Reliable H12-323_V2.0 Practice Exam Learning Materials: HCIP-WLAN V2.0 - DumpsActual

DumpsActual insists on providing you with the best and high quality exam dumps, aiming to ensure you 100% pass in the actual test. Being qualified with Huawei certification will bring you benefits beyond your expectation. Our Huawei H12-323_V2.0 practice training material will help you to enhance your specialized knowledge and pass your actual test with ease. H12-323_V2.0 Questions are all checked and verified by our professional experts. Besides, the H12-323_V2.0 answers are all accurate which ensure the high hit rate.

Huawei HCIP-WLAN V2.0 Sample Questions (Q500-Q505):

NEW QUESTION # 500
Drag and Drop Question
The toolbar of the 652.WLAN Panner planning main interface is shown in the figure. Some tools have been numbered in the figure. Please match the numbered tools with their implemented functions.

1	Check the network design of the current floor to see if there are any common basic problems
2	Measure the distance between any two points on the drawing to control the distance to deploy APs
3	Correct the scale of the imported drawing if it is inaccurate
4	Demonstrate current scenario network planning design principles and AP deployment suggestions
5	Modify the properties of all obstacles or APs of the same type on the selected floor

Answer:

Explanation:

5
1
2
4
3

NEW QUESTION # 501

Which of the following options are correct about the advantages and disadvantages of the traditional WLAN network operation and maintenance methods and the CampusInsight intelligent operation and maintenance methods? (Multiple choice)

- A. Campusinsight intelligent operation and maintenance can identify potential faults based on dynamic baselines, big data associations, etc.
- B. CampusInsight intelligent operation and maintenance uses the big data platform to uniformly collect, store and analyze data, and has efficient big data processing capabilities
- C. Traditional operation and maintenance methods cannot proactively identify and analyze issues that may affect user perception
- D. Traditional operation and maintenance methods lack correlation analysis between users and networks and cannot accurately measure the user experience effect

Answer: A,B,C,D

NEW QUESTION # 502

In wireless network coverage optimization, unreasonable AP point deployment will affect the coverage effect, so it is necessary to replace the AP point and redeploy it. Which of the following descriptions about AP point selection are correct? (Multiple choice)

- A. In office scenarios, the AP should be installed at a distance from the load-bearing column to avoid excessive signal attenuation.
- B. For continuous multi-room coverage scenarios, if the wall structure is concrete, it is recommended that one AP cover one room.

- C. It is recommended to deploy APs separately at intersections or corners to ensure signal coverage continuity
- D. When one AP covers a room, it is recommended to install the AP in the center of the room.

Answer: A,B,C

NEW QUESTION # 503

When planning a WLAN network in a hotel scenario, since hotels have high requirements for aesthetics: therefore, when engineers select AP models and design wiring plans, they must communicate with customers in advance and confirm the feasibility of the plan.

- A. True
- B. False

Answer: A

NEW QUESTION # 504

During the Portal authentication process, which of the following authentication request messages does the Portal server send to the access device?

- A. HTTP POSTA
- B. REQ AUTH
- C. REQ CHALLENGE
- D. HTTP GET

Answer: B

NEW QUESTION # 505
