## CLT적중율 높은 시험덤프공부 - CLT퍼펙트 최신 덤프

MSSC CLT인증시험은 전업적지식이 강한 인증입니다. IT업계에서 일자리를 찾고 계시다면 많은 회사에서는 MSSC CLT있는지 없는지에 알고 싶어합니다. 만약MSSC CLT자격증이 있으시다면 여러분은 당연히 경쟁력향상입니다.

## MSSC CLT 시험요강:

주제	소개
주제 1	<ul style="list-style-type: none"> <li>Work Communication: This section of the exam measures skills of the Certified Logistics Associate and covers the ability to effectively share information, follow verbal and written instructions, and clearly document tasks in a logistics environment.</li> </ul>
주제 2	<ul style="list-style-type: none"> <li>The Logistics Environment: This section of the exam measures skills of the Certified Logistics Associate and covers the standard operational setting, including the various facilities, equipment, and regulatory factors that affect daily logistics tasks.</li> </ul>
주제 3	<ul style="list-style-type: none"> <li>Inventory Control: This section of the exam measures skills of the Certified Logistics Technician and covers the methods used to track stock levels, perform cycle counts, and reconcile inventory discrepancies to maintain high accuracy and prevent shortages or overstock.</li> </ul>
주제 4	<ul style="list-style-type: none"> <li>Product Receiving: This section of the exam measures skills of the Certified Logistics Technician and covers the technical procedures for inspecting, verifying, documenting, and correctly transferring incoming shipments of goods into storage facilities.</li> </ul>
주제 5	<ul style="list-style-type: none"> <li>Dispatch and Tracking Operations: This section of the exam measures skills of the Certified Logistics Technician and covers the procedures for organizing shipments, coordinating carriers, and monitoring the progress of goods in transit until they reach their destination.</li> </ul>
주제 6	<ul style="list-style-type: none"> <li>Safe Handling of Hazardous Materials: This section of the exam measures skills of the Certified Logistics Technician and covers the specific regulations, documentation, and protective measures required for storing and moving dangerous goods safely.</li> </ul>
주제 7	<ul style="list-style-type: none"> <li>Information Systems: This section of the exam measures skills of the Certified Logistics Associate and covers understanding and using the basic technology and software systems necessary to track, manage, and execute logistics operations, such as inventory or shipment records.</li> </ul>
주제 8	<ul style="list-style-type: none"> <li>The World of Logistics and the Global Supply Chain: This section of the exam measures skills of the Certified Logistics Associate and covers the foundational knowledge of how logistics fits into the broader global economy and the movement of goods from their origin to the final consumer.</li> </ul>
주제 9	<ul style="list-style-type: none"> <li>Product Storage: This section of the exam measures skills of the Certified Logistics Technician and covers the best practices for organizing, locating, and maintaining products within a warehouse to maximize space efficiency and minimize damage or loss.</li> </ul>
주제 10	<ul style="list-style-type: none"> <li>Order Processing: This section of the exam measures skills of the Certified Logistics Technician and covers the steps required to accurately manage and fulfill customer requests, including picking and preparing the correct items for dispatch.</li> </ul>
주제 11	<ul style="list-style-type: none"> <li>Evaluation of Transportation Modes (Truck, Air, Rail, Water): This section of the exam measures skills of the Certified Logistics Technician and covers the ability to compare and select the most appropriate transportation methods based on factors like cost, speed, and the nature of the freight being moved.</li> </ul>
주제 12	<ul style="list-style-type: none"> <li>The 4.0 Technologies: This section of the exam measures skills of the Certified Logistics Associate and covers emerging technologies like automation, the Internet of Things (IoT), and data analytics that are changing how modern supply chains operate in the current industrial revolution.</li> </ul>

## 최신 Certified Logistics Technician CLT 무료샘플문제 (Q41-Q46):

### 질문 # 41

What action is required by the consignee to complete the delivery receipt?

- A. notify supervisor

- B. put away materials
- **C. inventory and inspection of materials**
- D. create carrier freight bill

**정답: C**

**설명:**

Completion of proof-of-delivery relies on verifying that what arrived matches what was shipped and is in acceptable condition. The consignee (receiving facility) performs inventory and condition checks before signing delivery documents. CLT receiving/dispatch content reinforces verifying quantities, item identity, and damage status against the pre-advice (ASN) and shipping documents prior to formal acceptance. Creating a carrier freight bill is the carrier's function; putaway happens after acceptance and documentation. Notifying a supervisor may occur if discrepancies are found, but the core requirement to complete delivery documentation is to perform inventory and inspection, ensuring accurate receipt records for subsequent inventory updates and claims processing if needed.

**질문 # 42**

Which of the following is typically seen in home centers and warehouses that handle and store materials such as lumber, steel sheets and rods, and other relatively long unusually large items?

- A. push-back racks
- B. drive-in and drive-through racks
- C. mobile sliding racks
- **D. cantilever racks**

**정답: D**

**설명:**

Cantilever racks are open-sided storage systems designed for long or bulky items such as lumber, pipes, or steel bars. The CLT "Product Storage Systems" module describes cantilever racks as having arms extending from vertical columns, allowing easy side-loading by forklift. They provide unobstructed front access, making them ideal for materials that vary in length or shape. Drive-in or push-back racks accommodate palletized goods, not elongated materials. Cantilever racks improve space utilization for oversized items and minimize damage by eliminating front uprights. Proper training in load distribution and weight capacity is essential to ensure safe operation. These racks exemplify specialized storage solutions taught in CLT training for managing nonstandard materials.

**질문 # 43**

Which of the following governing bodies is responsible for collecting taxes on imported and exported goods?

- A. Food and Drug Administration
- B. U.S. State Department
- **C. U.S. Customs and Border Protection**
- D. World Trade Organization

**정답: C**

**설명:**

The U.S. Customs and Border Protection (CBP) collects tariffs, duties, and taxes on imported goods entering the United States. As CLT 4.0 explains, CBP is part of the Department of Homeland Security and manages both trade enforcement and revenue collection functions. Duties and tariffs are assessed based on the Harmonized Tariff Schedule (HTS), which classifies goods according to their type, value, and country of origin. The WTO and State Department guide policy, but only CBP enforces and collects. Understanding CBP's role helps logistics personnel ensure accurate customs declarations and prevent costly penalties for underpayment or misclassification. Tariff collection supports fair trade and protects domestic industries from unfair competition while funding essential government programs.

**질문 # 44**

Which of the following consists of component inventory used to feed into production or manufacturing lines?

- A. Work-in-Progress (WIP)
- B. Just-In-Time (JIT)

- C. Finished goods
- D. Raw material stock

정답: D

설명:

Raw material stock refers to the unprocessed inputs stored for use in manufacturing. The CLT "Inventory Control" standards distinguish among three major categories: raw materials, work-in-progress (WIP), and finished goods. Raw materials are held in inventory to feed production lines, ensuring continuity of manufacturing operations. Effective management prevents production delays while avoiding overstock. CLT emphasizes that raw material inventories must be closely coordinated with procurement and production schedules-often managed through systems like MRP or JIT. Proper labeling, storage, and traceability of raw materials are vital for quality control and compliance with industry regulations. Unlike WIP (partially completed items), raw materials are inputs awaiting transformation into finished goods.

질문 # 45

What information would be unnecessary in a packing slip sent with the customer's shipment?

- A. internal stock adjustments
- B. the origination of the shipment
- C. any items placed on backorder
- D. the contents of the shipment

정답: A

설명:

A packing slip accompanies outbound shipments and provides a detailed list of what is included in the shipment, its origin, and any backordered items. According to the CLT "Packaging and Shipment" standards, its purpose is to confirm what was shipped and assist the customer in verifying receipt. Internal stock adjustments, however, are warehouse control data related to inventory accounting and are not relevant or appropriate for inclusion on external documents. Including such internal data could cause confusion or reveal proprietary operational details. The CLT emphasizes clear, customer-facing communication-packing slips should reflect only what directly relates to the customer's order fulfillment, ensuring transparency and professionalism in documentation.

질문 # 46
