New Deep-Security-Professional Learning Materials & Deep-Security-Professional Practice Exam Pdf

Trend Deep-Security-Professional gives practice material that is as per the legitimate Trend Deep-Security-Professional exam. A free demo is other than open to test the parts prior to buying the entire thing for the Trend Deep-Security-Professional. You can pass Trend Micro Certified Professional for Deep Security on the off chance that you use Trend Deep-Security-Professional Dumps material. Not withstanding zeroing in on our material, expecting that you went after in the Trend Deep-Security-Professional exam, you can guarantee your cash back as per systems.

Trend Micro Certified Professional for Deep Security Sample Questions (Q15-Q20):

NEW QUESTION # 15
Multi-tenancy is enabled in Deep Security and new tenants are created. Where does the new tenant data get stored when using SQL Server as the Deep Security database?

- A. An additional table is created for each new tenant in the existing database in the SQL Server database to store its data.
- B. An additional user is created for each new tenant in the SQL Server database to store its data.
- C. An additional database is created in SQL Server for each new tenant to store its data.
- D. The new tenant data is added to the existing SQL Server database.

Answer: C

Explanation:
With Microsoft SQL and PostgreSQL, there's one main database and an additional database for each tenant. With Oracle, all tenant information is in one Deep Security Manager database, but an additional user is created for each tenant. Each user has its own tables.
Explication: Study Guide - page (409)

NEW QUESTION # 16
Which of the following are valid methods for forwarding Event information from Deep Secu-rity? Select all that apply.

- A. Simple Network Management Protocol (SNMP)
- B. Security Information and Event Management (SIEM)
- C. Amazon Simple Notification Service (SNS)
- D. Deep Security Application Programming Interface (API)

Answer: A,B,C

Explanation:
You can configure Deep Security Manager to instruct all managed computers to send logs to a SI-EM, Amazon Simple Notification Service or SNMP computers.
Explication: Study Guide - page (322)

NEW QUESTION # 17
The Firewall Protection Module is enabled on a server through the computer details. What is default behavior of the Firewall if no rules are yet applied?

- A. All traffic is passed through the Firewall using a Bypass rule
- B. All traffic is permitted through the firewall until either a Deny or Allow rule is assigned.
- C. All traffic is blocked by the firewall until an Allow rule is assigned.
- D. A collection of default rules will automatically be assigned when the Firewall Protection Module is enabled.

Answer: D

Explanation:
Deep Security provides a set of Firewall rules that can be applied to policies or directly to a com-puter.
These default rules provide coverage for typical scenarios.
Set up the Deep Security firewall
Explication: Study Guide - page (219)

NEW QUESTION # 18
The Intrusion Prevention Protection Module is enabled, but the traffic it is trying to analyze is encrypted through https. How is it possible for the Intrusion Prevention Protection Module to monitor this encrypted traffic against the assigned rules?

- A. It is possible to monitor the https traffic by creating an SSL Configuration. Creating a new SSL Configuration will make the key information needed to decrypt the traffic available to the Deep Security Agent.
- B. The Intrusion Prevention Protection Module can only analyze https traffic originating from other servers hosting a Deep Security Agent.
- C. The Intrusion Prevention Protection Module can analyze https traffic if the public cer-tificate of the originating server is imported into the certificate store on the Deep Secu-rity Agent computer.
- D. The Intrusion Prevention Protection Module is not able to analyze encrypted https traffic.

Answer: D

Explanation:
Trend Micro Deep Security's Intrusion Prevention Module operates at the network layer and cannot inspect the content of encrypted HTTPS traffic unless the traffic is decrypted prior to reaching the agent. Deep Security does not provide SSL/TLS decryption capability natively as part of the Intrusion Prevention Protection Module. This is explicitly stated in the official product

documentation:

"Deep Security's Intrusion Prevention engine analyzes network packets. It can only inspect unencrypted traffic. HTTPS traffic, which is encrypted, cannot be analyzed unless it is decrypted before reaching Deep Security Agent or Appliance." (Source: Trend Micro Deep Security Administrator's Guide - Intrusion Prevention Module) Option A is incorrect: Deep Security does not have a feature called "SSL Configuration" that enables on-the- fly decryption for IPS inspection.

Option C is incorrect: The origin of HTTPS traffic does not affect the inability to inspect it if it remains encrypted.

Option D is incorrect: Importing a public certificate does not provide the private key needed to decrypt traffic and therefore does not enable content inspection.

NEW QUESTION # 19
Which of the following statements is true regarding Event Tagging?

- A. Only a single tag can be assigned to an Event.
- B. Events can be automatically deleted based on tags.
- C. Adding a tag to an Event modifies the Event data by adding fields, including the name of the tag, the date the tag was applied, and whether the tag was applied manually or automatically
- D. Events can be tagged automatically if they are similar to known good Events.

Answer: D

NEW QUESTION # 20
......

The more you practice with our Deep-Security-Professional practice materials, the more compelling you may feel. Even if you are lack of time, these Deep-Security-Professional practice materials can speed up your pace of review. Our Deep-Security-Professional practice materials are motivating materials especially suitable for those exam candidates who are eager to pass the exam with efficiency. Our Deep-Security-Professional practice materials have inspired millions of exam candidates to pursuit their dreams and motivated them to learn more high-efficiently.
