- A. Supporting interface testing
- B. Automating data backup
- C. Providing user guidance and enablement
- D. Supporting test automation

Answer: C

Explanation:
WalkMe is an end-user enablement tool integrated into SAP transformation programs to ensure smooth adoption and reduce user learning challenges. It provides interactive guidance, on-screen instructions, and automated walkthroughs directly within the SAP application interface. This allows users to follow step-by- step workflows while performing tasks in real time, significantly improving their ability to adapt to new processes and system changes introduced during transformation.
