## 100% Pass Quiz 2026 Unparalleled SAP C\_CPI\_2506 Test Result

We have professional technicians to check the website every day, and you can have a clean and safe online shopping environment if you purchasing C\_CPI\_2506 learning materials from us. In addition, we are pass guarantee and money back guarantee for C\_CPI\_2506 exam dumps, and if you fail to pass the exam, we will give you full refund. We have free demo for you to have a try before buying C\_CPI\_2506 Exam Materials of us, so that you can know what the complete version is like. We have online and offline service, and if you have any questions for C\_CPI\_2506 exam dumps, you can consult us.

### SAP C\_CPI\_2506 Exam Syllabus Topics:

Topic	Details

Topic 1	<ul style="list-style-type: none"> <li>• <b>SAP Integration Suite Overview:</b> This section of the exam measures the skills of Integration Consultants and covers the foundational concepts of the SAP Integration Suite. It provides an understanding of the suite's capabilities, its role in connecting applications, and its relevance in modern cloud-based integration scenarios.</li> </ul>
Topic 2	<ul style="list-style-type: none"> <li>• <b>Managing APIs:</b> This section of the exam measures the skills of Solution Architects and focuses on managing APIs within the SAP ecosystem. It covers topics such as API provisioning, lifecycle management, security policies, and monitoring, ensuring candidates can handle APIs effectively for enterprise integration needs.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>• <b>SAP Event Mesh:</b> This section of the exam measures the skills of Solution Architects and centers on using SAP Event Mesh to support event-driven integration. It highlights the importance of asynchronous communication, event publishing, and subscription models, allowing organizations to build scalable and decoupled systems.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>• <b>Implementing Cloud Integration:</b> This section of the exam measures the skills of Integration Consultants and examines how cloud integration flows are designed and deployed. It emphasizes creating integration scenarios, handling connectivity, and applying best practices to build efficient, secure, and reliable integration processes in SAP's cloud environment.</li> </ul>

## SAP Certified Associate - Integration Developer Sample Questions (Q18-Q23):

### NEW QUESTION # 18

How do you configure a SOAP adapter for asynchronous processing?

- A. Message Exchange Pattern: Request-Reply Process Settings WS Standard
- B. Message Exchange Pattern: One-Way Process Settings: Robust
- **C. Message Exchange Pattern: One-Way Process Settings: WS Standard**
- D. Message Exchange Pattern: Request-Reply Process Settings Robust

**Answer: C**

Explanation:

To configure a SOAP adapter for asynchronous processing, you must set the message exchange pattern to one-way and the process settings to WS standard. The message exchange pattern defines how the sender and receiver communicate with each other using SOAP messages. The one-way pattern means that the sender sends a message to the receiver without expecting a response. The process settings define how the SOAP adapter handles errors and acknowledgements during message processing. The WS standard setting means that the SOAP adapter uses WS-ReliableMessaging protocol to ensure reliable delivery of messages and WS-Addressing protocol to identify the endpoints and actions of messages. Reference: [Configure the SOAP \(SOAP 1.x\) Sender Adapter | SAP Help Portal](#), [Configure the SOAP \(SOAP 1.x\) Receiver Adapter | SAP Help Portal](#)

### NEW QUESTION # 19

You want to integrate a SOAP adapter into an integration process and enable the adapter to send messages to the integration flow. Which user role must you set up in the SOAP adapter?

- A. MessagingSendtoCI
- **B. ESBMessaging send**
- C. MessagingSend

**Answer: B**

Explanation:

To integrate a SOAP adapter into an integration process and enable the adapter to send messages to the integration flow, you must set up the ESBMessaging send user role in the SOAP adapter. The ESBMessaging send user role grants the permission to send messages to the Enterprise Service Bus (ESB) of the Cloud Integration capability. The ESB is responsible for routing and delivering messages between different integration flows and adapters. Reference: [Modernize Integration with SAP Integration Suite | openSAP](#)

### NEW QUESTION # 20

You have set up an integration process to use a SOAP adapter. Which event allows you to run the integration flow directly after deployment?

- A. Start Event
- **B. Start Message**
- C. End Message
- D. End Event

**Answer: B**

Explanation:

A Start Message event allows you to run the integration flow directly after deployment. A Start Message event is triggered when a message arrives at the integration flow through an inbound channel, such as a SOAP adapter. You can use a Start Message event to initiate an integration process based on a message input. Reference: Modernize Integration with SAP Integration Suite | openSAP

### NEW QUESTION # 21

Which functionalities are used by OData?

- A. SOAP, AtomPub, and JSON
- **B. HTTP, AtomPub, and JSON**
- C. TCP, AtomPub, and JSON

**Answer: B**

Explanation:

OData uses HTTP, AtomPub, and JSON as its core functionalities. OData is an open protocol that allows the creation and consumption of queryable and interoperable RESTful APIs in a simple and standard way. OData builds on HTTP as the application protocol for transferring data between clients and servers. OData uses AtomPub as one of the formats for representing data feeds and entries in XML. OData also uses JSON as another format for representing data feeds and entries in a lightweight and human-readable way. Reference: Introducing OData - SAP Learning, OData Overview | OData - The Best Way to REST

### NEW QUESTION # 22

What are some message protocols that the API Management capability within SAP Integration Suite supports? Note: There are 3 correct answers to this question.

- **A. REST**
- B. RFC
- **C. Data**
- **D. SOAP**
- E. IDoc

**Answer: A,C,D**

Explanation:

The API Management capability within SAP Integration Suite supports the following message protocols: SOAP, REST, and Data. SOAP is a protocol for exchanging structured XML messages between web services. REST is an architectural style for designing web services that use HTTP methods and formats. Data is a protocol for sending and receiving binary or text data over HTTP or HTTPS. Reference: Integration Software | SAP Integration Suite, Modernize Integration with SAP Integration Suite | openSAP

### NEW QUESTION # 23

.....

The aim of 2Pass4sure is help every candidates getting SAP certification easily and quickly. Comparing to attending expensive training institution, C\_CPI\_2506 dumps pdf is more suitable for people who are eager to passing actual test but no time and energy. If you decide to join us, you will receive valid C\_CPI\_2506 learning study materials with real questions and detailed explanations.
