We are popular not only because we own the special and well-designed GES-C01 exam materials but also for we can provide you with well-rounded services beyond your imagination. We have an authoritative production team and our GES-C01 study guide is revised by hundreds of experts, which means that you can receive a tailor-made GES-C01 preparations braindumps according to the changes in the syllabus and the latest development in theory and breakthroughs.

In the era of information explosion, people are more longing for knowledge, which bring up people with ability by changing their thirst for knowledge into initiative and "want me to learn" into "I want to learn". As a result thousands of people put a premium on obtaining GES-C01 certifications to prove their ability. With the difficulties and inconveniences existing for many groups of people like white-collar worker, getting a GES-C01 Certification may be draining. Therefore, choosing a proper GES-C01 study materials can pave the path for you which is also conducive to gain the certification efficiently.

GES-C01 Study Guide Practice Materials and GES-C01 Actual Dumps and Torrent - Dumpexams

Exam GES-C01 tests your professional talent and expertise. This is the reason that passing this Snowflake Certification certification

exam has been a tough challenge for professionals. But it is made easy now to ace it! The recently developed Dumpexams's GES-C01 Exam Questions dumps aim at to deliver you the shortest possible route to obtaining GES-C01 without any chance of losing the exam.

Snowflake SnowPro® Specialty: Gen AI Certification Exam Sample Questions (Q292-Q297):

NEW QUESTION # 292

Which of the following is a 'direct cause' of this error related to missing schema-level privileges, assuming the model build name is unique and the warehouse is active and accessible?

- A. ☐
- B. ☒
- C. ☐
- D. ☐
- E. ☐

Answer: B

Explanation:

NEW QUESTION # 293

A data engineering team is designing a pipeline in Snowflake to translate a continuous stream of multi-language customer support tickets into English using 'SNOWFLAKE.CORTEX.TRANSLATE'. They are concerned about potential language identification issues and the overall cost implications. Which of the following statements are true regarding the use of 'SNOWFLAKE.CORTEX.TRANSLATE' for this scenario? (Select all that apply)

- A. Snowflake Cortex functions, including 'TRANSLATE', add an internal prompt to the user's input text, which increases the total input token count for billing purposes beyond the raw text length.
- B. If the source language of a ticket is unknown or contains mixed languages (e.g., 'Spanglish'), the function can still process it by specifying an empty string ' ' for the source _ language argument.
- C. The 'TRANSLATE' function is exclusively billed based on the number of input tokens, as it primarily analyzes existing text rather than generating new content.
- D. The fixed billing rate for the 'TRANSLATE' function is 1.50 Credits per one million Tokens processed.
- E. For cost efficiency, Snowflake recommends using a larger warehouse (e.g., XL or 2XL) for executing queries that call 'TRANSLATE' functions, as this significantly reduces the per-token processing cost.

Answer: A,B,D

Explanation:

Option A is correct because 'SNOWFLAKE.CORTEX.TRANSLATE' can handle mixed-language input or unknown source languages by specifying an empty string for the 'source_language' argument. Option B is incorrect; for functions that generate new text, such as TRANSLATE, both input and output tokens are billable. Option C is incorrect; Snowflake recommends executing queries that call Cortex AISQL functions with a smaller warehouse (no larger than MEDIUM), as larger warehouses do not increase performance. Option D is correct, as TRANSLATE (among other Cortex functions) adds an internal prompt to the input text, resulting in a higher billed input token count than the raw text provided. Option E is correct, as the cost for the 'Translate' function is 1.50 Credits per one million Tokens processed.

NEW QUESTION # 294

A developer is building a prototype Gen AI application using the Snowflake Cortex LLM REST API. During testing, they frequently encounter HTTP 429 'Too Many Requests' errors, particularly when rapidly invoking the 'COMPLETE' endpoint. Which of the following statements accurately describes the usage quotas and troubleshooting steps for such rate limit events in the Cortex REST API?

- A. The HTTP 429 response indicates that the daily credit consumption for Snowflake Cortex AISQL usage has exceeded the 10-credit limit for on-demand accounts without a valid payment method, requiring conversion to a paid account.
- B. Rate limits are model-specific, and exceeding either the Tokens Processed per Minute (TPM) or Requests per Minute (RPM) limits will result in an HTTP 429 response code.

- C. Cortex REST API rate limits are primarily based on Requests per Minute (RPM) and do not consider the total Tokens Processed per Minute (TPM).
- D. To resolve rate limiting, the developer should increase the virtual warehouse size for their API requests, as larger warehouses automatically increase API quotas.
- E. If the usage is below the RPM limit but still triggers a 429, the developer should review the token usage rate as TPM limits might be exceeded.

Answer: B,E

Explanation:

Option C is correct because the Cortex REST API implements rate limits for both Tokens Processed per Minute (TPM) and Requests per Minute (RPM), and offending either of these limits will result in a 429 response code. Option D is correct as the sources explicitly state that if REST API usage is below the RPM limit but still receives a 429, the user should double-check the token usage rate, implying that TPM limits could be the cause. Option A is incorrect because while on-demand Snowflake accounts without a valid payment method are limited to 10 credits per day, an HTTP 429 specifically refers to rate limiting due to high usage, not a daily credit budget exceeding for the account type. Option B is incorrect as Cortex REST API rate limits consider both TPM and RPM. Option E is incorrect because Cortex REST API requests do not require a warehouse, and increasing warehouse size does not directly increase API quotas or resolve rate limiting for the REST API.

NEW QUESTION # 295

A data scientist is implementing a Retrieval Augmented Generation (RAG) system in Snowflake for a legal document repository. They need to convert legal document chunks into vector embeddings and efficiently find the most relevant document chunks based on a user's query. Which of the following statements accurately describe the process and best practices for creating and using these vector embeddings with Snowflake Cortex LLM functions?

□

- A. Option D
- B. Option C
- C. Option B
- D. Option A
- E. Option E

Answer: B,D

Explanation:

□

NEW QUESTION # 296

□

- A. □
- B. □
- C. □
- D. □
- E. □

Answer: B

Explanation:

To prepare a Document AI model build, the role must have several privileges, including 'USAGE on the database and schema, USAGE' and 'OPERATE' on the warehouse, 'CREATE SNOWFLAKE.ML.DOCUMENT_INTELLIGENCE on the schema, and 'CREATE MODEL' on the schema. The error message 'Insufficient privileges to create the model in the specified schema' directly indicates that the 'CREATE MODEL' privilege is missing, as Document AI model builds internally involve creating model objects. While 'CREATE SNOWFLAKE.ML.DOCUMENT_INTELLIGENCE is also critical for creating the Document AI object, this specific error phrasing directly points to the generic 'MODEL' creation privilege.

NEW QUESTION # 297

.....

If you're looking to advance your Snowflake career, Snowflake GES-C01 Exam can help you achieve that goal. This certification

exam is essential to assist professionals in every aspect of their field. However, studying for the exam can be challenging, and finding reliable study materials can be difficult. This is where Dumpexams comes in.

Vce GES-C01 Exam: <https://www.dumpexams.com/GES-C01-real-answers.html>

Avail free 24/7 Online Dumpexams Support for GES-C01 Practice Test, If you bought Vce GES-C01 Exam - SnowPro® Specialty: Gen AI Certification Exam exam collection from our website, you will have right to free updating your dumps one-year, With the available, affordable, updated and of best quality GES-C01 exam pdf dumps, you will be easy to overcome the difficulties of any course outlines, If you decide to choose GES-C01 actual dumps as you first study tool, it will be very possible for you to pass the exam successfully, and then you will get the related certification in a short time.

Do you know when your destructors run, It's a little terrifying to us, and we do this for a living, Avail free 24/7 Online Dumpexams Support for GES-C01 Practice Test.

If you bought SnowPro® Specialty: Gen AI Certification Exam exam collection from GES-C01 our website, you will have right to free updating your dumps one-year, With the available, affordable, updated and of best quality GES-C01 exam pdf dumps, you will be easy to overcome the difficulties of any course outlines.

Actual GES-C01 Exam Dumps Will Be the Best Choice to Prepare for Your Exam

If you decide to choose GES-C01 actual dumps as you first study tool, it will be very possible for you to pass the exam successfully, and then you will get the related certification in a short time.

I highly recommend this for the professionals who want to take Snowflake Specialty GES-C01 exam.
