## CompTIA 220-1101 New Test Camp | Latest 220-1101 Mock Exam

Eliminates confusion while taking the CompTIA A+ Certification Exam: Core 1 exam. Prepares you for the format of your 220-1101 exam dumps, including multiple-choice questions and fill-in-the-blank answers. Comprehensive, up-to-date coverage of the entire 220-1101 curriculum. 220-1101 practice questions are based on recently released 220-1101 Exam Objectives. Includes a user-friendly interface allowing you to take the 220-1101 practice exam on your computers, like downloading the PDF, Web-Based 220-1101 practice test Pass4Test, and Desktop 220-1101 practice exam.

The CompTIA 220-1101 Exam consists of 90 multiple-choice and performance-based questions, which cover a range of topics, including hardware, operating systems, networking, mobile devices, and troubleshooting. Candidates are given 90 minutes to complete the exam, and the passing score is 675 on a scale of 100-900.

## CompTIA A+ Certification Exam: Core 1 Sample Questions (Q678-Q683):

### NEW QUESTION # 678

A company's RAID array has degraded performance and a blinking red light on one of the bays. Which of the following should a technician replace?

- A. CPU
- B. PSU
- C. RAM
- **D. HDD**

**Answer: D**

Explanation:

Step by Step Detailed Comprehensive Explanation with All CompTIA References:

- \* Analysis of the Problem:
  - \* Degraded RAID performance and red light indicate a failed HDD in the array.
  - \* Option Evaluation:
  - \* A. HDD: Replacing the failed hard drive restores RAID performance. Correct.
  - \* B. CPU: Not related to RAID performance. Incorrect.
  - \* C. PSU: Power issues wouldn't cause RAID degradation. Incorrect.
  - \* D. RAM: Unrelated to RAID functionality. Incorrect.
- Reference: RAID troubleshooting is outlined in Domain 5.3.

#### NEW QUESTION # 679

A printer displays an error message even after a paper jam is cleared. Which of the following should a technician do to fix the issue?

- A. Check the paper path for a blocked sensor.
- B. Change the duplex settings.
- C. Run internal printer diagnostics.
- D. Verify the pickup roller is functioning.

**Answer: A**

Explanation:

Explanation

A paper path is the route that paper takes through a printer from the input tray to the output tray. A blocked sensor is a sensor that detects paper jams or other errors in the paper path but fails to clear after the problem is resolved. A blocked sensor can cause a printer to display an error message even after a paper jam is cleared.

The technician should check the paper path for any debris or obstructions that may trigger the sensor.

#### NEW QUESTION # 680

A technician is upgrading a computer OS from Windows 7 to Windows 10. During the OS installation, the system is not able to find the hard drive. Which of the following can the technician do to MOST likely fix the issue?

- A. Load the HDD drivers using a flash drive.
- B. Change the partition to MBR
- C. Upgrade the RAM modules.
- D. Replace the hard drive.

**Answer: A**

Explanation:

Loading the hard disk drive (HDD) drivers using a flash drive is the most likely action that can fix the issue of a computer not being able to find the hard drive during an OS installation from Windows 7 to Windows 10.

The HDD may have a different interface or controller than what Windows 10 supports by default, such as SATA or RAID, which would require loading additional drivers during the installation process. The technician can use a flash drive to load the drivers from another device or source. Changing the partition to MBR, upgrading the RAM modules, or replacing the hard drive are not likely to fix the issue, as they are not related to the HDD drivers

#### NEW QUESTION # 681

A new employee has been issued a company laptop. The employee requests an accessory with a single power source that has wired network connectivity and supports a keyboard, mouse, speakers, and dual monitors.

Which of the following accessories should the systems administrator deploy to BEST meet the new user's needs?

- A. Docking station with DisplayPort
- B. USB-C hub with power delivery
- C. Poe switch
- D. KVM switch with audio

**Answer: A**

Explanation:

A docking station is a hardware accessory that allows laptops to connect to multiple peripherals and devices with a single connection. A docking station with DisplayPort would provide the necessary connectivity for the dual monitors, and it can also support the required peripherals such as the keyboard, mouse, and speakers. In addition, it will provide a wired network connectivity for faster and more reliable network access.

### NEW QUESTION # 682

An end user reports that the time and date on a desktop resets after shutdown, and subsequently, the device reboots. The next day, the desktop does not load the OS and is stuck at a black screen with the following message:

Which of the following would be the BEST action to take next?

- A. Replace the CMOS battery.
- B. Reseat the motherboard power connections.
- C. Change the motherboard.
- D. Restore the BIOS to factory default settings.

Answer: A

### NEW QUESTION # 683

.....

We provide you the free download and tryout of our 220-1101 study tool before your purchase our product and we provide the demo of the product to let the client know our product fully. After you visit the pages of our 220-1101 test torrent on the websites, you can know the characteristics and merits of the 220-1101 Guide Torrent. In the pages of our product on the website, you can find the details and guarantee and the contact method, the evaluations of the client on our 220-1101 test torrent and other information about our 220-1101 exam questions. So it is very convenient for you.
