

HOT NSE8_812 Cost Effective Dumps - High-quality Fortinet NSE8_812 Fresh Dumps: Fortinet NSE 8 - Written Exam (NSE8_812)

P.S. Free & New NSE8_812 dumps are available on Google Drive shared by RealValidExam: https://drive.google.com/open?id=16kkGaaiYSq3d0zC-x_T8uSu1b-0Wgd_W

NSE8_812 Practice Material is from our company which made these NSE8_812 practice materials with accountability. And NSE8_812 Training Materials are efficient products. What is more, NSE8_812 Exam Prep is appropriate and respectable practice material. We know making progress and getting the certificate of NSE8_812 Training Materials will be a matter of course with the most professional experts in command of the newest and the most accurate knowledge in it. Our NSE8_812 exam prep has taken up a large part of market.

The NSE8_812 exam is one of the most valuable certification exams. The Fortinet NSE 8 - Written Exam (NSE8_812) (NSE8_812) certification exam opens a door for beginners or experienced RealValidExam professionals to enhance in-demand skills and gain knowledge. NSE8_812 exam credential is proof of candidates' expertise and knowledge. After getting success in the Fortinet NSE 8 - Written Exam (NSE8_812) (NSE8_812) certification exam, candidates can put their careers on the fast route and achieve their goals in a short period of time.

Reliable Fortinet NSE8_812 Cost Effective Dumps With Interactive Test Engine & Trustable NSE8_812 Fresh Dumps

Holding a certification in a certain field definitely shows that one have a good command of the NSE8_812 knowledge and professional skills in the related field. However, it is universally accepted that the majority of the candidates for the NSE8_812 exam are those who do not have enough spare time and are not able to study in the most efficient way. You can just feel rest assured that our NSE8_812 Exam Questions can help you pass the exam in a short time. With our NSE8_812 study guide for 20 to 30 hours, you can pass the exam confidently.

Fortinet NSE 8 - Written Exam (NSE8_812) Sample Questions (Q65-Q70):

NEW QUESTION # 65

Refer to the exhibit, which shows a Branch1 configuration and routing table.

```

Branch1 # show system sdwan
config system sdwan
  set status enable
  set load-balance-mode source-dest-ip-based
config zone
  edit "internet"
  next
  edit "overlay"
  next
end
config members
  edit 1
    set interface "wan1"
    set zone "internet"
  next
  edit 2
    set interface "wan2"
    set zone "internet"
  next
  edit 3
    set interface "vpn1-net"
    set zone "overlay"
  next
  edit 4
    set interface "vpn2-mp1s"
    set zone "overlay"
  next
end
config service
end

```

end

#####

```

Branch1 # show router static
config router static
  edit 0
    set distance 1
    set sdwan-zone "internet" "overlay"
  next
end

```

#####

```

Branch1 # get router info routing-table all
Codes: K - kernel, C - connected, S - static, R - RIP, B - BGP
O - OSPF, IA - OSPF inter area
N1 - OSPF NSSA external type 1, N2 - OSPF NSSA external type
2
E1 - OSPF external type 1, E2 - OSPF external type 2
i - IS-IS, L1 - IS-IS level-1, L2 - IS-IS level-2, ia - IS-IS
inter area
* - candidate default

```

```

Routing table for VRF=0
S*   0.0.0.0/0 [1/0] via 10.198.1.1, wan1, [1/0]
      [1/0] via 10.198.2.1, wan2, [1/0]
      [1/0] via vpn1-net tunnel 10.198.5.2, [1/0]
      [1/0] via vpn1-mp1s tunnel 10.198.6.2, [1/0]
C    10.1.1.0/24 is directly connected, port3
...

```

In the SD-WAN implicit rule, you do not want the traffic load balance for the overlay interface when all members are available. In this scenario, which configuration change will meet this requirement?

- A. Change the load-balance-mode to source-ip-based.

- B. Create a new static route with the internet sdwan-zone only
- C. Configure the priority in each overlay member to 10.
- D. Configure the cost in each overlay member to 10.

Answer: C

Explanation:

The default load balancing mode for the SD-WAN implicit rule is source IP based. This means that traffic will be load balanced evenly between the overlay members, regardless of the member's priority.

To prevent traffic from being load balanced, you can configure the priority of each overlay member to 10.

This will make the member ineligible for load balancing.

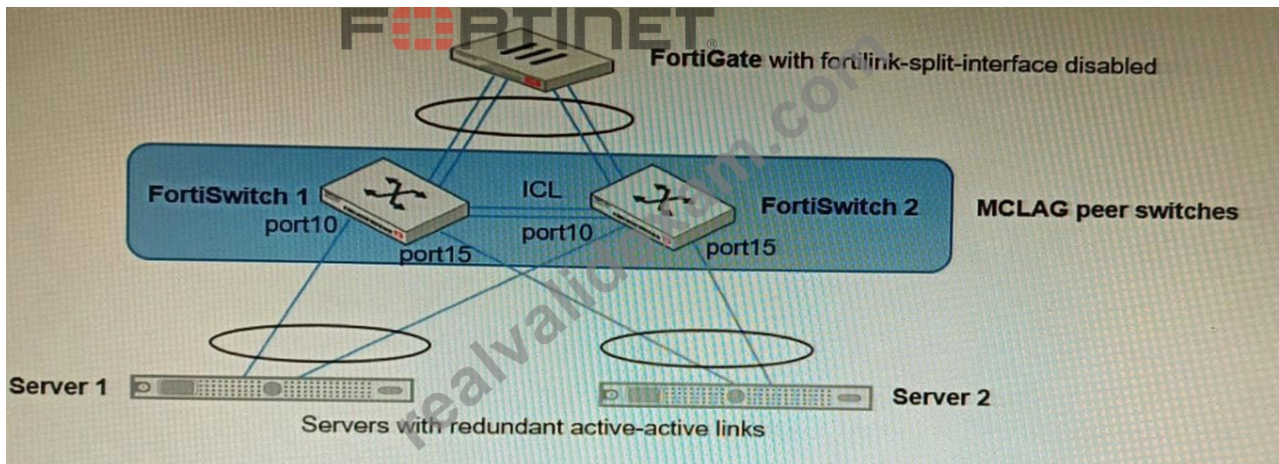

The other options are not correct. Changing the load balancing mode to source-IP based will still result in traffic being load balanced. Creating a new static route with the internet sdwan-zone only will not affect the load balancing of the overlay interface. Configuring the cost in each overlay member to 10 will also not affect the load balancing, as the cost is only used when the implicit rule cannot find a match for the destination IP address.

Option	Description
Change the load-balance-mode to source-ip-based	Will still result in traffic being load balanced.
Create a new static route with the internet sdwan-zone only	Will not affect the load balancing of the overlay interface.
Configure the cost in each overlay member to 10	Will not affect the load balancing, as the cost is only used when the implicit rule cannot find a match for the destination IP address.
Configure the priority in each overlay member to 10	Will prevent traffic from being load balanced.

NEW QUESTION # 66

Refer to the exhibit.

You have been tasked with replacing the managed switch Forti Switch 2 shown in the topology.

Which two actions are correct regarding the replacement process? (Choose two.)

- A. After replacing the FortiSwitch unit, the automatically created trunk name does not change
- B. After replacing the FortiSwitch unit, the automatically created trunk name changes.
- C. MCLAG-ICL will be automatically reconfigured once the new switch is connected to the FortiGate.
- D. CLAG-ICL needs to be manually reconfigured once the new switch is connected to the FortiGate

Answer: A,D

Explanation:

* A is correct because the automatically created trunk name is based on the MAC address of the FortiSwitch unit. When the FortiSwitch unit is replaced, the MAC address will change, but the trunk name will not change.

* B is correct because CLAG-ICL is a manually configured link aggregation group. When the FortiSwitch unit is replaced, the CLAG-ICL configuration will need to be manually reconfigured on the new FortiSwitch unit. The other options are incorrect. Option C is incorrect because the automatically created trunk name does not change when the FortiSwitch unit is replaced. Option D is incorrect because MCLAG-ICL is a manually configured link aggregation group and will not be automatically reconfigured when the FortiSwitch unit is replaced.

NEW QUESTION # 67

An administrator has configured a FortiGate device to authenticate SSL VPN users using digital certificates. A FortiAuthenticator is the certificate authority (CA) and the Online Certificate Status Protocol (OCSP) server.

Part of the FortiGate configuration is shown below:

```
config vpn certificate setting
    set ocsf-status enable
    set ocsf-default-server "FortiAuthenticator"
    set ocsf-option certificate
    set strict-ocsf-check enable
end
config user peer
    edit _any
        set ca CA_Cert
        set ldap-server Training-Lab
        set ldap-mode principal-name
    next
end
config user group
    edit "SSLVPN_Users"
        set member "_any"
    next
end
```

Based on this configuration, which two statements are true? (Choose two.)

- A. If the OCSP server is unreachable, authentication will succeed if the certificate matches the CA.
- B. OCSP checks will always go to the configured FortiAuthenticator
- C. The OCSP check of the certificate can be combined with a certificate revocation list.
- D. OCSP certificate responses are never cached by the FortiGate.

Answer: A,C

Explanation:

B is correct because the OCSP check of the certificate can be combined with a certificate revocation list (CRL). This means that the FortiGate will check the OCSP server to see if the certificate has been revoked, and it will also check the CRL to see if the certificate has been revoked.

D is correct because if the OSCP server is unreachable, authentication will succeed if the certificate matches the CA. This is because the FortiGate will fall back to using the CRL if the OSCP server is unreachable.

The other options are incorrect. Option A is incorrect because OSCP checks can go to other OSCP servers, not just the FortiAuthenticator. Option C is incorrect because OSCP certificate responses can be cached by the FortiGate.

NEW QUESTION # 68

A retail customer with a FortiADC HA cluster load balancing five webservers in L7 Full NAT mode is receiving reports of users not able to access their website during a sale event. But for clients that were able to connect, the website works fine.

CPU usage on the FortiADC and the web servers is low, application and database servers are still able to handle more traffic, and the bandwidth utilization is under 30%.

Which two options can resolve this situation? (Choose two.)

- A. Change the persistence rule to LB_PERSIS_SSL_SESSJD.
- **B. Add more web servers to the real server pool**
- **C. Add a connection-pool to the FortiADC virtual server**
- D. Disable SSL between the FortiADC and the web servers

Answer: B,C

Explanation:

Option B: Adding more web servers to the real server pool will increase the overall capacity of the load balancer, which should help to resolve the issue of users not being able to access the website.

Option D: Adding a connection-pool to the FortiADC virtual server will allow the load balancer to cache connections to the web servers, which can help to improve performance and reduce the number of dropped connections.

Option A: Changing the persistence rule to LB_PERSIS_SSL_SESSJD would only be necessary if the current persistence rule is not working properly. In this case, the CPU usage on the FortiADC and the web servers is low, so the persistence rule is likely not the issue.

Option C: Disabling SSL between the FortiADC and the web servers would reduce the load on the FortiADC, but it would also make the website less secure. Since the bandwidth utilization is under 30%, it is unlikely that disabling SSL would resolve the issue.

NEW QUESTION # 69

Refer to The exhibit, which shows a topology diagram.

A customer wants to use SD-WAN for traffic generated from the data center towards Branches. SD-WAN on HUB should follow the underlay condition on each Branch and the solution should be scalable for hundreds of Branches.

Which SD WAN-Rules strategy should be used?

- **A. Best Quality based on route-tags**
- B. Lowest Cost SLA
- C. Manual based on route-tags

- D. Auto based on link quality

Answer: A

NEW QUESTION # 70

.....

RealValidExam is a real dumps provider that ensure you pass the different kind of IT exam with offering you exam dumps and learning materials. You just need to use your spare time to practice the NSE8_812 Real Dumps and remember NSE8_812 test answers skillfully, you will clear Fortinet practice exam at your first attempt.

NSE8_812 Fresh Dumps: https://www.realvalidexam.com/NSE8_812-real-exam-dumps.html

With NSE8_812 study engine, you will get rid of the dilemma that you work hard but cannot improve, With the help of the NSE8_812 practice exam questions and preparation material offered by RealValidExam, you can pass any NSE8_812 certifications exam in the first attempt, You should take a NSE8_812 practice exam to prepare for the Fortinet NSE 8 - Written Exam (NSE8_812) (NSE8_812) certification exam, As the top professional company in this area, the NSE8_812 latest questions provided by us are the best companion for you.

Suddenly everybody could have massive computing power right NSE8_812 Fresh Dumps on his or her own desk, Your exam success is even guaranteed with total refund of money, if you remain unsuccessful.

With NSE8_812 study engine, you will get rid of the dilemma that you work hard but cannot improve, With the help of the NSE8_812 practice exam questions and preparation material offered by RealValidExam, you can pass any NSE8_812 certifications exam in the first attempt.

Pass-Sure NSE8_812 Cost Effective Dumps offer you accurate Fresh Dumps | Fortinet Fortinet NSE 8 - Written Exam (NSE8_812)

You should take a NSE8_812 practice exam to prepare for the Fortinet NSE 8 - Written Exam (NSE8_812) (NSE8_812) certification exam, As the top professional company in this area, the NSE8_812 latest questions provided by us are the best companion for you.

You can always contact Customer Support NSE8_812 or a member of our sales team using either of the following email.
