide access
- D. Give third-party vendors access to the Author Server

Answer: C

Explanation:
According to Adobe Experience Manager documentation1, a publish (preview) server is a publish instance that is used for previewing content before it goes live on the production server. This can be useful for verifying content with third-party vendors or other stakeholders who need restricted access.

NEW QUESTION # 88
Refer to the exhibit.
☐
A customer has SSO on its AEM Author environment using Adobe IMS, which is integrated with the customer's IDP using SAML
The customer plans to roll out a new secured website on AEM where SSO authentication is required for end users. The end user accounts are also managed in the customer's existing IDP.
How should the Architect set up the authentication for the website?

- A. Integrate AEM Publisher using oAuth with Adobe IMS
- B. Integrate AEM Publisher using SAML directly with the IDP
- C. Set up CUG and use User Synchronisation from Author to Publisher
- D. Integrate AEM Publisher using SAML with Adobe IMS

Answer: B

Explanation:
SAML is a common and standard SSO handler that allows a user to access multiple systems after providing authentication credentials once. AEM ships with a SAML 2.0 Authentication Handler that supports signing and encryption of messages, automatic creation of users, and synching groups to existing ones in AEM3. By integrating AEM Publisher using SAML directly with the IDP, the Architect can leverage the existing user accounts and authentication mechanism for the end users of the secured website.

NEW QUESTION # 89
An AEM client requests that an Architect to establish non-functional KPIs. The Architect needs to avoid impacting user experience, asset processing, and download speed while doing this.
How should the Architect measure the performance properly to establish target metrics?

- A. Tail the Access Log and look for long-running queries
- B. Use JMeter for end-to-end tests
- C. Use the OOTB Explain Query Tool
- D. Use the Free Request Log Analyzer Command Line Tool

Answer: B

Explanation:
"using JMeter for end-to-end tests can measure the performance of AEM pages and components under different load scenarios".

NEW QUESTION # 90
AEM Site users report that the web content pages render very slowly. An Architect notices that the CPU usages of the AEM Publish instances are spiking and reviews the following entry in the log:
[Frt Nov 27 23:11:00 2019] [I] [pid 16004 (tid 140134145820416)] Current cache hit ratio: 47.94 % What should the Architect do to increase the dispatcher cache ratio and prevent the AEM Publish CPU usage spikes?

- A. Create a cron job that will delete the dispatcher cache on a regular basis
- B. Add additional AEM instances to the Publish Farm
- C. Review and optimize the Dispatcher cache configuration
- D. Add additional dispatcher servers

Answer: C

Explanation:
According to Adobe Experience Manager documentation5, dispatcher is a caching and load balancing tool that can be used to improve performance and security of AEM sites. Dispatcher cache configuration can be adjusted using various properties in the dispatcher.any file6. Creating a cron job that will delete the dispatcher cache on a regular basis is not a good idea as it will reduce the cache hit ratio and increase the load on AEM servers.

NEW QUESTION # 91
A customer wants to migrate their AEM environment from an on-premise infrastructure to a public cloud to improve performance.
The customer currently hosts many assets (images, videos, documents) in the DAM.
Approximately 10 business users frequently upload new assets and update existing assets. Editors then use these assets on the sites.

What should an Architect do as part of this migration?

- A. Set up a horizontally scalable AEM environment on MongoDB
- B. Move to a shared datastore and enable binary less replication
- C. Run online revision cleanup before moving to the new storage format
- D. Set up Connected Assets to share the DAM assets in the sites

Answer: C

NEW QUESTION # 92
......

Are you worried about where to find reliable and valid AD0-E117 practice exam cram? Please stop hunting with aimless, Adobe AD0-E117 free study dumps will help you and solve your problems. If you still have doubts, you can download AD0-E117 free demo to have a try. If you have any questions about AD0-E117 Study Tool, please contact us by email or chat with our online customer service, we will always here to answers your questions. Our AD0-E117 test practice will enhance your professional skills and expand your knowledge, which will ensure you a define success in our AD0-E117 actual test.
