Pass-Sure Cisco 300-710 Latest Test Guide | Try Free Demo before Purchase

The Cisco 300-710 certification provides is beneficial to accelerate your career in the tech sector. Today, the 300-710 is a fantastic choice to get high-paying jobs and promotions, and to achieve it, you must crack the challenging Cisco exam. It is critical to prepare with actual 300-710 Exam Questions if you have less time and want to clear the test in a short time. You will fail and waste time and money if you do not prepare with real and updated Cisco 300-710 Questions.

Obtaining valid training materials will accelerate the way of passing Cisco 300-710 actual test in your first attempt. It will just need to take one or two days to practice Cisco 300-710 Test Questions and remember answers. You will free access to our test engine for review after payment.

300-710 Exam PDF & Latest 300-710 Study Notes

The hit rate of 300-710 study engine is very high. Imagine how happy it would be to take a familiar examination paper in a familiar environment! You can easily pass the exam, after using 300-710 training materials. You no longer have to worry about after the exam. At the moment you put the paper down you can walk out of the examination room with confidence. 300-710 study engine is so amazing. What are you waiting for?

Cisco 300-710 certification exam is a vendor-specific certification offered by Cisco Systems. Securing Networks with Cisco Firepower certification exam is part of the Cisco Certified Network Professional Security (CCNP Security) certification track. By passing 300-710 exam, candidates will earn the CCNP Security certification, which is recognized globally and highly valued by employers. Additionally, the CCNP Security certification validates that a candidate has the knowledge and skills to secure networks using industry-leading Cisco Firepower technology.

Cisco 300-710 exam is designed for professionals who are interested in validating their knowledge and skills in securing networks with Cisco Firepower. Securing Networks with Cisco Firepower certification exam is part of the Cisco Certified Network Professional (CCNP) Security certification track and is intended for professionals who are responsible for configuring, deploying,

and managing Cisco Firepower solutions. 300-710 Exam measures the candidate's ability to use Cisco Firepower Next-Generation Firewall (NGFW), Cisco Firepower Management Center (FMC), and Cisco Firepower Threat Defense (FTD) to secure networks.

Cisco Securing Networks with Cisco Firepower Sample Questions (Q157-Q162):

NEW QUESTION # 157

With Cisco Firepower Threat Defense software, which interface mode must be configured to passively receive traffic that passes through the appliance?

- A. inline tap
- B. passive
- C. inline set
- D. routed

Answer: B

Explanation:
Reference:
https://www.cisco.com/c/en/us/td/docs/security/firepower/640/configuration/guide/fpmc-config- guide-v64/interface_overview_for_firepower_threat_defense.html

NEW QUESTION # 158

An engineer is configuring a second Cisco FMC as a standby device but is unable to register with the active unit. What is causing this issue?

- A. There is only 10 Mbps of bandwidth between the two devices.
- B. The licensing purchased does not include high availability
- C. The code versions running on the Cisco FMC devices are different
- D. The primary FMC currently has devices connected to it.

Answer: B

Explanation:
Reference:
https://www.cisco.com/c/en/us/td/docs/security/firepower/620/configuration/guide/fpmc-config-guide-v62/firepower_management_center_high_availability.html

NEW QUESTION # 159

Refer to the exhibit.

An engineer generates troubleshooting files in Cisco Secure Firewall Management Center (FMC). A successfully completed task Is removed before the files are downloaded. Which two actions must be taken to determine the filename and obtain the generated troubleshooting files without regenerating them? (Choose two.)

- A. Use an FTP client Hi expert mode on Secure FMC lo upload the files to the FTP server.
- B. Go to expert mode on Secure FMC. list the contents of/Var/common, and determine the correct filename from the output
- C. Click System Monitoring, men Audit to determine the correct filename from the line containing the Generate Troubleshooting Files string.
- D. Connect to CU on the FTD67 and FTD66 devices and copy the tiles from flash to the PIP server.
- E. Go to the same screen as shown in the exhibit, click Advanced Troubleshooting, enter the rile name, and then start the download

Answer: B,C

Explanation:
If a task to generate troubleshooting files in Cisco Secure Firewall Management Center (FMC) is completed successfully but removed before the files are downloaded, the following steps can be taken to determine the filename and obtain the generated troubleshooting files without regenerating them:
* Go to expert mode on Secure FMC:

* Access expert mode on the FMC via SSH or the console.
* List the contents of the directory/var/commonto locate the generated troubleshooting files. Use the commandls /var/common.
* Use the System Monitoring Audit logs:
* In FMC, navigate toSystem > Monitoring > Audit.
* Find the line containing the "Generate Troubleshooting Files" string to determine the correct filename.
These actions help identify and retrieve the generated troubleshooting files without the need to regenerate them, saving time and resources.

NEW QUESTION # 160

Refer to the exhibit.

A Cisco Secure Firewall Threat Defense (FTD) device is deployed in inline mode with an inline set. The network engineer wants router R2 to remove the directly connected route M 68.1.0/24 from its routing table when the cable between routed R1 and the Secure FTD device Is disconnected. Which action must the engineer take?
1

- A. Disable hardware bypass on the Secure FTD device.
- B. Implement autostate functionality on the Gi0/2 interface of R2
- C. Implement the Propagate Link Stale option on the Secure FTD device
- D. Establish a routing protocol between R1 and R2.

Answer: C

Explanation:
To ensure that router R2 removes the directly connected route for 192.168.1.0/24 from its routing table when the cable between router R1 and the Secure FTD device is disconnected, the network engineer must implement the "Propagate Link State" option on the Secure FTD device. This option allows the FTD to propagate the link state changes to adjacent devices, ensuring that the disconnection is recognized and the routing table is updated accordingly.
Steps:
* Access the FTD device configuration via FMC.
* Navigate to the interface settings for the relevant interfaces.
* Enable the "Propagate Link State" option for the interfaces connected to R1 and R2.
* Deploy the changes to the FTD device.
This configuration ensures that the link state changes are communicated to router R2, prompting it to remove the disconnected route from its routing table.
References: Cisco Secure Firewall Threat Defense Configuration Guide, Chapter on Interface Settings and Link State Propagation.

NEW QUESTION # 161

Refer to the exhibit. An engineer analyzes a Cisco Firepower Management Center dashboard.
Which action must be taken by the user to decrease the risk of data loss?

- A. Block all the BitTorrent applications.
- B. Stop all the URLs that are uncategorized.
- C. Stop all URLs that have an unknown reputation.
- D. Block the use of Dropbox.

Answer: A

Explanation:
BitTorrent traffic is the most active low-business-relevance, peer-to-peer protocol shown.
Blocking BitTorrent prevents high-volume, unmanaged file transfers and greatly reduces the risk of sensitive data exfiltration.

NEW QUESTION # 162

......

Pass the Securing Networks with Cisco Firepower 300-710 certification exam which is a challenging task. To make 300-710 exam success journey simple, quick, and smart, you have to prepare well and show a firm commitment to passing this exam. The real,

updated, and error-free Securing Networks with Cisco Firepower 300-710 Exam Dumps are available over the TopExamCollection.
