

Excellent Oracle New 1Z0-1170 Exam Preparation Are Leading Materials & High-quality 1Z0-1170: Oracle Linux Virtualization Manager Associate

BTW, DOWNLOAD part of Prep4sures 1Z0-1170 dumps from Cloud Storage: <https://drive.google.com/open?id=1SvQp-vlfUluRsmFwTa1EeXywQJDv9ucz>

Due to continuous efforts of our experts, we have exactly targeted the content of the 1Z0-1170 exam. You will pass the 1Z0-1170 exam after 20 to 30 hours' learning with our 1Z0-1170 study material. If you fail to pass the exam, we will give you a refund. Many users have witnessed the effectiveness of our 1Z0-1170 Guide braindumps you surely will become one of them. Try it right now! And we will let you down.

Oracle 1Z0-1170 Exam Syllabus Topics:

Section	Objectives
Topic 1: Oracle Linux Virtualization Architecture and Core Components	- Administration interfaces - Engine and KVM host components - Hosted Engine concepts - Oracle Linux Virtualization Manager architecture
Topic 2: Installation and Initial Configuration	- Configure storage domains and networking - Install Oracle Linux Virtualization Manager - Deploy Oracle Linux KVM hosts - Configure data centers and clusters
Topic 3: Optimization and Troubleshooting	- Resource optimization - Performance optimization - Basic troubleshooting
Topic 4: Availability, Backup, and Disaster Recovery	- Disaster recovery concepts - Virtual machine backup - Data warehouse management - High Availability configuration
Topic 5: Administration and Resource Management	- Manage users and roles - Manage storage - Monitor events and logs - Manage virtual machines - Manage networks

New 1Z0-1170 Exam Preparation, Oracle Exam 1Z0-1170 Learning: Oracle Linux Virtualization Manager Associate Finally Passed

This product is enough to get ready for the 1Z0-1170 test on the first attempt. Three formats are easy to use and meet the needs of every Oracle Linux Virtualization Manager Associate (1Z0-1170) test applicant. The Oracle 1Z0-1170 practice material's three formats are Desktop practice test software, web-based practice exam, and PDF.

Oracle Linux Virtualization Manager Associate Sample Questions (Q45-Q50):

NEW QUESTION # 45

What does a split-brain scenario mean in a virtualization cluster context?

- A. A storage domain has two ISO images
- B. A VM has two virtual disks attached
- C. A user has two passwords configured
- D. Two or more nodes may believe they can independently control the same resources

Answer: D

Explanation:

Split-brain is a cluster consistency problem, and fencing helps prevent multiple hosts from concurrently controlling the same workload or storage state.

NEW QUESTION # 46

Which open-source technologies are foundational to OLVM?

- A. XenDesktop and Hyper-V only
- B. OpenStack Swift and Ceph only
- C. Docker Swarm and Kubernetes only
- D. KVM and oVirt

Answer: D

Explanation:

OLVM builds on Linux KVM virtualization and oVirt-style centralized virtualization management.

NEW QUESTION # 47

Which statement about VM live migration is most accurate?

- A. It moves a running VM between compatible hosts, usually requiring proper shared storage and networking.
- B. It always works without network connectivity.
- C. It can occur only when the Engine database is deleted.
- D. It requires every VM to be converted to an ISO file first.

Answer: A

Explanation:

Live migration allows workload movement with minimal downtime when hosts, storage, and network conditions support it.

NEW QUESTION # 48

Why is host fencing important in a highly available virtualization cluster?

- A. It confirms or isolates a failed host to avoid split-brain conditions
- B. It creates user accounts automatically
- C. It replaces the need for backups
- D. It increases the size of every virtual disk

Answer: A

Explanation:

Fencing protects cluster consistency by ensuring a failed or unreachable host cannot continue running workloads unexpectedly.

NEW QUESTION # 49

An organization wants separate teams to manage only their assigned clusters. Which permission type best supports this delegation?

- A. Template Consumer
- B. SuperUser
- C. Cluster Admin
- D. VM User

Answer: C

Explanation:

Cluster-level delegation is handled by assigning Cluster Admin or similar scoped roles to users or groups for the relevant cluster.

NEW QUESTION # 50
