P.S. Free & New 2V0-11.25 dumps are available on Google Drive shared by Itcertking: <https://drive.google.com/open?id=1KKxFfT9E9kgo2a4vz8ihbCCSUWECgYGS>

In order to have better life, attending certification exams and obtaining certifications will be essential on the path to success. 2V0-11.25 latest test cram sheet will help you achieve your goal. Only if you receive the certificate the companies require you can have the opportunities for raising-salary and promotion. Thousands of companies think highly of this certification. You will be popular if you pass exam with 2V0-11.25 Latest Test Cram sheet.

### VMware 2V0-11.25 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>• Install, Configure, Administrate the VMware by Broadcom Solution: This section of the exam measures skills of the VMware Cloud Foundation administrator and covers the installation and configuration processes for VMware Cloud Foundation components, deploying and configuring management domains, NSX Edge Clusters, and the VMware Aria Suite Lifecycle. It assesses the ability to deploy workload domains, enable vSphere IaaS control plane, create vSphere namespaces, manage stretched clusters, and use VMware Cloud Foundation APIs. Candidates are also tested on scaling deployments, performing Day 2 operations like backup, recovery, lifecycle management, VM lifecycle management, configuring networking and storage, managing ESXi hosts, implementing encryption, and operationalizing VMware NSX, vSAN, and Aria Suite. The section is comprehensive, targeting those responsible for the ongoing administration and optimization of VMware environments.</li></ul>

Topic 2	<ul style="list-style-type: none"> <li>Plan and Design the VMware by Broadcom Solution: There are no testable objectives in this section. Still, it is intended for solution architects who need to plan and design VMware Cloud Foundation deployments, focusing on sizing, architecture selection, and network</li> <li>storage design.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>VMware by Broadcom Solution: This section of the exam measures skills of the cloud administrator and covers identifying VMware Cloud Foundation components like vSphere, vSAN, and NSX, as well as their architecture, including stretched configurations. It also assesses knowledge of requirements for implementing private cloud solutions, use cases for VMware Aria Suite components, vSphere IaaS control plane, Data Services Manager, and VMware Cloud Foundation Add-Ons. The focus is on the ability to recognize and apply the correct VMware solutions for various enterprise scenarios.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>Troubleshoot and Optimize the VMware by Broadcom Solution: This section of the exam measures skills of the cloud infrastructure support engineer and covers diagnosing and resolving technical issues related to VMware Cloud Foundation deployment and operations. It includes troubleshooting the deployment process, vSphere, networking, vSAN, SDDC Manager, and Aria Suite. The section also evaluates the ability to optimize infrastructure performance, manage resources, and ensure efficient operation, focusing on the practical aspects of maintaining and enhancing VMware Cloud Foundation environments.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>IT Architectures, Technologies, Standards: There are no testable objectives in this section. However, this area establishes the foundational knowledge expected of cloud administrators, such as understanding basic IT infrastructure, virtualization, and cloud models. This section is relevant for cloud administrators and infrastructure engineers.</li> </ul>

## Valid 2V0-11.25 Real Test, 2V0-11.25 Reliable Study Questions

If you find any quality problems of our 2V0-11.25 or you do not pass the exam, we will unconditionally full refund. Itcertking is professional site that providing VMware 2V0-11.25 Questions and answers, it covers almost the 2V0-11.25 full knowledge points.

## VMware Cloud Foundation 5.2 Administrator Sample Questions (Q51-Q56):

### NEW QUESTION # 51

An organization has 3 data center sites and is implementing a solution to achieve a Recovery Point Objective (RPO) of 0 to ensure continuous availability of storage in the event of a single site failure. The sites are connected via a high bandwidth/low latency link. Which two VMware Cloud Foundation (VCF) components can be used to support this capability? (Choose two.)

- A. vSAN
- B. vSphere Replication
- C. vSphere
- D. Aria Operations
- E. NSX

**Answer: A,C**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

To achieve an RPO of 0 (zero data loss) with continuous availability of storage across multiple sites, VMware Cloud Foundation leverages two key components:

vSphere (A): vSphere provides the core platform for compute virtualization, including features such as VMware vSphere HA (High Availability) and VMware vSphere Fault Tolerance, both of which are integral to delivering continuous VM availability and supporting cross-site failover.

vSAN (E): vSAN can be configured in a stretched cluster deployment across the three sites. With a stretched vSAN cluster, data is synchronously replicated between sites, ensuring that all writes are committed to more than one location. This synchronous replication provides true continuous availability and a Recovery Point Objective (RPO) of 0 in the event of a single site failure, provided that the network meets high bandwidth and low latency requirements.

Other components such as Aria Operations and NSX do not provide storage-level availability or synchronous data protection.

vSphere Replication only supports asynchronous replication and cannot guarantee RPO of 0.

#### NEW QUESTION # 52

An administrator needs to delete and re-deploy an NSX Edge cluster that was originally deployed from SDDC Manager and has downloaded the edge cleaner tool.

Where should the administrator run the tool to complete this task?

- A. On the SDDC Manager VM.
- **B. On the Edge cluster node VM(s).**
- C. On the Cloud Builder VM.
- D. On the NSX Manager VM.

**Answer: B**

Explanation:

The NSX Edge Cleaner tool is typically run on the Edge cluster node VM(s) to clean up the previous configuration and ensure that the node(s) are properly removed before re-deploying the NSX Edge cluster.

This process helps to reset the environment and remove any leftover configurations that may affect the re- deployment.

#### NEW QUESTION # 53

While preparing to enable Application Virtual Networks (AVNs) and deploying Aria Suite components, an administrator plans to deploy an NSX Edge cluster.

What is a requirement for deploying the NSX Edge cluster?

- A. The Edge transport nodes must be deployed using the 'large' form factor.
- B. The Edge transport nodes must be configured with an MTU of 1500.
- **C. The Edge cluster must be deployed in the management domain.**
- D. The Edge cluster must be configured for NSX Federation.

**Answer: C**

Explanation:

When deploying an NSX Edge cluster in a VMware Cloud Foundation (VCF) environment, it must be deployed in the management domain. The management domain is responsible for managing and orchestrating various resources, including the NSX Edge cluster, which is crucial for network virtualization and security within the environment.

#### NEW QUESTION # 54

It looks like you seem to be referencing a set of information working or credentials required for setting up or configuring a VMware Aria Suite Lifecycle appliance ( setup previous only configuration known. as The vReal question seems to involve identifying Suite Lifecycle the Manager necessary) information or in credentials a needed VMware for Cloud a Foundation successful ( deployment VCF The) environment. correct From answer your, based provided on list your, list the, correct is answers for this:

- **A. The FQDN of the Aria Suite Lifecycle appliance**
- **B. The password for the vcfadmin@local account**
- C. A free IP Address within the cross-region virtual network segment
- **D. The FQDN of the Aria Suite Lifecycle cluster**
- E. The password for the admin@local account
- **F. The password for the root account**
- G. A free IP address on the VMware NSX Tier 0

**Answer: A,B,D,F**

Explanation:

The fully qualified domain name (FQDN) of the Aria Suite Lifecycle appliance and cluster are necessary for proper configuration and integration within the VMware Cloud Foundation environment.

The password for the root account is required to authenticate and provide administrative access to the environment.

The password for the vcfadmin@local account is needed to perform administrative tasks related to VMware Cloud Foundation

(VCF).

### NEW QUESTION # 55

An administrator is tasked with troubleshooting an issue where some VMs are not appearing in the vCenter inventory after a recent migration to a new vSphere environment.

Which two components should the administrator examine to resolve this issue? (Choose two.)

- A. The vSphere permissions assigned to the VMs.
- B. The storage policies applied to the VMs.
- C. The registration status of the VMs in the new vSphere environment.
- D. The network settings of the new vSphere environment.
- E. The compatibility of the VM hardware version with the new vSphere environment.

**Answer: C,E**

Explanation:

If the hardware version of the virtual machines is incompatible with the new vSphere environment, the VMs may not appear or may fail to register properly. Ensuring compatibility between the VM hardware version and the vSphere environment is essential for successful VM migration.

If the VMs are not correctly registered in the new vSphere environment after migration, they won't show up in the vCenter inventory. Checking the registration status helps to identify if this is the issue.

**NEW QUESTION # 56**

As the captioned description said, our 2V0-11.25 practice materials are filled with the newest points of knowledge about the exam. With many years of experience in this line, we not only compile real test content into our 2V0-11.25 learning quiz, but the newest in to them. And our professionals always keep a close eye on the new changes of the subject and keep updating the 2V0-11.25 study questions to the most accurate.
